Subject Index 1996

Abbott–Bolton model
Association of pure polar liquids: Dielectric properties of docosanoic acid, 3367
***Ab initio* calculation**
Relativistic pseudopotential calculations of the ground-state spectroscopic properties of HBr, 167
Open-chain and ring isomers of CN_2OS. *Ab initio* study of structures and stabilities, 333
Rotational spectrum and *ab initio* calculations of *N*-methylformamide, 343
Ab initio study of the potential-energy well of malondialdehyde on varying the O···O distance, 347
Calculation of one-electron reduction potentials for nitroheterocyclic hypoxia-selective agents, 763
Ab initio molecular orbital calculations of solvent clusters of *trans*-*N*-methylacetamide: Structure, ring cluster formation and out-of-plane deformation, 921
Ab initio calculation and NMR spin–echo measurement of ^{19}F chemical shielding in the alkali-metal fluorides, 1117
Ion–molecule association of H_3O^+ and C_2H_2: Interstellar CH_3CHO, 1305
Electron donor–acceptor complex of ICl with diethyl ether. He I photoelectron spectroscopy and *ab initio* molecular orbital study, 1677
Experimental and theoretical studies of the charge-density distribution in 3,3,6,6-tetramethyl-*S*-tetrathiane, 1709
Cation valence charge states of $MnFe_2O_4$: An *ab initio* Hartree–Fock study, 2043
Rearrangements of the water trimer, 2505
Applications of realistic electrostatic modelling to molecules in complexes, solids and proteins, 2997
Computational study of the $CH_4 + OH \rightarrow CH_3 + H_2O$ reaction using *ab initio* and density functional theory methods, 3467
Spectroscopic and theoretical studies of the OCO···HF complex in pressurized gases, 3473
Randomization and isomerization rate constants for isocyanogen, 4357
Corrigendum to Cation valence charge states of $MnFe_2O_4$: An *ab initio* Hartree–Fock study, 4661
Nature of the non-bonded (C—H)···O interaction of ethers $CH_3O—(CH_2)_n—OCH_3$ (n = 4–8), 4885
Electronic structures and optical properties of LiB_3O_5, $Li_2B_4O_7$ and $KBe_2BO_3F_2$, 5073
Absorption
Observation of dielectric enrichment upon the formation of benzophenone radical anion in a binary solvent mixture, 391
Theoretical model for the prediction of electronic spectra of lanthanide complexes, 1835
Magnetic circular dichroism and optical absorption spectra of Eu^{3+} in $Y_3Al_5O_{12}$ (YAG), 2487
Conspicuous absorption and fluorescence spectroscopic properties of 3,3′-dihydroxy-2,2′-bipyridines in solution, 4909
Acetaldehyde
Ion–molecule association of H_3O^+ and C_2H_2: Interstellar CH_3CHO, 1305
Acetone–chloroform mixture
Molecular structure and physicochemical properties of acetone–chloroform mixtures, 3559
Acetonitrile
FTIR investigation of the co-adsorption of acetonitrile and carbon monoxide on Cu-ZSM-5, 5165
Acetyl chloride
α-Bond cleavage upon electronic excitation of acetyl chloride. Study of CI single surfaces by full geometry optimization, 373
Acetylene
Kinetics of the OH + C_2H_2 reaction in the presence of O_2, 1459
IR spectra of CH_4, CD_4, C_2H_4, C_2H_2, CH_3OH and CH_3OD adsorbed on C_{60} films, 2269
Acetyl peroxyl
Is the reaction between $CH_3C(O)O_2$ and NO_3 important in the night-time troposphere?, 2211
Acidity
Interpretation of ^{59}Co NMR shielding using the hard and soft acid–base concept. Insight into the relative magnitude of the nephelauxetic and the spectrochemical effect, 1121
Use of pyridine as a probe for the determination, by IR spectroscopy, of the Brønsted acid strength of M^IHNaY zeolites, 1263
H^- reaction pathways, 1281
Pyridine and ammonia as probes for FTIR analysis of solid acid catalysts, 1401
New lower rim calix[4]arene amine derivatives: Synthesis, characterisation and acid–base properties. Potential anion and cation binders, 1731
Excited-state prototropic reactions of tetrahydroharmane, 2239
Solvation-controlled clustering of a phenol–pyridine acid–base pair, 3339
Molecular self-assembly controlled by acid–base non-covalent interactions: A mass spectrometric study of some organic acids and bases, 3539
Textural, structural and acid properties of a catalytically active mesoporous aluminosilicate MCM-41, 4623
Acid site
Frequency-response NH_3 sorption study of acidic sites in H-ZSM-5 catalysts, 307
Investigation of acid properties of dealuminated H-mordenite zeolites by low-temperature diffuse reflectance FTIR, 2641
Ac impedance
Ac impedance analysis of tetraethylammonium ion transfer at liquid/liquid microinterfaces, 3851
Acridine
Preferential solvation studied by the fluorescence lifetime of acridine in water–alcohol mixtures, 227
Acridine-1,8-dione
Kinetics and spectral characteristics of transient species formed on one-electron oxidation of acridine-1,8-dione in aqueous solution. Pulse radiolysis study, 2353
Acrylic acid
Colloidal copolymer microgels of *N*-isopropylacrylamide and acrylic acid: pH, ionic strength and temperature effects, 5013
Acrylonitrile
FT-Raman spectroscopic study of ionic association and solvation in acrylonitrile solutions of calcium and magnesium perchlorate, 1187
Surface chemistry of V–Sb–oxide in relation to the mechanism of acrylonitrile synthesis from propane. Part 1.—Chemisorption and transformation of possible intermediates, 5141
Activated carbon
Adsorption competition onto activated carbon, studied by magic-angle spinning NMR, 2615
Effects of ageing on the oxygen surface complexes of an oxidized activated carbon, 2779
Activation energy
Compensation behaviour in the hydrogenation of benzene, toluene and *o*-xylene over Ni/SiO_2. Determination of true activation energies, 1413
Activity analysis
Activity analysis of a water oxidation catalyst adsorbed on an inorganic particle matrix, 3431
Adatom
Reflection–absorption IR spectrum of chlorine adatoms on the silver(100) surface, 879
Additive bond energy scheme
Additive bond energy scheme for the calculation of enthalpies of formation and bond dissociation energies for alkyl radicals, 4415
Adsorbed dye
Photophysics of oxacyanine dyes on surfaces. Re-examination of the origins of the 'new emission' observed with laser excitation and high concentrations of adsorbed dyes, 4809
Adsorbed polymer layer
Non-equilibrium interaction forces between adsorbed polymer layers, 2783
Adsorption
Using computer simulation to study the properties of molecules in micropores, 1
Use of pyrrole as an IR spectroscopic molecular probe in a surface basicity study of metal oxides, 123
Frequency-response NH_3 sorption study of acidic sites in H-ZSM-5 catalysts, 307
Adsorption of Methylene Blue from aqueous solutions by amorphous aluminosilicate gels and zeolite X, 317
^{29}Si magic-angle spinning NMR study of Phillips catalysts: multi-exponential spin–lattice relaxation resulting from adsorption of paramagnetic chromium species onto a silica surface, 453
Heterogeneity of Si–OH–Al groups in HNaY zeolites, 499
Physical characterization of non-ionic surfactant layers adsorbed at hydrophilic and hydrophobic solid surfaces by time-resolved ellipsometry, 531
Neutron reflection study of butanol and hexanol adsorbed at the surface of their aqueous solutions, 565
Influence of tungsten oxide on structural and surface properties of sol–gel prepared TiO_2 employed for 4-nitrophenol photodegradation, 819
Preparation of supported vanadium oxide catalysts. Adsorption and thermolysis of vanadyl acetylacetonate on a silica support, 843
EPR and electron spin echo modulation spectroscopy of Cu^{II} ion species in Cu^{II}-exchanged K-L gallosilicate, 855
Reflection–absorption IR spectrum of chlorine adatoms on the silver(100) surface, 879
Adsorption and photochemistry of dinitrogen tetroxide on low temperature ice layers, 933
Proton magnetic resonance of C_nH_{2n+2} (n = 1–4) adsorbed in mordenite. Dynamic behaviour and host–guest interaction, 1039
Coadsorption of atomic and molecular hydrogen on Rh/Al_2O_3, 1409
$FeSbO_4$ phase formed at the surface of antimony(v) oxide grafted on silica gel, 1569
Effect of adsorption geometry on the selectivity of carbonyl group hydrogenation on Pd/SiO_2, 1595
Metal–support interaction in Pd/CeO_2 catalysts. Part 2.—Ceria textural effects, 1603
Chemical interaction between plasma-excited nitrogen and the surface of HY zeolite, 1643
Surface structure determinations using X-ray absorption spectroscopy, 1653
Adsorption of mixed cationic–non-ionic surfactants at the air/water interface, 1773
Orientation and electrocatalysis of riboflavin adsorbed on carbon substrate surfaces, 1913
Adsorption of atomic oxygen on the MgO (100) surface, 2075
Atomistic simulation of adsorption of water on three-, four- and five-coordinated surface sites of magnesium oxide, 2081
IR spectra of CH_4, CD_4, C_2H_4, C_2H_2, CH_3OH and CH_3OD adsorbed on C_{60} films, 2269
Simulation of adsorption of flexible chains: Concentration effects, 2275

Study of methane adsorption in MFI and MEL zeolites by combination of the electronegativity equalization method and molecular dynamics, 2475
Adsorption competition onto activated carbon, studied by magic-angle spinning NMR, 2615
IR study of nitrotoluene adsorption on oxide surfaces, 3225
Spectroscopic study of CO adsorption on palladium–ceria catalysts, 3233
Adsorption studies and species characterization in catalysts obtained from aqueous solutions or phosphomolybdic acid and γ-alumina, 3239
An experimental and theoretical study of the interaction of CH_3OH and CH_3SH with ZnO, 3247
Activity analysis of a water oxidation catalyst adsorbed on an inorganic particle matrix, 3431
Adsorption of aromatic compounds in large MFI zeolite crystals, 3445
Synthesis and characterization of supported vanadium oxides by adsorption of the acetylacetonate complex, 3635
Adsorption of ethanoic acid on zeolites NaY and HY, 3647
Diffuse reflectance laser photolytic studies of naphthalene, biphenyl and some aromatic hydrocarbons adsorbed in the cavities of faujasitic zeolites, 3653
^{36}Cl labelling and electrochemical study of chloride adsorption on a gold electrode from perchloric acid media, 3727
Electrochemical and second harmonic generation study of bromide adsorption at the Au(111) electrode surface, 3737
Adsorption of benzenesulfonate anions at an Au(111) electrode: Application to study of the reconstruction phenomenon of the Au(100) surface, 3763
Structure sensitivity of irreversibly adsorbed tin on gold single-crystal electrodes in acid media, 3769
Adsorption of pyrazine on Au(111) and Ag(111) electrodes. An *ex situ* XPS study, 3785
Investigation of the vibrational properties of CN^- on a Pt electrode by *in situ* VIS–IR sum frequency generation and functional density calculations, 3823
Comparative adsorption study of dodecanol and cholesterol from ethylene glycol on the mercury electrode and air/solution interface, 3859
Ideality of water vapour and its adsorption on the glass surfaces of a conventional glass vacuum apparatus at 295 K between 0 and 10 Torr, 4301
IR study of CO adsorption on Cu-ZSM-5 and CuO/SiO_2 catalysts: σ and π components of the Cu^+—CO bond, 4595
Site selectivity of argon–methane co-adsorbed in mordenite as studied by NMR, 4601
UV reflectance and FTIR spectroscopic studies of CO adsorption and reaction on lanthanum oxide, 4675
Spectroscopic and kinetic studies of formic acid adsorption on Cu(110), 4683
A RAIRS study of higher alkoxide species on oxygen-modified Cu(100), 4695
Adsorption and thermal decomposition of $Mo(CO)_6$ on TiO_2(110), 4733
Electron-stimulated chemistry of CF_3I adsorbed on Ag(111). C—F bond cleavage and C—C coupling, 4739
Adsorption, desorption, monolayer structure and dynamics of C_2H_4 on Cu(001), 4749
CO-induced removal of the Pt{100}-hex reconstruction studied by RAIRS, 4781
Sensitization of TiO_2 with phthalocyanines. Part 1.—Photo-oxidations using hydroxoaluminium tricarboxymonoamidephthalocyanine adsorbed on TiO_2, 5081
FTIR study of the adsorption of chromium carbonyl complexes on silica, 5093
Surface characterization of modified aluminas. Part 5.—Surface acidity and basicity of CeO_2–Al_2O_3 systems, 5111
FTIR investigation of the co-adsorption of acetonitrile and carbon monoxide on Cu-ZSM-5, 5165

Adsorption isotherm
New theory of water activity in heterogeneous systems, 979

Adsorptive stripping voltammetry
Electrochemical detection of halothane by adsorptive stripping voltammetry, 3669

Ag/Au(111) interface
In situ and real time X-ray diffraction study of interdiffusion at the Ag/Au(111) interface after electrolytic deposition, 4657

Ageing
Effects of ageing on the oxygen surface complexes of an oxidized activated carbon, 2779

Aggregate
X-Ray diffraction study on the aggregate structure of 5,10,15,20-tetra(4-sulfophenyl) porphinatopalladium(II)(4-) in aqueous solution, 1935
Small-angle scattering study of aqueous gels of sodium lithocholate, 3157

Aggregation
Non-preserving cluster size distributions in the initial stages of orthokinetic aggregation, 1007
Photophysics of cyanine dyes on surfaces. A new emission from aggregates of 2,2′-cyanines adsorbed onto microcrystalline cellulose, 1217
Corrigendum to Non-preserving cluster size distributions in the initial stages of orthokinetic aggregation, 2503
Thermal, structural and optical properties of {CdS}–$Na_{86}X$ composites, 2651
Aggregation of perchlorates in aprotic donor solvents. Part 1.—Lithium and sodium perchlorates, 4199
Aggregation of perchlorates in aprotic donor solvents. Part 2.—Alkaline-earth metal perchlorates, 4207
Intermicellar interaction of ganglioside aggregates and structural stability on pH variation, 4533

Alcohol
Diffusion of cyclohexane and cyclopentane derivatives in some polar and non-polar solvents. Effect of intermolecular and intramolecular hydrogen-bonding interactions, 1863
Conspicuous absorption and fluorescence spectroscopic properties of 3,3′-dihydroxy-2,2′-bipyridines in solution, 4909

Alcohol–alkane system
Thermodynamics of alkanol–alkane systems. New modifications of the ERAS model, 1175
Thermodynamic properties of *n*-alcohol–*n*-alkane mixtures. A comparative study of some group contribution theories, 3565

Alcohol oxidation
Synthesis, characterization and catalytic oxidation of alcohols with chromium-substituted aluminophosphates, 1807

Aliphatic compounds
Deviation from Trouton's rule and a method for converting a non-constitutive molecular parameter into a constitutive one, 1717

Alkali metal
Defect chemistry of $LaBO_3$ (B = Al, Mn or Co) perovskite-type oxides. Relevance to catalytic and transport behaviour, 479
Roles of alkali-metal added to Cu-NaZSM-5 catalysts in the oxidation of benzyl alcohol, 1267
Enhancement of intramolecular excimer formation, photodimerization and energy transfer of naphthalene end-labelled poly(ethylene glycol) oligomers *via* complexation of alkali-metal and lanthanide cations, 1381
Surface structure determinations using X-ray absorption spectroscopy, 1653
Effect of alkali-metal promoter on silica-supported copper catalysts in benzyl alcohol oxidation, 2631
Oxidation of UO_2 in molten alkali-metal carbonate mixtures: Formation of uranates and diuranates, 5059

Alkali-metal acetate
IR spectroscopy studies of molecular states of alkali-metal acetates in acetic acid solution, 1725

Alkali-metal fluoride
Ab initio calculation and NMR spin–echo measurement of ^{19}F chemical shielding in the alkali-metal fluorides, 1117

Alkali-metal halide
Excitation functions of cation formation in collisions of diatomic molecules with an ionic bond: CsCl + RbI, 1683
Prediction of the enthalpy of transfer of alkali-metal halides in binary mixtures, 2563
Aqueous solutions containing amino acids and peptides. Part 30.—The enthalpies of interaction of some alkali-metal halides with some amino acids at 25 °C, 4983

Alkali-metal ion
Application of classical electrostatic theory to the polarisation energy of encapsulated ions in C_{60}, 2519

Alkali-metal X zeolite
High nuclearity Pt carbonyls in alkali-metal X zeolites, 2035

Alkaline-earth metal
Global potentials for calcium and strontium solids, 425
Defect chemistry of $LaBO_3$ (B = Al, Mn or Co) perovskite-type oxides. Relevance to catalytic and transport behaviour, 479
Roles of alkali-metal added to Cu-NaZSM-5 catalysts in the oxidation of benzyl alcohol, 1267
Aggregation of perchlorates in aprotic donor solvents. Part 2.—Alkaline-earth metal perchlorates, 4207

Alkaline hydrolysis
Hydrolysis of condensed phosphates in an anion-exchange resin, 3587

Alkaloid
Excited-state prototropic reactions of tetrahydroharmane, 2239

Alkane
Examination of the structure and melting behaviour of thin film *n*-alkanes using ultra-soft polarised near-edge X-ray absorption spectroscopy, 783
Proton magnetic resonance of C_nH_{2n+2} (n = 1–4) adsorbed in mordenite. Dynamic behaviour and host–guest interaction, 1039
Effect of potassium addition to the TiO_2 support on the structure of V_2O_5/TiO_2 and its catalytic properties in the oxidative dehydrogenation of propane, 1609
Photo-assisted oxidation of 2-methylpropane over RB^+-modified V_2O_5/SiO_2. Formation of 2-methylpropane-2-ol from 2-methylpropane and O_2, 1975

Alkanediol
Role of cosolvent in hydrophobic interactions. Calorimetric studies of alkanols in concentrated aqueous solutions of urea at 298 K, 3087

Alkane oxidation
Partial oxidation of C_2–C_4 alkanes into oxygenates using an Au | yttria-stabilized zirconia | Ag electrochemical reaction cell, 3579

Alkanethiol
Ageing of alkanethiol self-assembled monolayers, 4759

Alkanol
Shear viscosities of binary mixtures of pyrrolidin-2-one with C_6–C_{10} *n*-alkan-1-ols, 219
Neutron reflection study of butanol and hexanol adsorbed at the surface of their aqueous solutions, 565
Thermodynamic investigation of the effect of the mutual miscibility of some higher alkanols and water on the partitioning and solubility of some guanine derivatives, 1721
Dehydration of 4-methylpentan-2-ol over lanthanum and cerium oxides, 2619
Role of cosolvent in hydrophobic interactions. Calorimetric studies of alkanols in concentrated aqueous solutions of urea at 298 K, 3087
Partial molar volumes and isentropic compressibilities of mixtures of γ-butyrolactam (n = 5) with higher alkanols, 4463

Alkene

Photo-oxidation of light alkenes using solid metal oxide semiconductor-based catalysts: Effects of reaction temperature and metal oxide additives, 685
Regioselective hydrogenation of alkenes over Pt-loaded zeolite BEA, 871
Interaction of alkenes with CoAPO molecular sieves, 3453
Alkene allylic activation
IR study of alkene allylic activation on magnesium ferrite and alumina catalysts, 4687
Alkene chemisorption
Buta-1,3-diene and but-1-ene chemisorption on Pt(111), Pd(111), Pd(110) and $Pd_{50}Cu_{50}$(111) as studied by UPS, NEXAFS and HREELS in relation to catalysis, 4835
Alkene decomposition
Changes in the acidic properties of pillared taeniolites on heat treatment of alkene decomposition, 4631
Alkene hydrogenation
Catalytic testing of TiO_2/platinum/silicalite-1 composites, 4609
Alkylamine
Effect of the addition of *n*-alkylamines on the growth of sodium dodecyl sulfate micelles, 2413
Corrigendum to Effect of the addition of *n*-alkylamines on the growth of sodium dodecyl sulfate micelles, 5185
Alkyl chain length
Intra-polymer electron-transfer reaction between partially quaternized poly(1-vinylimidazole) and a cobalt(II) Schiff-base complex: Effect of alkyl chain length, 4511
Alkyl iodide
Double ionization of the *n*-alkyl iodides C_2H_5I, C_3H_7I and C_4H_9I, 3293
Alkyl radical
Additive bond energy scheme for the calculation of enthalpies of formation and bond dissociation energies for alkyl radicals, 4415
Alkyne bridge
Intramolecular triplet energy transfer in alkyne-bridged Ru—Os multinuclear complexes: switching between dipole–dipole and electron-exchange mechanisms, 2223
Allene
Microwave spectra of monohalogenated allenes. Chloroallene and iodoallene, 4889
Alloy
Pulse-plating of copper–nickel alloys from a sulfamate solution, 4015
Allylperoxyl radical
Kinetic studies of the allylperoxyl radical self-reaction and reaction with HO_2, 201
Alternating wave
Modulated and alternating waves in a reaction-diffusion model with wave instability, 2919
Alumina
Surface characterization of modified aluminas. Part 4.—Surface hydration and Lewis acidity of CeO_2–Al_2O_3 systems, 1991
Adsorption studies and species characterization in catalysts obtained from aqueous solutions or phosphomolybdic acid and γ-alumina, 3239
Combined Raman and IR study of MO_x–V_2O_5/Al_2O_3 (MO_x = MoO_3, WO_3, NiO, CoO) catalysts under dehydrated conditions, 3259
Selective catalytic reduction of nitric oxide with ammonia on vanadia/alumina catalysts. Influence of vanadia loading and secondary metal oxide additives, 3267
Surface organometallic chemistry of tin. Controlled thermal transformation *in vacuo* of $Sn(n\text{-}C_4H_9)_4$ fragments grafted on the surface of alumina, 3419
IR study of alkene allylic activation on magnesium ferrite and alumina catalysts, 4687
Alumina support
Molecular mechanics study of the interaction of molybdenum disulfide layers with a γ-alumina support in hydrotreating catalysts, 2437
Alumina surface
Structure of alumina surfaces, 4843
Alumination
Acidic and catalytic properties of aluminated mordenite zeolite: Effect of extraframework aluminium, 861
Alumination of the purely siliceous mesoporous molecular sieve MCM-41 and its hydrothermal conversion into zeolite Na-A, 2311
Aluminium
State of aluminium in hydrothermally dealuminated MFI zeolite, 1647
Aluminophosphate
Small-pore aluminium phosphate molecular sieves with chabazite structure. Incorporation of magnesium in structures -34 and -44, 2481
Generation of ion-exchange capacity by silicon incorporation into the aluminophosphate VPI-5/$AlPO_4$-8 molecular sieve system, 3661
Titanium incorporated ATS and AFI type aluminophosphate molecular sieves, 4617
Aluminosilicate
Synthesis of zeolite beta. Part 1.—Using tetraethylammonium hydroxide/bromide with addition of chelates as templating agents, 159
Textural, structural and acid properties of a catalytically active mesoporous aluminosilicate MCM-41, 4623
AM1 calculation
Inverted potentials in two-electron processes in organic electrochemistry, 3983
Amalgam/aqueous hydroxide solution system
Isotope effects of barium in amalgam/aqueous hydroxide solution systems, 4485
Amide
Basicity of amides in water and in aqueous micellar solutions of SDS. Their influence on micellar structure, 1205
Hydration of amines, diamines, polyamines and amides studied by NMR, 1853
Amine
Quantitative study of the interactions of ATP with amines and amino acids, 1511
Hydration of amines, diamines, polyamines and amides studied by NMR, 1853
Amine–carboxylate complex
Binding of carboxylic ligands by protonated amines, 4219
Amino acid
Quantitative study of the interactions of ATP with amines and amino acids, 1511
Aqueous solutions containing amino acids and peptides. Part 30.—The enthalpies of interaction of some alkali-metal halides with some amino acids at 25 °C, 4983
Amino acid derivative
Preferential configurations in solution. Calorimetric study of ternary aqueous systems containing a destructuring agent and derivatives of α-amino acids at 298 K, 4215
Aminocyclodextrin
Electrochemical and ^1H NMR studies on the complexation of hexacyanoferrate(II) anions by aminocyclodextrins, 645
Aminoethanethiosulfuric acid
Oxyhalogen–sulfur chemistry: Non-linear oxidation of 2-aminoethanethiolsulfuric acid (AETSA) by bromate in acidic medium, 4407
Ammonia
Frequency-response NH_3 sorption study of acidic sites in H-ZSM-5 catalysts, 307
Heterogeneity of Si–OH–Al groups in HNaY zeolites, 499
Characterization and quantification of the NH_3 modification of a BCl_3-treated silica gel surface, 679
Pyridine and ammonia as probes for FTIR analysis of solid acid catalysts, 1401
Hydrogen bonding and surface interactions in protic solvents. Coadsorption of ammonia and hydrogen fluoride with water on silver(110), 2445
Selective catalytic reduction of nitric oxide with ammonia on vanadia/alumina catalysts. Influence of vanadia loading and secondary metal oxide additives, 3267
Ammonium ion
Spin conversion in mixed ammonium–potassium halide systems, 4367
Role of anions in the complex formation of crown ethers with ammonium ions chemically bonded on silica gel, 4977
Ammonium nitrate
Low-temperature reflection/absorption IR study of thin films of nitric acid hydrates and ammonium nitrate adsorbed on gold foil, 4787
Ammonium salt
^{17}O and ^1H chemical shifts of water in solutions of some ammonium salts: Evaluation of the anionic effect on the ^{17}O and ^1H chemical shifts of water in aqueous solutions of mineral acids, 3533
Amorphous reduced titania phase
High-resolution electron microscopy investigation of metal–support interactions in Rh/TiO_2, 2799
Amphiphile
Influence of polar head groups on the gel to liquid-crystal transition in vesicular and lipid bilayer systems, 3163
Amphiphilic bis-chromophore dye
Langmuir–Blodgett film and second harmonic generation of a new type of amphiphilic non-linear optical bis-chromophore complex dye, 2585
Anatase
^1H NMR spectroscopy of titania. Chemical shift assignments for hydroxy groups in crystalline and amorphous forms of TiO_2, 2791
Angular aberration correction
Recent advances in electron energy loss spectroscopy of surface vibrations, 4771
Angular momentum
Isomerism and spin–vibronic energy levels of silicon nitroxide, 4361
Aniline
Photoionization of aniline in aqueous solution and its photolysis in cyclohexane, 4177
Anion–anion reaction
Common basis for salt, micelle and microemulsion effects upon the ionic reaction of hexachloroiridate(IV) with thiosulfate, 3381
Anion binding
Electrochemical response to anions in acetonitrile by neutral molecular receptors containing ferrocene, amide and amine moieties, 97
Anion-exchange resin
Hydrolysis of condensed phosphates in an anion-exchange resin, 3587
Anionic effect
^{17}O and ^1H chemical shifts of water in solutions of some ammonium salts: Evaluation of the anionic effect on the ^{17}O and ^1H chemical shifts of water in aqueous solutions of mineral acids, 3533
Anionic surfactant
Effects of fluorocarbon and hydrocarbon anionic micelles on the kinetics of water replacement in the palladium(II) aquocomplex of 1,1,7,7-tetraethyldiethylenetriamine by monoalkylthioureas, 2263
Anisotropic fluid
Computer simulation studies of anisotropic systems. Part 25.—Chiral nematics, the Dzyaloshinsky–Moriya model, 1781
Annealing
Structure of thin, ordered cyclohexane films on metal surfaces, 2611
Anodic alumina
Synthesis and characterization of zeolite (MFI) membrane on anodic alumina, 1061
Anodic decomposition
Electrochemical *in situ* FT-IRRAS studies of a self-assembled monolayer of 2-(11-mercaptoundecyl)hydroquinone, 3813
Anthocyanin
Photochemistry of 3,4′-dimethoxy-7-hydroxyflavylium chloride. Photochromism and excited-state proton transfer, 1693
Anthracene
Anthracene singlet quenching by indoles in media of different polarities: Mechanism and chemical photoreaction, 17
Electronic-energy migration and molecular rotation within bichromophoric macromolecules. Part 1.—Test of a model using bis(9-anthrylmethylphosphonate) bisteroid, 1563
Intramolecular deactivation of photoexcited

anthracenes by aromatic ketones. Part 2.—Charge-transfer deactivation of ω-(9-anthryl)ketones in different solvents and binary solvent mixtures and at different temperatures, 3043
Anthracene laser dye
Energy transfer and photodecomposition of anthracene laser dyes, 2685
Anthraquinone
Intramolecular hydrogen-atom transfer at the lowest excited singlet and triplet states resulting in solvent-dependent novel photochemistry of a sterically strained 1,4-hexyl-bridged anthraquinone, 1473
Antiferromagnetism
Subnitrides with the new cluster $Ba_{14}CaN_6$, 2117
Antimony oxide
$FeSbO_4$ phase formed at the surface of antimony(v) oxide grafted on silica gel, 1569
AOT
Structure of the surface films of AOT solutions and of Newton black films drawn from the same solutions, 553
Corrigendum to Structure of the surface films of AOT solutions and of Newton black films drawn from the same solutions, 2317
Aperiodic equivalent circuit
Aperiodic equivalent circuit for charge permeable thin-layer cells of symmetric, asymmetric types, 3947
Aprotic donor solvents
Aggregation of perchlorates in aprotic donor solvents. Part 1.—Lithium and sodium perchlorates, 4199
Aggregation of perchlorates in aprotic donor solvents. Part 2.—Alkaline-earth metal perchlorates, 4207
Aqueous alkali-metal sulfate solution
Volumetric properties of, and ion-pairing in, aqueous solutions of alkali-metal sulfates under superambient conditions, 4445
Aqueous electrolyte
Roughening of thin silver films in aqueous electrolytes, 2381
Electrophoretic behaviour of bubbles in aqueous electrolytes, 3887
Aqueous solution
Physical properties of cetylpyridinium chloride micelles (CPyCl) and their behaviour as reaction media, 59
^{1}H NMR investigation of self-association of aromatic drug molecules in aqueous solution. Structural and thermodynamical analysis, 383
pK_a of the hydrazinium ion and the reaction of hydrogen atoms with hydrazine in aqueous solution, 2541
Aqueous urea
Thermochemical and volumetric properties of aqueous urea systems. Heat capacities and volumes of transfer from water to urea–water mixtures for some 1:1 electrolytes at 298.15 K, 207
Area method iterative technique
Solution of the multiphase equilibrium problem for pure component, binary and ternary systems using the area method, 4419
Argon matrix
FTIR studies of CO–water complexes in argon matrices and in porous ices, 4927
Argon–oxygen mixture
Magnetism in oxygen clusters. Study of pure and mixed clusters of oxygen by Stern–Gerlach spectroscopy, 1319
Aromatic hydrocarbon
Diffuse reflectance laser photolytic studies of naphthalene, biphenyl and some aromatic hydrocarbons adsorbed in the cavities of faujasitic zeolites, 3653
Arrhenius equation
Kinetic study of the Cu(^{2}S) atom reaction with chlorine ($^1\Sigma_g^+$) at 305–809 K, 1455
Arrhenius parameter determination for the reaction of the oxide radical, hydrated electron and hydroxyl radical with iodate in aqueous solution, 2251
Association
Stacking interactions between caffeine and methyl gallate, 231
Pressure and temperature dependence of the rate constants for the association reactions of CH radicals with CO and N_2 between 202 and 584 K, 1087
Asymmetric electrolyte
Ionic association in asymmetric electrolytes, 91
Atmospheric chemistry
Temperature dependence of the reactions of the nitrate radical with dichloroalkenes followed by LIF detection, 53
Rate coefficients for the room temperature reaction of Cl atoms with dimethyl sulfide and related alkyl sulfides, 369
Is the reaction between $CH_3C(O)O_2$ and NO_3 important in the night-time troposphere?, 2211
FTIR studies of the NO_3 initiated degradation of but-2-yne: Mechanism and rate constant determination, 3459
Identification of an unexpected peroxide formed by successive isomerization reactions of the *n*-butoxy radical in oxygen, 4167
Kinetic study of the reactions of NO_3 with 3-chloropropene, 3-bromopropene and 3-iodopropene using LIF detection, 4385
Atom–diatomic molecule
Quantum phase-space formulation for inelastic scattering of atom–diatomic molecules using the density operator, 1669
Atomic absorption spectroscopy
Effect of divalent cations on the formation and structure of calcium carbonate polymorphs, 1017
Kinetic study of the Cu(^{2}S) atom reaction with chlorine ($^1\Sigma_g^+$) at 305–809 K, 1455
Atomic force microscopy
Non-equilibrium interaction forces between adsorbed polymer layers, 2783
Imaging nanosized gold colloids by atomic force microscopy: A direct comparison with transmission electron microscopy, 3137
Measuring surface stress induced by electrode processes using a micromechanical sensor, 3807
Atomic hydrogen
Coadsorption of atomic and molecular hydrogen on Rh/Al_2O_3, 1409
Atomic iron
A kinetic study of the reactions of Fe(a ^{5}D) and Fe^+(a ^{6}D) with N_2O over the temperature range 294–850 K, 4371
Atomic oxygen
Adsorption of atomic oxygen on the MgO(100) surface, 2075
Interaction of titanium with atomic and molecular oxygen, 2775
Atomistic simulation
Computer simulation of the surface structures of WO_3, 2049
ATP
Quantitative study of the interactions of ATP with amines and amino acids, 1511
Attenuated total reflection FTIR spectroscopy
ATR-FTIR spectroscopic studies of the structure and permeability of sulfonated poly(ether sulfone) membranes. Part 1.—Interfacial water–polymer interactions, 2731
ATR-FTIR spectroscopic studies of the structure and permeability of sulfonated poly(ether sulfone) membranes. Part 2.—Water diffusion processes, 2737
In situ FTIR–attenuated total reflection spectroscopic investigations on the base–acid transitions of polyaniline. Base–acid transition in the emeraldine form of polyaniline, 3063
Attenuated total reflection Fourier-transform IR spectroscopic study of dimethyl sulfoxide self-association in acetonitrile solutions, 3333
Auger spectroscopy
X-Ray photoelectron spectroscopy of Cu^{3+} in NaK_2CuF_6, 3605
Au/NaY catalyst
Studies of the selective reduction of nitric oxide by carbon monoxide in the presence and absence of hydrogen over Au/NaY catalysts, 301
Autoignition
'Hot spots' and gasoline engine knock, 2959
Automotive exhaust gas
Electrochemical removal of NO and CH_4 in the presence of excess O_2, H_2O and CO_2 using Sm_2O_3-doped CeO_2 as a solid electrolyte, 4297
Azopyridinium
Photoelectric response of a bilayer lipid membrane doped with an azopyridinium compound containing a rare-earth-metal complex, 769
Band-gap
Thermal, structural and optical properties of {CdS}–$Na_{ss}X$ composites, 2651
Barium
Isotope effects of barium in amalgam/aqueous hydroxide solution systems, 4485
Barker–Brumleve–Buck circuit
Aperiodic equivalent circuit for charge permeable thin-layer cells of symmetric, asymmetric types, 3947
Baryte structure
Lattice vibrations in compounds crystallising with the baryte structure, 3625
Base hydrolysis
Effect of solvent on the reactions of coordination complexes. Part 21.—Base hydrolysis of some *cis*-(halogeno)(amine)bis(ethylenediamine)cobalt(III) complexes in methanol–water media: The role of substrate hydrophobicity and solvent structure, 3353
Basicity
Interpretation of ^{59}Co NMR shielding using the hard and soft acid–base concept. Insight into the relative magnitude of the nepheiauxetic and the spectrochemical effect, 1121
BCl_3
Threshold photoelectron spectroscopy of BCl_3 and fragmentation of the valence electronic states of BCl_3^+, studied by coincidence spectroscopies, 185
Corrigendum to Threshold photoelectron spectroscopy of BCl_3 and fragmentation of the valence electronic states of BCl_3^+, studied by coincidence spectroscopies, 1819
Belousov–Zhabotinsky reaction
Vulnerability and spiral-wave evolution in the Belousov–Zhabotinsky reaction on a membrane surface, 325
Transition between circular fronts and spiral waves in marginally excitable media, 2897
Refraction of chemical waves propagating in modified membranes, 2903
Belt-shaped molecule
Topological indices and graph polynomials of some macrocyclic belt-shaped molecules, 625
Benzene
Formation of carbon clusters C_n ($1 \leqslant n \leqslant 4$) by laser vaporization of graphite and a study of their chemical reactivity by gas chromatography–mass spectrometry, 1831
Benzenesulfonate anion
Adsorption of benzenesulfonate anions at an Au(111) electrode: Application to study of the reconstruction phenomenon of the Au(100) surface, 3763
Benzoic acid dimer
A single-crystal neutron diffraction study of the temperature dependence of hydrogen-atom disorder in benzoic acid dimers, 5051
Benzophenone
Observation of dielectric enrichment upon the formation of benzophenone radical anion in a binary solvent mixture, 391
Benzophenone ketyl radical
Reduction of a water-soluble iron(III) porphyrin and an iron(II) nitrosyl porphyrin by benzophenone ketyl radical, 2579
Benzyltrimethylsilane
Photochemical processes of benzyltrimethylsilane at 77 K. Remarkable solvent effects and reaction mechanism, 3035
Betacarboline
Excited-state prototropic reactions of tetrahydroharmane, 2239
Bifurcation
Rearrangements of the water trimer, 2505
Parallel Gray–Scott reactions in a stirred vessel, 2839
Application of the parametric representation method to construct bifurcation diagrams for highly non-linear chemical dynamical

systems, 2865
Combustion processes in CSTR. Bifurcation analysis of the H_2–O_2 system, 2989
Bilayer
Influence of polar head groups on the gel to liquid-crystal transition in vesicular and lipid bilayer systems, 3163
Bilayer lipid membrane
Photoelectric response of a bilayer lipid membrane doped with an azopyridinium compound containing a rare-earth-metal complex, 769
Bimetallic catalyst
Dynamics of bimetallic Ni–Cu catalysts, 2291
Bimolecular reaction
Dynamical stereochemistry of bimolecular reactions, 881
Binary system
NMR study of the influence of urea on the self-association of propan-1-ol in water and comparison with Kirkwood–Buff integral results, 35
Shear viscosities of binary mixtures of pyrrolidin-2-one with C_6–C_{10} *n*-alkan-1-ols, 219
Observation of dielectric enrichment upon the formation of benzophenone radical anion in a binary solvent mixture, 391
Self-consistent field theory for wetting of binary polymer–solvent mixtures on rigid and soft interfaces, 579
Solvent effects on the $Co(NH_3)_4(pzCO_2)^{2+}$–$Fe(CN)_6^{4-}$ reaction. An interpretation based on spectroscopic data, 1155
Excess volumes and isentropic compressibilities of pyrrolidin-2-one–alkanol (C_1–C_3) binary mixtures, 1167
Crystalline and amorphous phases in the binary system water–β,β-trehalose, 1337
Thermodynamics of ions of chromic and thiocyanic acids: Solvation in the ethanol–water system, 1345
Thermodynamic study of the ternary system NaCl–H_2O–Et_3N at 25 °C. Part 3.—Solubilities, 1487
Salt-dependent phase behaviour of the phosphatidylinositol 4,5-diphosphate–water system, 1493
UV–VIS spectroscopic study of preferential solvation in mixed binary solvents at various temperatures, 1499
Thermodynamics of ternary mixtures exhibiting tunnel phase behaviour. Part 1.—Cyclohexane–perdeuterocyclohexane–perfluorohexane, 2255
Ultrasonic speeds and volumetric properties of binary mixtures of water with 2-[2-(2-alkoxyethoxy)ethoxy]ethanols at 298.15 K, 2369
Prediction of the enthalpy of transfer of alkali-metal halides in binary mixtures, 2563
Preferential solvation in binary mixtures. Comparison between the quasi-lattice quasi-chemical model and the stepwise solvent exchange model, 2569
Formamide–(C_1–C_5) alkan-1-ols solvent systems, 3347
Molecular structure and physicochemical properties of acetone–chloroform mixtures, 3559
Solution of the multiphase equilibrium problem for pure component, binary and ternary systems using the area method, 4419
Bulk and surface properties for the methanol–1,1-dimethylpropyl methyl ether and methanol–1,1-dimethylethyl methyl ether systems, 4435
Conspicuous absorption and fluorescence spectroscopic properties of 3,3′-dihydroxy-2,2′-bipyridines in solution, 4909
Biopolymer
Small-angle neutron scattering studies of sodium dodecyl sulfate interactions with gelatin. Part 2.—Effect of temperature and pH, 595
Biosensor
Electroactivity, stability and application in an enzyme switch at pH 7 of poly(aniline)–poly(styrenesulfonate) composite films, 4137
Biphasic system
Copper(II) complexation kinetics with hydroxyoximes in CTAB micelles. Effect of extractant hydrophobicity and additives, 249
Biphenyl
Diffuse reflectance laser photolytic studies of naphthalene, biphenyl and some aromatic hydrocarbons adsorbed in the cavities of faujasitic zeolites, 3653
Bipyridylruthenium
Probing the oxidative etching kinetics of metals with the feedback mode of the scanning electrochemical microscope, 3799
Bisteroid
Electronic-energy migration and molecular rotation within bichromophoric macromolecules. Part 1.—Test of a model using bis(9-anthrylmethyl)phosphonate) bisteroid, 1563
Bleaching
Mechanism of bleaching by peroxides. Part 4.—Kinetics of bleaching of malvin chloride by hydrogen peroxide at low pH and its catalysis by transition-metal salts, 2535
Block copolymer
Cooperative association of diblock and triblock copolymers in aqueous solution. A study of mixed micelles of *block*-copoly(oxyethylene/oxybutylene) and *block*-copoly(oxybutylene/oxyethylene/oxybutylene), 257
Effect of cyclisation on the self-association behaviour of block copolymers in aqueous solution. Comparison of oxyethylene/oxybutylene block copolymers *cyclo*-$B_{27}E_{144}$ and $E_{72}B_{27}E_{72}$, 5021
Bond cleavage
α-Bond cleavage upon electronic excitation of acetyl chloride. Study of CI single surfaces by full geometry optimization, 373
Bond critical point
Experimental and theoretical studies of the charge-density distribution in 3,3,6,6-tetramethyl-*S*-tetrathiane, 1709
Bond dissociation energy
G2 calculations on the thermochemistry of MgCN, MgNC and related species, 1135
Additive bond-energy scheme for the calculation of enthalpies of formation of hydrocarbons including geminal H–H terms, 1141
Additive bond energy scheme for the calculation of enthalpies of formation and bond dissociation energies for alkyl radicals, 4415
Bond shrinkage
Fourier transform rotational spectrum and molecular structure of vinylcyclopropane, 907
Boralite
Structural state of boron in MFI-titanium boralites and their catalytic properties, 1031
Borate
Electronic structures and optical properties of LiB_3O_5, $Li_2B_4O_7$ and $KBe_2BO_3F_2$, 5073
Boron
^{11}B NMR studies on complexation of borate with linear and cross-linked polysaccharides, 651
Structural state of boron in MFI-titanium boralites and their catalytic properties, 1031
Boron–nitrogen analogues of the fullerenes: The isolated-square rule, 2197
Boron trihalide
Thermodynamic studies of triangular molecules: Liquid mixtures of xenon and the boron halides, BF_3 and BCl_3, 215
Borosilicate
Solid-state NMR studies of the borosilicate mesoporous molecular sieve MCM-41, 2011
Branched ether–methanol system
Bulk and surface properties for the methanol–1,1-dimethylpropyl methyl ether and methanol–1,1-dimethylethyl methyl ether systems, 4435
Bromate
Phase shifting in a chemical oscillator to encode analogue information, 2873
Oxyhalogen–sulfur chemistry: Non-linear oxidation of 2-aminoethanethiolsulfuric acid (AETSA) by bromate in acidic medium, 4407
Bromide electrosorption
Bromide electrosorption on the low-index faces of silver, 3747
Bromide ion
Electrochemical and second harmonic generation study of bromide adsorption at the Au(111) electrode surface, 3737
Bromoacetic acid
Thermochemical reactivity of a solvate crystal studied by thermal analysis and *in situ* X-ray absorption spectroscopy, 5035
Bromopropane
Vibrational and rotational relaxation of the ν(C—Br) mode of 2-bromopropane, 175
Brønsted acid site
Structural state of boron in MFI-titanium boralites and their catalytic properties, 1031
Use of pyridine as a probe for the determination, by IR spectroscopy, of the Brønsted acid strength of M^IHNaY zeolites, 1263
H^- reaction pathways, 1281
Pyridine and ammonia as probes for FTIR analysis of solid acid catalysts, 1401
Computational studies of the reaction of methanol at aluminosilicate Brønsted acid sites, 2099
Nature of hydroxy groups in MCM-41, 3287
IR spectroscopy of neutral and ionic hydrogen-bonded complexes formed upon interaction of CH_3OH, C_2H_5OH, $(CH_3)_2O$, $(C_2H_5)_2O$ and C_4H_8O with H-Y, H-ZSM-5 and H-mordenite: Comparision with analogous adducts formed on the H-Nafion superacidic membrane, 4863
Brownian dynamics simulation
Simulation of adsorption of flexible chains: Concentration effects, 2275
Bubble formation
Unstable supersaturated solutions of gases in liquids and nucleation theory, 2843
Burgers vector
Atomistic simulation of dislocations, surfaces and interfaces in MgO, 433
But-2-yne
FTIR studies of the NO_3 initiated degradation of but-2-yne: Mechanism and rate constant determination, 3459
Butan-1-ol
Mechanistic signatures in the oxidation of butan-1-ol at a rotating Pd disk in alkaline media from combining cyclic voltammetry with instabilities, 395
Butan-2-one
Measurements and analysis of excess volumes of some alkan-2-one–1-chloroalkane mixtures using Nitta–Chao and Prigogine–Flory–Patterson models, 4453
Butanal
Mechanistic signatures in the oxidation of butan-1-ol at a rotating Pd disk in alkaline media from combining cyclic voltammetry with instabilities, 395
Butane
n-Butane oxidation using catalysts prepared by treatment of $VOPO_4 \cdot 2H_2O$ with octanol, 137
Partition functions and densities of states for butane and pentane, 3509
Hydrogenolysis of propane and *n*-butane over rhodium catalysts, 5117
Butyrolactam
Partial molar volumes and isentropic compressibilities of mixtures of γ-butyrolactam ($n = 5$) with higher alkanols, 4463
C_{60} film
IR spectra of CH_4, CD_4, C_2H_4, C_2H_2, CH_3OH and CH_3OD adsorbed on C_{60} films, 2269
C_{60}–*o*-quinodimethane adduct
Relaxation processes in the excited state of C_{60}–*o*-quinodimethane adducts, 377
Cadmium mercury telluride
Rotation anisotropy by second harmonic generation of II–VI epilayers on a GaAs ⟨100⟩ substrate: Bare CMT and CdS on CMT, 4061
Caesium surface
Reactivity of oxygen states at caesium surfaces towards carbon monoxide and carbon dioxide, 4793
Caffeine

Stacking interactions between caffeine and methyl gallate, 231

Calcination

Chemistry of the calcination of 15-crown-5 and 18-crown-6 ethers occluded in faujasite polytype zeolites, 3281

Calcite

Effect of divalent cations on the formation and structure of calcium carbonate polymorphs, 1017

Calcium carbonate

Electron paramagnetic resonance (EPR) study of Cu^{2+} and Mn^{2+} ions interacting as probes with calcium carbonate during the transformation of vaterite into cubic calcite, 3211

Calcium oxide

Reaction between gaseous sulfur dioxide and solid calcium oxide. Mechanism and kinetics, 1227

Kinetics of the reaction between gaseous sulfur trioxide and solid calcium oxide, 1239

Calf-thymus DNA

Effect of osmoregulatory solutes on the thermal stability of calf-thymus DNA, 1361

Calix[4]arene derivative

New lower rim calix[4]arene amine derivatives: Synthesis, characterisation and acid–base properties. Potential anion and cation binders, 1731

Calorimetry

Solution equilibria of gallium(III) and indium(III) complexes with halide and thiocyanate ions in *N*,*N*-dimethylformamide, 2715

Carbene

Translational diffusion of a carbene and radicals derived from carbenes, 2361

Carbocation

Molecular mechanics force field for tertiary carbocations, 353

Carbohydrate

Deuterium NMR study of a probe molecule dissolved in a carbohydrate liquid crystal, 111

Carbohydrate–water mixture

Conductivity of maltose–water–KCl mixtures in the supercooled liquid and glassy states, 1921

Carbonaceous material

Synergistic effect of zeolite in an intumescence process: Study of the carbonaceous structures using solid-state NMR, 149

Carbonate

Use of isotopically labelled compounds for the *in situ* IR study of the electroreduction of CO_2 in aqueous hydrogencarbonate and buffered phosphate solutions, 3957

Oxidation of UO_2 in molten alkali-metal carbonate mixtures: Formation of uranates and diuranates, 5059

Carbon–carbon bond stretching

Unusual frequency increases of the C=C stretching mode of polyenes and of the Kekulé mode of benzene in S_1 states: Application of a simple valence bond model, 3481

Carbon cluster

Formation of carbon clusters C_n ($1 \leqslant n \leqslant 4$) by laser vaporization of graphite and a study of their chemical reactivity by gas chromatography–mass spectrometry, 1831

Carbon difluoride radical

Kinetics of the self-reaction of CF_2 radical and its reaction with H_2, O_2, CH_4 and C_2H_4 over the temperature range 295–873 K, 3305

Carbon dioxide

Study of carbon dioxide diffusion in zeolites with one- and three-dimensional channel networks by MD simulations and FR methods, 487

Kinetics, intermediates and mechanism for the CO_2-reforming of methane on supported nickel catalysts, 1627

CO_2 insertion into ion-bombarded porous silica, 2453

Electrochemical investigations in supercritical carbon dioxide, 3895

Use of isotopically labelled compounds for the *in situ* IR study of the electroreduction of CO_2 in aqueous hydrogencarbonate and buffered phosphate solutions, 3957

Mechanism of the electrochemical reduction of carbon dioxide at inert electrodes in media of low proton availability, 3963

Carbonium ion

Density functional studies of carbonium ions, 4347

Carbon monoxide

Metal–support interaction in Pd/CeO_2 catalysts. Part 2.—Ceria textural effects, 1603

Spectroscopic study of CO adsorption on palladium–ceria catalysts, 3233

IR study of CO adsorption on Cu-ZSM-5 and CuO/SiO_2 catalysts: σ and π components of the Cu^+—CO bond, 4595

UV reflectance and FTIR spectroscopic studies of CO adsorption and reaction on lanthanum oxide, 4675

CO-induced removal of the Pt{100}-hex reconstruction studied by RAIRS, 4781

FTIR investigation of the co-adsorption of acetonitrile and carbon monoxide on Cu-ZSM-5, 5165

Carbon monoxide adsorption

Adsorption of carbon monoxide on the gold(332) surface, 4829

Carbon monoxide–dioxygen mixture

Reactivity of oxygen states at caesium surfaces towards carbon monoxide and carbon dioxide, 4793

Carbon monoxide sensor

Room-temperature response of platinised tin dioxide gas-sensitive resistors, 3411

Carbon–sulfur bond

Experimental and theoretical studies of the charge-density distribution in 3,3,6,6-tetramethyl-*S*-tetrathiane, 1709

Carbonyl hydrogenation

Effect of adsorption geometry on the selectivity of carbonyl group hydrogenation on Pd/SiO_2, 1595

Carboxylate

CO_2 insertion into ion-bombarded porous silica, 2453

Carboxylic acid–pyridyl

NMR studies of correlations between molecular motions and liquid-crystalline phase transitions in two hydrogen-bonded carboxylic acid–pyridyl complexes. Part 1.—The aromatic regions, 803

NMR studies of correlations between molecular motions and liquid-crystalline phase transitions in two hydrogen-bonded carboxylic acid–pyridyl complexes. Part 2.—The alkyl regions, 811

Carotenoid

Electrochemical, EPR and AM1 studies of acetylenic and ethylenic carotenoids, 1757

Casein micelle

Kinetic evidence for steric destabilization of casein by rennet enzyme activity, 2575

Catalysis

n-Butane oxidation using catalysts prepared by treatment of $VOPO_4 \cdot 2H_2O$ with octanol, 137

Mechanism of the catalytic oxidation of CO with O_2 on an Mo catalyst supported on silica and on bulk MoO_3, 1249

Roles of alkali-metal added to Cu-NaZSM-5 catalysts in the oxidation of benzyl alcohol, 1267

Metal films and particles on oxide surfaces: Structural, electronic and chemisorptive properties, 1435

FTIR studies on the selective oxidation and combustion of light hydrocarbons at metal oxide surfaces. Part 2.—Propane and propene oxidation on Co_3O_4, 1587

Effect of adsorption geometry on the selectivity of carbonyl group hydrogenation on Pd/SiO_2, 1595

Kinetics, intermediates and mechanism for the CO_2-reforming of methane on supported nickel catalysts, 1627

IR mechanistic studies on NO reduction with NH_3 in the presence of oxygen over cerium-exchanged mordenite, 1799

Oxidative coupling of CH_4 using alkali-metal ion conductors as a solid electrolyte, 2393

Surface structure of bulk nickel catalysts, active in the gas-phase hydrodechlorination reaction of aromatics, 2811

Catalytic studies with dealuminated Y zeolite. Part 3.–*n*-Hexane cracking, 2817

Kinetic study of the ruthenium catalysed oxidation of styrene and substituted styrenes, 3643

Investigation of vanadium phosphorus oxide catalysts (VPO) during toluene ammoxidation: New mechanistic insights by *in situ* EPR, 4257

SnO_2–V_2O_5-based catalysts. Nature of surface species and their activity in *o*-xylene oxidation, 4321

Titanium incorporated ATS and AFI type aluminophosphate molecular sieves, 4617

Synthesis of Pt clusters in zeolite BEA. Effect of reduction rate on cluster size and location, 4637

Dispersion and location of molybdenum sulfides supported on zeolite for hydrodesulfurization, 4647

Adsorption and thermal decomposition of $Mo(CO)_6$ on $TiO_2(110)$, 4733

FTIR study of the active ethene polymerisation catalyst, alumina-supported $C_6H_6Cr(CO)_3$, 4763

Catalyst

Evidence for different copper species in precursors of copper–cerium oxide catalysts for hydrogenation reactions. An X-ray diffraction, EPR and X-ray photoelectron spectroscopy study, 131

Studies of the selective reduction of nitric oxide by carbon monoxide in the presence and absence of hydrogen over Au/NaY catalysts, 301

Frequency-response NH_3 sorption study of acidic sites in H-ZSM-5 catalysts, 307

Characterization of $Pt–Sn/SiO_2$ catalysts and the role of Sn in NO–hydrocarbon reactions, 461

Effect of calcination on the structure of Ni/MgO catalyst: An X-ray diffraction study, 469

Defect chemistry of $LaBO_3$ (B = Al, Mn or Co) perovskite-type oxides. Relevance to catalytic and transport behaviour, 479

Photo-oxidation of light alkenes using solid metal oxide semiconductor-based catalysts: Effects of reaction temperature and metal oxide additives, 685

Influence of tungsten oxide on structural and surface properties of sol–gel prepared TiO_2 employed for 4-nitrophenol photodegradation, 819

Preparation of supported vanadium oxide catalysts. Adsorption and thermolysis of vanadyl acetylacetonate on a silica support, 843

Acidic and catalytic properties of aluminated mordenite zeolite: Effect of extraframework aluminium, 861

Regioselective hydrogenation of alkenes over Pt-loaded zeolite BEA, 871

FT-Raman spectroscopic study of the active sites on silica-supported $ZnCl_2$ catalyst, 1027

Structural state of boron in MFI-titanium boralites and their catalytic properties, 1031

Pyridine and ammonia as probes for FTIR analysis of solid acid catalysts, 1401

Dependence of ethene dimerization activity and selectivity on Ni^{II} in ion-exchange *vs.* framework sites in SAPO-5 and SAPO-11 materials, 1429

Metal–support interaction in Pd/CeO_2 catalysts. Part 2.—Ceria textural effects, 1603

Effect of potassium addition to the TiO_2 support on the structure of V_2O_5/TiO_2 and its catalytic properties in the oxidative dehydrogenation of propane, 1609

Characterization of SAPO-11 synthesized conventionally and in the presence of fluoride ions, 2017

Oxidation catalysts: A comparative simulation study of the lattice, defect and surface structure of the stannates $ASnO_3$ (A = Ca, Sr and Ba) and SnO_2, 2057

Characterization of porous lanthanum oxide catalysts. Microscopic and spectroscopic studies, 2425

Electron paramagnetic resonance of heterogeneous chromium catalysts, 2431

Molecular mechanics study of the interaction of molybdenum disulfide layers with a γ-alumina support in hydrotreating catalysts, 2437

Modelling of sintering kinetics of naphtha-reforming Pt/Al_2O_3-Cl catalysts, 2637
Influence of zirconium phosphate on the properties of $(VO)_2P_2O_7$ catalysts for the selective oxidation of *n*-butane to maleic anhydride, 3273
Variable-temperature, ^1H NMR study of hydrogen chemisorption on EuroPt-1, 4709
Characterization of $H_4PMo_{11}VO_{40}$ heteropolyacid on SiO_2 and SiC supports, 5103

Catalyst characterisation
New catalysts for oxygen reduction based on transition-metal sulfides, 4311
Textural, structural and acid properties of a catalytically active mesoporous aluminosilicate MCM-41, 4623

Catalyst poison
Competitive effects of S-containing catalyst poisons on the UPD of H in relation to H_2 evolution kinetics and OPD of H at Pt, 3709

Catalyst precursor
Hydrotalcite-derived mixed oxides containing copper: Catalysts for the removal of nitric oxide, 4331

Catalyst preparation
Surface chemistry of V–Sb–oxide in relation to the mechanism of acrylonitrile synthesis from propane. Part 2.—Reactivity towards ammonia and relationship with catalytic behaviour, 5151

Catalyst structure
Surface structure of bulk nickel catalysts, active in the gas-phase hydrodechlorination reaction of aromatics, 2811

Catalyst support
Spectroscopic study of oxygen adsorption on CeO_2–γ-Al_2O_3 catalyst supports, 1619
Synthesis and characterization of supported vanadium oxides by adsorption of the acetylacetonate complex, 3635

Catalytic converter
Spectroscopic study of oxygen adsorption on CeO_2–γ-Al_2O_3 catalyst supports, 1619

Catalytic oxidation
Enhancement of the selectivity to carbon monoxide with feedstream doping by tetrachloromethane in the oxidation of methane on stoichiometric calcium hydroxyapatite, 293
Mechanism of the catalytic oxidation of CO with O_2 on an Mo catalyst supported on silica and on bulk MoO_3, 1249
Synthesis, characterization and catalytic oxidation of alcohols with chromium-substituted aluminophosphates, 1807

Catalytic reduction
Selective catalytic reduction of nitric oxide with ammonia on vanadia/alumina catalysts. Influence of vanadia loading and secondary metal oxide additives, 3267

Cation incorporation
Effect of divalent cations on the formation and structure of calcium carbonate polymorphs, 1017

Cation transfer
Corrigendum to Gibbs energies, entropies and enthalpies of transfer for divalent cations to several solvents, 1083

Cavity ring-down spectroscopy
J-dependent linewidths for the (110)–(000) band of the $\tilde{A}\ ^1A''$–$\tilde{X}\ ^1A'$ transition of HNO studied by cavity ring-down spectroscopy, 1283

CdS
Thermal, structural and optical properties of {CdS}–$Na_{16}X$ composites, 2651
Surface modification of CdS quantum dots with fluorinated thiophenol, 4575

CdTe semiconductor
Mechanistic aspects of the electrodeposition of stoichiometric CdTe on semiconductor substrates, 4077

Cellular automaton model
Cellular automaton model of three-dimensional excitable media, 2883

Cement
Molecular modelling of the mechanism of action of phosphonate retarders on hydrating cements, 831
Applied crystallography solutions to problems in industrial solid-state chemistry. Case examples with ceramics, cements and zeolites, 2187

Centrosymmetric media
Phenomenological three-layer model for surface second-harmonic generation at the interface between two centrosymmetric media, 4547

Ceramic
Applied crystallography solutions to problems in industrial solid-state chemistry. Case examples with ceramics, cements and zeolites, 2187

Ceria
Surface characterization of modified aluminas. Part 4.—Surface hydration and Lewis acidity of CeO_2–Al_2O_3 systems, 1991
Effect of incorporation of copper or nickel on hydrogen storage in ceria. Mechanism of reduction, 2001
Dehydration of 4-methylpentan-2-ol over lanthanum and cerium oxides, 2619
An FTIR study of surface ceria hydroxy groups during a redox process with H_2, 4669

Ceria–alumina
Surface characterization of modified aluminas. Part 5.—Surface acidity and basicity of CeO_2–Al_2O_3 systems, 5111

Ceria-supported molybdena
The dispersion of molybdena on ceria, 4589

Cerium
Phase shifting in a chemical oscillator to encode analogue information, 2873

Cerium-exchanged mordenite
IR mechanistic studies on NO reduction with NH_3 in the presence of oxygen over cerium-exchanged mordenite, 1799

Cetyltrimethylammonium chloride micelle
Interaction of cetyltrimethylammonium chloride micelles under static and hydrodynamic conditions, 4541

Chabazite
Small-pore aluminium phosphate molecular sieves with chabazite structure. Incorporation of magnesium in structures -34 and -44, 2481

Chain folding
Photophysical studies on a fluorescence probe labelled fatty-acid: Chain folding in a micellar environment, 2697

Chalcone
Photochemistry of 3,4′-dimethoxy-7-hydroxyflavylium chloride. Photochromism and excited-state proton transfer, 1693

Channel network
Study of carbon dioxide diffusion in zeolites with one- and three-dimensional channel networks by MD simulations and FR methods, 487

Charge distribution
Conformational dependence of the molecular charge distribution and its influence on intermolecular interactions, 1701
Experimental and theoretical studies of the charge-density distribution in 3,3,6,6-tetramethyl-*S*-tetrathiane, 1709

Charge-permeable thin-layer cell
General aperiodic equivalent circuit for charge permeable thin-layer cells of symmetric or asymmetric types. Part 2.—Interfacial kinetics, 4987

Charge separation
Photosensitized charge separation using ruthenium(II) complex-containing polymers in MeOH, 3599

Charge transfer
Cyclodextrin effects on intramolecular charge transfer of 2-biphenylcarboxylic acid: A pre-twisted molecule, 29
Relaxation processes in the excited state of C_{60}–*o*-quinodimethane adducts, 377
Solvent effects on the $Co(NH_3)_4(pzCO_2)^{2+}$–$Fe(CN)_6^{4-}$ reaction. An interpretation based on spectroscopic data, 1155
UV–VIS spectroscopic study of preferential solvation in mixed binary solvents at various temperatures, 1499
Photoinduced electron transfer between triethylamine and aromatic carbonyl compounds: The role of the nature of the lowest triplet state, 1689

Chelate
Effect of changing the charge of an iron(II) chelate on electron transfer to a cobalt(III) complex-containing poly(methacrylic acid-co-styrenesulfonic acid) in aqueous solution, 409
Sonoluminescence of chelated terbium(III) in aqueous solution, 2529

Chemical diffusion
Chemical transport in mixed conductors: Application to the model materials $SrTiO_3$ and ZrO_2, 2143

Chemical oscillation
Parallel Gray–Scott reactions in a stirred vessel, 2839
Phase shifting in a chemical oscillator to encode analogue information, 2873

Chemical sensor
Electroactivity, stability and application in an enzyme switch at pH 7 of poly(aniline)–poly(styrenesulfonate) composite films, 4137

Chemical shielding
Ab initio calculation and NMR spin–echo measurement of ^{19}F chemical shielding in the alkali-metal fluorides, 1117

Chemical shift
^{129}Xe NMR chemical shifts and linewidths of xenon in zeolites ZnY. Part 2.—Examination of various origins of chemical shift distributions, 1815
^1H NMR spectroscopy of titania. Chemical shift assignments for hydroxy groups in crystalline and amorphous forms of TiO_2, 2791
^{17}O and ^1H chemical shifts of water in solutions of some ammonium salts: Evaluation of the anionic effect on the ^{17}O and ^1H chemical shifts of water in aqueous solutions of mineral acids, 3533

Chemical wave refraction
Refraction of chemical waves propagating in modified membranes, 2903

Chemiluminescence
Polarization of the CaI* chemiluminescence from the $Ca^* + CH_3I \rightarrow CaI^* + CH_3$ reaction: Evidence for Hund's case (c) coupling, 3671

Chemisorbed carbon dioxide
Reactivity of oxygen states at caesium surfaces towards carbon monoxide and carbon dioxide, 4793

Chemisorption
Characterization and quantification of the NH_3 modification of a BCl_3-treated silica gel surface, 679
Metal films and particles on oxide surfaces: Structural, electronic and chemisorptive properties, 1435
CO_2 insertion into ion-bombarded porous silica, 2453
Characterization of Lewis-acid sites in zeolites by EPR using the NO molecule as a probe, 2495
Theoretical aspects of methane chemisorption on MgO surfaces. Modelling of impurity-induced trapping of a hole, surface defects and site dependence of methane chemisorption on $(MgO)_{9,12}$ clusters, 2765
Surface chemistry of V–Sb–oxide in relation to the mechanism of acrylonitrile synthesis from propane. Part 1.—Chemisorption and transformation of possible intermediates, 5141

Chini complex
High nuclearity Pt carbonyls in alkali-metal X zeolites, 2035

Chirality
Computer simulation studies of anisotropic systems. Part 25.—Chiral nematics, the Dzyaloshinsky–Moriya model, 1781

Chloride
^{36}Cl labelling and electrochemical study of chloride adsorption on a gold electrode from perchloric acid media, 3727

Chlorine
Rate coefficients for the room temperature reaction of Cl atoms with dimethyl sulfide and related alkyl sulfides, 369
Dynamical stereochemistry of bimolecular reactions, 881
Kinetic study of the $Cu(^2S)$ atom reaction with chlorine ($^1\Sigma_g^+$) at 305–809 K, 1455
Kinetic studies of the reaction of Cl atoms with

SiH_4, 3299

Chlorine monofluoride
Evidence for a pre-reactive intermediate in a gaseous mixture of ethyne and chlorine monofluoride. Rotational spectrum of the Mulliken bπ · aσ complex $C_2H_2 \cdots ClF$, 1291
Rotational spectrum and molecular properties of the dinitrogen–chlorine monofluoride complex, 2671

Chloro-alcohol
Thermodynamics of the interations of some chloro-substituted alcohols with hen egg-white lysozyme, 1905

1-Chloroalkane
Measurements and analysis of excess volumes of some alkan-2-one–1-chloroalkane mixtures using Nitta–Chao and Prigogine–Flory–Patterson models, 4453

Chloroallene
Microwave spectra of monohalogenated allenes. Chloroallene and iodoallene, 4889

Chlorobenzene
Crystallisation of oil-in-water emulsions. Amphiphile directed nucleation in aqueous emulsions of *m*-chloronitrobenzene, 1927

Chlorophenol
Temperature effect on proton-transfer equilibrium and IR spectra of chlorophenol–tributylamine systems, 2555

Chlorophyll *a*
Carotenoid interactions in peridinin chlorophyll *a* proteins from dinoflagellates. Evidence for optical excitons and triplet migration, 989

Cholesterol
Comparative adsorption study of dodecanol and cholesterol from ethylene glycol on the mercury electrode and air/solution interface, 3859

CH radical
Kinetics of reactions between neutral free radicals. Rate constants for the reaction of CH radicals with N atoms between 216 and 584 K, 723

Chromic acid
Thermodynamics of ions of chromic and thiocyanic acids: Solvation in the ethanol–water system, 1345

Chromium
^{29}Si magic-angle spinning NMR study of Phillips catalysts: multi-exponential spin–lattice relaxation resulting from adsorption of paramagnetic chromium species onto a silica surface, 453
Raman spectroscopy of supported chromium oxide catalysts. Determination of chromium–oxygen bond distances and bond orders, 1969
Electron paramagnetic resonance of heterogeneous chromium catalysts, 2431

Chromium carbonyl complex
FTIR study of the adsorption of chromium carbonyl complexes on silica, 5093

Chromium-substituted aluminophosphate
Synthesis, characterization and catalytic oxidation of alcohols with chromium-substituted aluminophosphates, 1807

α-Chymotrypsin
Dynamics of spin-labelled α-chymotrypsin in reverse micelles of differently charged surfactants, 3151

***cis*/*trans* conformer**
Open-chain and ring isomers of CN_2OS. *Ab initio* study of structures and stabilities, 333

^{13}C isotope
Fourier transform rotational spectrum and molecular structure of vinylcyclopropane, 907

Clar polyhedron
Leapfrog, Fries, Clar and phason-line-free fullerenes, 3673

Classical electrostatic theory
Application of classical electrostatic theory to the polarisation energy of encapsulated ions in C_{60}, 2519

Classical scattering
Quantum phase-space formulation for inelastic scattering of atom–diatomic molecules using the density operator, 1669

Clathrate hydrate
Characterisation of the {111} growth planes of a type II gas hydrate and study of the mechanism of kinetic inhibition by poly(vinylpyrrolidone), 5029

Clausius–Clapeyron relationship
Coadsorption of atomic and molecular hydrogen on Rh/Al_2O_3, 1409

Clay
Surface chemical heterogeneity of pillared hydrotalcites, 1243

^{36}Cl labelling
^{36}Cl labelling and electrochemical study of chloride adsorption on a gold electrode from perchloric acid media, 3727

Clock reaction
Oxyhalogen–sulfur chemistry: Non-linear oxidation of 2-aminoethanethiolsulfuric acid (AETSA) by bromate in acidic medium, 4407

Cluster
Non-preserving cluster size distributions in the initial stages of orthokinetic aggregation, 1007
Embedding nano-clusters in siliceous faujasite, 2093
Subnitrides with the new cluster $Ba_{14}CaN_6$, 2117
Crystal structure and non-linear optical properties of a novel half-open cubane-like cluster $[Et_4N]_3[WOS_3(CuI)_3(\mu_2\text{-}I)] \cdot H_2O$, 2343
Microscopic theory of gelation: Distribution of cyclic species and theory of critical point, 2417
Corrigendum to Non-preserving cluster size distributions in the initial stages of orthokinetic aggregation, 2503
Intercluster exhange rates in AOT water-in-oil microemulsions: Percolation, material transport mechanism and activation energy, 3145
Solvation-controlled clustering of a phenol–pyridine acid–base pair, 3339
Synthesis of Pt clusters in zeolite BEA. Effect of reduction rate on cluster size and location, 4637
Corrigendum to Microscopy theory of gelation: Distribution of cyclic species and theory of critical point, 5185

Cluster theory
Ionic association in asymmetric electrolytes, 91
Theoretical aspects of methane chemisorption on MgO surfaces. Modelling of impurity-induced trapping of a hole, surface defects and site dependence of methane chemisorption on $(MgO)_{9,12}$ clusters, 2765

CN^- pseudohalide ion
Investigation of the vibrational properties of CN^- on a Pt electrode by *in situ* VIS–IR sum frequency generation and functional density calculations, 3823

Co-adsorption
Site selectivity of argon–methane co-adsorbed in mordenite as studied by NMR, 4601

Coagulation
Kinetic evidence for steric destabilization of casein by rennet enzyme activity, 2575

CoAPO
Interaction of alkenes with CoAPO molecular sieves, 3453

Cobalt
^{57}Fe emission Mössbauer study of electron capture after-effects in ^{57}Co-doped diaquadiformato complexes of the first transition series, 117
Effect of changing the charge of an iron(II) chelate on electron transfer to a cobalt(III) complex-containing poly(methacrylic acid-co-styrenesulfonic acid) in aqueous solution, 409
Synthesis and characterization of large-pore molecular sieves CoSAPO-36 and CoSAPO-46, 1257

Cobalt macrocycle
Calculation of cyclic voltammetric responses for the reductive formation of catalyst–substrate adducts on electrode surfaces, 3917

Cobalt–magnesium oxide
XPS and EPR study of high and low surface area CoO–MgO solid solutions: Surface composition and Co^{2+} ion dispersion, 4567

Cobalt oxide
Structure and catalysis of cobalt oxide overlayers prepared on zirconia by low-temperature-plasma oxidation, 3425

Coherent vibration
Dynamical spectroscopy of many-body interactions. Coherent vibrations and predissociation of $I_2(B)$ in solid Kr, 1821

Cohesion parameter
Determination of cohesion parameters for terpenoids such as 1,8-cineole using semi-empirical methods and calculations based on group contributions, 753

Coincidence spectroscopy
Threshold photoelectron spectroscopy of BCl_3 and fragmentation of the valence electronic states of BCl_3^+, studied by coincidence spectroscopies, 185
Corrigendum to Threshold photoelectron spectroscopy of BCl_3 and fragmentation of the valence electronic states of BCl_3^+, studied by coincidence spectroscopies, 1819

Collision
State-specific rate constants for the relaxation of $O_2(X\,^3\Sigma_g^-, v = 8\text{–}11)$ in collisions with O_2, N_2, NO_2, CO_2, N_2O, CH_4 and He, 193

Colloid
Photoelectrophoresis of colloidal iron oxides. Part 2.—Magnetite (Fe_3O_4), 791
Semiconductor photocatalysis. Part 20.—Role of surface in the photoreduction of carbon dioxide catalysed by colloidal ZnS nanocrystallites in organic solvent, 2401
Imaging nanosized gold colloids by atomic force microscopy: A direct comparison with transmission electron microscopy, 3137
Wettability of spherical particles at liquid surfaces, 4271
Direct measurement of the depletion interaction in a charged colloidal dispersion, 4997

Colloidal polymer microgel
Colloidal copolymer microgels of *N*-isopropylacrylamide and acrylic acid: pH, ionic strength and temperature effects, 5013

Colour change
Reversible colour changes in zeolite A treated with ammonium polysulfide, 1639

Combustion
Kinetics of dissociative recombination of H_3O^+ ions with free electrons in premixed flames, 707
Spatial effects in the thermal runaway of combustible fluids in insulation materials, 2965
Study of the mechanism of oscillatory solid-phase combustion by a non-linear chemical kinetic model, 2971
Combustion processes in CSTR. Bifurcation analysis of the H_2–O_2 system, 2989
Resolving combustible gas mixtures using gas sensitive resistors with arrays of electrodes, 4497

Combustion oscillator
Bulk-scale modelling of a combustion oscillator, 2983

Competition
Adsorption competition onto activated carbon, studied by magic-angle spinning NMR, 2615

Complex
Theoretical model for the prediction of electronic spectra of lanthanide complexes, 1835
Steric solvent effect on formation thermodynamics and structure of halogeno complexes of lanthanide(III) ions in *N*,*N*-dimethylacetamide, 1869

Complex formation
Cyanide thermodynamics. Part 4.—Enthalpies and entropies of cyanide complexation of Cu^I, Ag^I, Zn^{II} and Cd^{II}, 641
Electrochemical and ^{1}H NMR studies on the complexation of hexacyanoferrate(II) anions by aminocyclodextrins, 645
^{11}B NMR studies on complexation of borate with linear and cross-linked polysaccharides, 651
Fluorescence quenching and complexation behaviour of tetraphenylporphyrin with some divalent metal ions, 747
FT-Raman spectroscopic study of ionic association and solvation in acrylonitrile solutions of calcium and magnesium

perchlorate, 1187
Solution equilibria of gallium(III) and indium(III) complexes with halide and thiocyanate ions in *N,N*-dimethylformamide, 2715
Structural and thermodynamical analysis of molecular complexation by ^{1}H NMR spectroscopy. Intercalation of ethidium bromide with the isomeric deoxytetranucleoside triphosphates 5′-d(GpCpGpC) and 5′-d(CpGpCpG) in aqueous solution, 3545
NMR study of the ligand interchange of 18-crown-6 complexes with La^{3+}, Ca^{2+}, Pb^{2+} and Ba^{2+} ions in 70% methanol solution, 4391
FTIR studies of CO–water complexes in argon matrices and in porous ices, 4927
Interactions between lanthanide cations and nitrate anions in water. Part 1.—Effect of the ionic strength on the Gibbs energy, enthalpy and entropy of complexation of the neodymium cation, 4957
Role of anions in the complex formation of crown ethers with ammonium ions chemically bonded on silica gel, 4977

Complex permittivity
Complex permittivity of a film of poly[4-(acryloxy)phenyl(4-chlorophenyl)methanone] containing free ion impurities and the separation of the contributions from interfacial polarization, Maxwell–Wagner–Sillars effects and dielectric relaxations of the polymer chains, 1947

Complex polymer
In situ FTIR study of charge conduction in a poly(3-methylthiophene)–poly({1-[2-(3-thienyl)ethyl]-1,4,8,11-tetraazacyclotetradecane}nickel(II) perchlorate) copolymer film, 773

Composite catalyst
Catalytic testing of TiO_2/platinum/silicalite-1 composites, 4609

Compressibility
Thermodynamic study of the ternary system NaCl–H_2O–Et_3N at 25 °C. Part 2.—Compressibilities, 47
Excess volumes and isentropic compressibilities of pyrrolidin-2-one–alkanol (C_1–C_3) binary mixtures, 1167

Computer simulation
Atomistic simulation of dislocations, surfaces and inerfaces in MgO, 433
Computer simulations of energetic and entropic changes of a single polymer chain under extension, 1375
Computational studies of the reaction of methanol at aluminosilicate Brønsted acid sites, 2099
Consistent implementation of the electronegativity equalization method in molecular mechanics and molecular dynamics, 2469

Conduction
In situ FTIR study of charge conduction in a poly(3-methylthiophene)–poly({1-[2-(3-thienyl)ethyl]-1,4,8,11-tetraazacyclotetradecane}nickel(II) perchlorate) copolymer film, 773
Designing of quasi-one-dimensional compositional superlattices of donor–acceptor polymers, 5017

Conductivity
Tetrakis(decyl)ammonium tetraphenylborate: A novel electrolyte for non-polar media, 1747
Conductivity of maltose–water–KCl mixtures in the supercooled liquid and glassy states, 1921
Electrochemical investigations in supercritical carbon dioxide, 3895

Conductor
Chemical transport in mixed conductors: Application to the model materials $SrTiO_3$ and ZrO_2, 2143

Configurational isomer
Configuration-dependent electron hopping between equivalent ligands in isomeric ruthenium(II) complexes, 4227

Configuration in solution
Preferential configurations in solution. Calorimetric study of ternary aqueous systems containing a destructuring agent and derivatives of α-amino acids at 298 K, 4215

Confined liquid
New approaches to measure interfacial rheology of confined fluids, 619

Conformation
Molecular dynamics of putrescine, 913
Conformation and dynamics of the mispair O^6-ethylguanine:thymine, 1353
Conformational dependence of the molecular charge distribution and its influence on intermolecular interactions, 1701

Conformer
Experimental and theoretical studies of the charge-density distribution in 3,3,6,6-tetramethyl-*S*-tetrathiane, 1709

Conjugated diene
Reactions of conjugated dienes with nitrogen monoxide and dioxide, 1767

π-Conjugated polymer crystal
The sum of hyperpolarizabilities approach to third-order non-linear optical susceptibilities of π-conjugated polymer crystals, 3165

Constitutive parameter
Deviation from Trouton's rule and a method for converting a non-constitutive molecular parameter into a constitutive one, 1717

Contact angle
Particle wettability and line tension, 85

Contact ion pairing
ν_2 Band region of nitrate as an indicator for contact ion pairing in aqueous lithium and calcium nitrate solutions, 23

Continuous chirality analysis
Continuous chirality analysis of interconversion pathways of the water-trimer enantiomers, 2523

Continuous flow unstirred reactor
Wave-induced chaos in a continuously fed unstirred reactor, 2911

Continuous stirred tank reactor
Combustion processes in CSTR. Bifurcation analysis of the H_2–O_2 system, 2989

Conversion reaction
Effectiveness of Cr^{III}, Mn^{II}, Co^{II} and Ni^{II} paramagnetic complexes in promoting the *ortho*- into *para*-positronium conversion reactions, 1395

Coordinated surface site
Atomistic simulation of adsorption of water on three-, four- and five-coordinated surface sites of magnesium oxide, 2081

Coordination complex
Effect of solvent on the reactions of coordination complexes. Part 21.—Base hydrolysis of some *cis*-(halogeno)(amine)bis(ethylenediamine)-cobalt(III) complexes in methanol–water media: The role of substrate hydrophobicity and solvent structure, 3353

Coordination sphere
IR spectroscopy studies of molecular states of alkali-metal acetates in acetic acid solution, 1725

Copolymer
Computation of the electronic structure and conduction properties of poly(pyrrole–isonaphthopyrrole) quasi-one-dimensional superlattices, 2281
Intramolecular excimer formation in diphenylsiloxane-based copolymers, 3593
Designing of quasi-one-dimensional compositional superlattices of donor–acceptor polymers, 5017
Effect of cyclisation on the self-association behaviour of block copolymers in aqueous solution. Comparison of oxyethylene/oxybutylene block copolymers *cyclo*-$B_{27}E_{144}$ and $E_{72}B_{27}E_{72}$, 5021

Copper
EPR and electron spin echo modulation spectroscopy of Cu^{II} ion species in Cu^{II}-exchanged K-L gallosilicate, 855
Effect of incorporation of copper or nickel on hydrogen storage in ceria. Mechanism of reduction, 2001
Crystal structure and non-linear optical properties of a novel half-open cubane-like cluster $[Et_4N]_3[WOS_3(CuI)_3(\mu_2\text{-}I)]\cdot H_2O$, 2343
Model for the oscillatory reaction between hydrogen peroxide and thiosulfate catalysed by copper(II) ions, 2851
Electron paramagnetic resonance (EPR) study of Cu^{2+} and Mn^{2+} ions interacting as probes with calcium carbonate during the transformation of vaterite into cubic calcite, 3211
Generation of ion-exchange capacity by silicon incorporation into the aluminophosphate VPI-5/$AlPO_4$-8 molecular sieve system, 3661
Electrochemical reduction *vs.* vapour deposition for n-GaAs/Cu Schottky-barrier formation: A comparative study, 4069
Adsorption, desorption, monolayer structure and dynamics of C_2H_4 on Cu(001), 4749

Copper(110) formate
Spectroscopic and kinetic studies of formic acid adsorption on Cu(110), 4683

Copper catalyst
Reduction of NO over TiO_2-supported Cu catalysts, 2625
Effect of alkali-metal promoter on silica-supported copper catalysts in benzyl alcohol oxidation, 2631

Copper–cerium
Evidence for different copper species in precursors of copper–cerium oxide catalysts for hydrogenation reactions. An X-ray diffraction, EPR and X-ray photoelectron spectroscopy study, 131

Copper-containing hydrotalcite structure
Hydrotalcite-derived mixed oxides containing copper: Catalysts for the removal of nitric oxide, 4331

Copper cryolite
X-Ray photoelectron spectroscopy of Cu^{3+} in NaK_2CuF_6, 3605

Copper electrode
Electrochemical study of the interaction of thiourea with copper electrodes in alkaline aqueous solution, 2725

Copper underpotential deposition
Induced adsorption of sulfate/bisulfate anions by submonolayer amounts of copper on deliberately stepped Pt surfaces, 3757

Correlation energy
Rearrangements of the water trimer, 2505

Corrosion
Electrochemical study of the interaction of thiourea with copper electrodes in alkaline aqueous solution, 2725

Cosolvent
Role of cosolvent in hydrophobic interactions. Calorimetric studies of alkanols in concentrated aqueous solutions of urea at 298 K, 3087

Coupled perturbed Hartree–Fock method
The sum of hyperpolarizabilities approach to third-order non-linear optical susceptibilities of π-conjugated polymer crystals, 3165

Coupling constant
Proximity effects on nuclear spin–spin coupling constants. Part 2.—The electric field effect on ^1J(CH) couplings, 3029

Covalent bonding
Crystal structure, magnetism and phase transformation in perovskites A_2CrNbO_6 (A = Ca, Sr, Ba), 1051

CO–water complex
FTIR studies of CO–water complexes in argon matrices and in porous ices, 4927

Critical autoignition centre
'Hot spots' and gasoline engine knock, 2959

Critical micelle concentration
Adsorption of mixed cationic–non-ionic surfactants at the air/water interface, 1773
Effects of fluorocarbon and hydrocarbon anionic micelles on the kinetics of water replacement in the palladium(II) aquocomplex of 1,1,7,7-tetraethyldiethylenetriamine by monoalkylthioureas, 2263

Crosslinking
^{11}B NMR studies on complexation of borate with linear and cross-linked polysaccharides, 651
Structure–reactivity studies on the crosslinking of poly(vinyl methyl ether) in aqueous solutions: A pulse radiolysis study, 4401

Crown ether
Investigation of transport across an immiscible liquid/liquid interface. Electrochemical and second harmonic generation studies, 1369
Preparation and crystallinity of a large unsubstituted crown ether, cyclic

heptacosa(oxyethylene) (*cyclo*-E_{27}, 81-crown-27), studied by Raman spectroscopy, X-ray scattering and differential scanning calorimetry, 3173
Chemistry of the calcination of 15-crown-5 and 18-crown-6 ethers occluded in faujasite polytype zeolites, 3281
NMR study of the ligand interchange of 18-crown-6 complexes with La^{3+}, Ca^{2+}, Pb^{2+} and Ba^{2+} ions in 70% methanol solution, 4391
Role of anions in the complex formation of crown ethers with ammonium ions chemically bonded on silica gel, 4977

Crystal growth
Effect of temperature on crystal growth and crystal properties of paracetamol, 439

Crystalline oligomer
Preparation and crystallinity of a large unsubstituted crown ether, cyclic heptacosa(oxyethylene) (*cyclo*-E_{27}, 81-crown-27), studied by Raman spectroscopy, X-ray scattering and differential scanning calorimetry, 3173

Crystallisation kinetics
Crystallisation kinetics in oil-in-water emulsions containing a mixture of solid and liquid droplets, 1213

Crystallography
Polymorphism, twinning and morphology of crystals of 2,4,6-trinitrotoluene grown from solution, 2107
Applied crystallography solutions to problems in industrial solid-state chemistry. Case examples with ceramics, cements and zeolites, 2187

Crystal morphology
Study of the effect of solvent on the morphology of crystals using molecular simulation: Application to α-resorcinol and *N*-*n*-octyl-D-gluconamide, 1023
Temperature coefficient of the potential of zero charge and entropies of formation for the interface of stepped faces of gold in contact with aqueous perchloric acid solutions, 3693

Crystal phase
EPR characterization of O^- and trapped electrons in 20% SrF_2/SmOF, 1793

Crystal structure
Subnitrides with the new cluster $Ba_{14}CaN_6$, 2117
Crystal structure, electric and magnetic behaviour of $Ce_2Pd_2Sb_3$, 2167
Crystal structure and non-linear optical properties of a novel half-open cubane-like cluster $[Et_4N]_3[WOS_3(CuI)_3(\mu_2\text{-}I)] \cdot H_2O$, 2343

CuO/SiO_2
IR study of CO adsorption on Cu-ZSM-5 and CuO/SiO_2 catalysts: σ and π components of the Cu^+—CO bond, 4595

Curie–Weiss
Structure and magnetism of hydronium jarosite, a model Kagomé antiferromagnet, 2161

Cyanide
Cyanide thermodynamics. Part 4.—Enthalpies and entropies of cyanide complexation of Cu^I, Ag^I, Zn^{II} and Cd^{II}, 641
G2 calculations on the thermochemistry of MgCN, MgNC and related species, 1135

Cyanomethylpyridinium
Mode-specific quantum rate effects for interfacial electron transfer: Computational case studies based upon 4-cyano-*N*-methylpyridinium reduction, 3909

Cyclic triphosphate
Hydrolysis of condensed phosphates in an anion-exchange resin, 3587

Cyclic voltammetry
Electrochemical response to anions in acetonitrile by neutral molecular receptors containing ferrocene, amide and amine moieties, 97
Cyclic voltammetric studies of vanadium in V molecular sieves, 473
Synthesis of *N*-(*n*-octyl)-*N'*-(i0-mercaptodecyl)-4,4'-bipyridinium dibromide and electrochemical behaviour of its monolayers on a gold electrode, 1001
Electrochemical, EPR and AM1 studies of acetylenic and ethylenic carotenoids, 1757
Orientation and electrocatalysis of riboflavin adsorbed on carbon substrate surfaces, 1913
Temperature coefficient of the potential of zero charge and entropies of formation for the interface of stepped faces of gold in contact with aqueous perchloric acid solutions, 3693
Structure sensitivity of irreversibly adsorbed tin on gold single-crystal electrodes in acid media, 3769
Calculation of cyclic voltammetric responses for the reductive formation of catalyst–substrate adducts on electrode surfaces, 3917
Anodic oxidation mechanism of a spiropyran, 3991
Electrochemical quartz crystal microbalance studies of the electropolymerization, electroactivity and complexing properties of poly(1,8-diaminonaphthalene) films, 4101

Cycloalkanols
Molecular recognition and effects of steric and geometric isomerism. Thermodynamic study of non-bonding interations in aqueous solutions of cycloalkanols, 1149

Cyclodextrin
Cyclodextrin effects on intramolecular charge transfer of 2-biphenylcarboxylic acid: A pre-twisted molecule, 29

Cyclodextrin derivative
Electrochemical and ^1H NMR studies on the complexation of hexacyanoferrate(II) anions by aminocyclodextrins, 645

Cyclohexane
Structure in microemulsions of di-chained surfactants, 65
Diffusion of cyclohexane and cyclopentane derivatives in some polar and non-polar solvents. Effect of intermolecular and intramolecular hydrogen-bonding interactions, 1863
Thermodynamics of ternary mixtures exhibiting tunnel phase behaviour. Part 1.—Cyclohexane–perdeuterocyclohexane–perfluorohexane, 2255

Cyclohexene
Frontier electronic structure in gas-phase epoxy and hydroxy cyclohexenes by means of photoelectron and electron transmission spectroscopies, 1447

Dealumination
Oxidation sites in dealuminated mordenite. A combined EPR, NMR and product distribution study, 2027
Investigation of acid properties of dealuminated H-mordenite zeolites by low-temperature diffuse reflectance FTIR, 2641
Catalytic studies with dealuminated Y zeolite. Part 3.–*n*-Hexane cracking, 2817

Decomposition
One-electron transfer reactions of some hydroxynaphthoquinones. Solvent and substitution effect as studied by pulse radiolysis, 1891
Pulse and γ-radiolysis of concentrated perchloric acid solutions, 2245

Defect structure
ENDOR investigation of S_2^-, SSe^- and Se_2^- defects in NaCl, 1579

Deflagration mode
'Hot spots' and gasoline engine knock, 2959

Dehydration
Dehydration of 4-methylpentan-2-ol over lanthanum and cerium oxides, 2619

Dehydrogenation
Effect of potassium addition to the TiO_2 support on the structure of V_2O_5/TiO_2 and its catalytic properties in the oxidative dehydrogenation of propane, 1609

Denaturation
Effect of osmoregulatory solutes on the thermal stability of calf-thymus DNA, 1361

Dendrimer modelling
A Monte Carlo study of model dendrimers, 4151

Density
Volumetric properties of aqueous solutions of ethylene glycol oligomers at 25 °C, 1163
Rheological and densitometric studies of poly(propylene oxide)–water mixtures over a range of temperatures, 1859
Ultrasonic speeds and volumetric properties of binary mixtures of water with 2-[2-(2-alkoxyethoxy)ethoxy]ethanols at 298.15 K, 2369
Formamide–(C_1–C_3) alkan-1-ols solvent systems, 3347

Density functional theory
Adsorption of atomic oxygen on the MgO (100) surface, 2075
Boron–nitrogen analogues of the fullerenes: The isolated-square rule, 2197
Calculation of proton affinities and absolute gas basicities of X_2 Group VI triatomics: A density functional study, 2681
C_8H_8: A density functional theory introducing the localised bond density, 3015
Computational study of the $CH_4 + OH \rightarrow CH_3 + H_2O$ reaction using *ab initio* and density functional theory methods, 3467
Investigation of the vibrational properties of CN^- on a Pt electrode by *in situ* VIS–IR sum frequency generation and functional density calculations, 3823
Density functional studies of carbonium ions, 4347

Density of states
Partition functions and densities of states for butane and pentane, 3509

Density profile
Simple model for liquid/liquid interfaces, 3839

Depletion interaction
Direct measurement of the depletion interaction in a charged colloidal dispersion, 4997

Desorption
Frequency-response NH_3 sorption study of acidic sites in H-ZSM-5 catalysts, 307

Destructuring agent
Preferential configurations in solution. Calorimetric study of ternary aqueous systems containing a destructuring agent and derivatives of α-amino acids at 298 K, 4215

Deswelling
Thermal and osmotic deswelling of poly(NIPAM) microgel particles, 3385

Detonation mode
'Hot spots' and gasoline engine knock, 2959

Deuteriated adsorbate
IR spectra of CH_4, CD_4, C_2H_4, C_2H_2, CH_3OH and CH_3OD adsorbed on C_{60} films, 2269

Deuteriation
Thermodynamics of ternary mixtures exhibiting tunnel phase behaviour. Part 1.—Cyclohexane–perdeuterocyclohexane–perfluorohexane, 2255

Deuterium
Deuterium NMR study of a probe molecule dissolved in a carbohydrate liquid crystal, 111

Deuterium isotope effect
Deuterium isotope effects on ^{31}P NMR parameters: Hydrogen bonding in a solid urea–phosphoric acid adduct, 5047

Diamond
FTIR studies on the spectral changes of the surface functional groups of ultradispersed diamond powder synthesized by explosive detonation after treatment in hydrogen, nitrogen, methane and air at different temperatures, 3401

Diatomic molecule
Excitation functions of cation formation in collisions of diatomic molecules with an ionic bond: CsCl + RbI, 1683

1,10-Dibromodecane
Structural and dynamic properties of the 1,10-dibromodecane/urea inclusion compound, investigated by variable-temperature powder X-ray diffraction, solid-state ^2H NMR lineshape analysis and solid-state ^2H NMR spin–lattice relaxation time measurements, 2179

Dichloropropene
Temperature dependence of the reactions of the nitrate radical with dichloroalkenes followed by LIF detection, 53

Dichromate
Study of the mechanism of oscillatory solid-phase combustion by a non-linear chemical kinetic model, 2971

Dielectric interface
Evanescent wave-induced fluorescence study of Rhodamine 101 at dielectric interfaces, 4723

Dielectric relaxation

Complex permittivity of a film of poly[4-(acryloxy)phenyl(4-chlorophenyl)methanone] containing free ion impurities and the separation of the contributions from interfacial polarization, Maxwell–Wagner–Sillars effects and dielectric relaxations of the polymer chains, 1947

Dielectric theory
Continuum and simple molecular approach to describe solvent polarity for real polar organic solvents, 637

Dielectric property
Molecular structure and physicochemical properties of acetone–chloroform mixtures, 3559

Differential capacitance
Interfacial solvent structure in butan-1-ol, butan-2-ol and 2-methylpropan-1-ol at Au and Ag electrodes from surface enhanced Raman scattering and capacitance measurements, 3683

Differential scanning calorimetry
Crystalline and amorphous phases in the binary system water–β,β-trehalose, 1337
Effect of osmoregulatory solutes on the thermal stability of calf-thymus DNA, 1361
Thermodynamics of the interations of some chloro-substituted alcohols with hen egg-white lysozyme, 1905
Influence of polar head groups on the gel to liquid-crystal transition in vesicular and lipid bilayer systems, 3163
Vitrification and structural relaxation of a water-swollen protein, wheat gluten and the thermodynamics of its water–protein ↔ ice equilibrium, 4521

Diffuse reflectance spectroscopy
Photophysics of cyanine dyes on surfaces. A new emission from aggregates of 2,2′-cyanines adsorbed onto microcrystalline cellulose, 1217

Diffusion
Effect of calcination on the structure of Ni/MgO catalyst: An X-ray diffraction study, 469
Diffusion of hydrogen in titanium, $Ti_{88}Al_{12}$ and Ti_3Al, 483
Study of carbon dioxide diffusion in zeolites with one- and three-dimensional channel networks by MD simulations and FR methods, 487
Diffusion coefficients of positronium in amorphous polymers, 985
Photochemistry in modified supercritical carbon dioxide. Effect of modifier concentration on diffusion probed by triplet–triplet energy transfer, 1467
Diffusion of cyclohexane and cyclopentane derivatives in some polar and non-polar solvents. Effect of intermolecular and intramolecular hydrogen-bonding interactions, 1863
Complex permittivity of a film of poly[4-(acryloxy)phenyl(4-chlorophenyl)methanone] containing free ion impurities and the separation of the contributions from interfacial polarization, Maxwell–Wagner–Sillars effects and dielectric relaxations of the polymer chains, 1947
Translational diffusion of a carbene and radicals derived from carbenes, 2361
ATR-FTIR spectroscopic studies of the structure and permeability of sulfonated poly(ether sulfone) membranes. Part 2.—Water diffusion processes, 2737
Spatial effects in the thermal runaway of combustible fluids in insulation materials, 2965
Experimental verification of a proposed unified formulation of adsorbate transport in mesoporous media over the full vapour pressure range, 3217
Isotope effect in the diffusion of hydrogen and deuterium in titanium, $Ti_{88}Al_{12}$ and Ti_3Al, 3407
Ternary mutual diffusion coefficients and densities of the system $\{z_1NaCl + (1 - z_1)Na_2SO_4\}$(aq) at 298.15 K and a total molarity of 0.5000 mol dm^{-3}, 4187
Binding and transport of Mo^V in perfluorinated ionomers by EPR and EPR imaging, 4239

Dihydrogen carbonate
Metastable intermediates from glassy solutions. Part 3.—FTIR spectra of α-carbonic acid and its ^2H and ^{13}C isotopic forms, isolated from methanolic solution, 3183
Metastable intermediates from glassy solutions. Part 4.—FTIR spectra of β-carbonic acid and its ^2H and ^{13}C isotopic forms, isolated from aqueous solution, 3197

Dimerization
Dependence of ethene dimerization activity and selectivity on Ni^{II} in ion-exchange *vs.* framework sites in SAPO-5 and SAPO-11 materials, 1429

Dimethyl disulfide
Kinetic studies of the reaction of Cl atoms with CH_3SSCH_3, 4905

Dimethyl sulfide
Rate coefficients for the room temperature reaction of Cl atoms with dimethyl sulfide and related alkyl sulfides, 369

Dimethyl sulfoxide
Attenuated total reflection Fourier-transform IR spectroscopic study of dimethyl sulfoxide self-association in acetonitrile solutions, 3333
Adsorption of DMSO at the free surface of water: Surface excesses and surface potential shifts in the low concentration range, 3873
Spectroscopic study of the solvation of dimethyl sulfoxide in aqueous acetonitrile and acetone solvent systems, 4395

Dimethyl telluride
Vibrational frequencies, vapour pressure and an assessment of the thermodynamic properties of dimethyl telluride, 973

Dinitrogen
Rotational spectrum and molecular properties of the dinitrogen–chlorine monofluoride complex, 2671

Dinitrogen pentaoxide
Photochemistry of dinitrogen pentaoxide in low-temperature matrices, 2347

Dinitrogen tetraoxide
Adsorption and photochemistry of dinitrogen tetraoxide on low temperature ice layers, 933

2,6-Dinitrophenol
Temperature dependence of dissociation constants for formic acid and 2,6-dinitrophenol in aqueous solutions up to 175 °C, 4951

Dinuclear complex
Energy transfer between lanthanide ions in dinuclear complexes, 1105

Dioxaborine ring
Second-order optical non-linearity of new 1,3,2(2*H*)-dioxaborine dyes, 945

Discharge-flow method
Kinetics of reactions between neutral free radicals. Rate constants for the reaction of CH radicals with N atoms between 216 and 584 K, 723

Discharge nozzle
A new discharge nozzle for spectroscopic studies in supersonic jets, 3023

Dislocations
Atomistic simulation of dislocations, surfaces and interfaces in MgO, 433

Dispersion capacity
The dispersion of molybdena on ceria, 4589

Disproportionation
Disproportionation of Cr^V generated by the radiation-induced reduction of Cr^{VI} in aqueous solution containing formate: A pulse radiolysis study, 4173
Thermodynamics of semiquinone disproportionation in aqueous buffer, 4965

Dissociation constant
Temperature dependence of dissociation constants for formic acid and 2,6-dinitrophenol in aqueous solutions up to 175 °C, 4951

Dissociative adsorption
Molecular beam studies of the interaction of oxygen with silver surfaces, 2319
An experimental and theoretical study of the interaction of CH_3OH and CH_3SH with ZnO, 3247

Disulfonated metallophthalocyanine
The photophysics of disulfonated metallophthalocyanines upon complexation with fluoride, 2689

DNA
Conformation and dynamics of the mispair O^6-ethylguanine:thymine, 1353
Effect of osmoregulatory solutes on the thermal stability of calf-thymus DNA, 1361

Docosanoic acid
Association of pure polar liquids: Dielectric properties of docosanoic acid, 3367

Dodecanol
Comparative adsorption study of dodecanol and cholesterol from ethylene glycol on the mercury electrode and air/solution interface, 3859

Domain growth
On a dynamic reaction–diffusion mechanism: The spatial patterning of teeth primordia in the alligator, 2927

Donnan equilibrium
Donnan equilibria of simple electrolytes in polyelectrolyte solutions, 3117
Donnan equilibria of simple electrolytes in polyelectrolyte solutions. Part 2.—Extension to polycations and the effect of charge densities, 4441

Dopant
Defect chemistry of $LaBO_3$ (B = Al, Mn or Co) perovskite-type oxides. Relevance to catalytic and transport behaviour, 479
Chemical transport in mixed conductors: Application to the model materials $SrTiO_3$ and ZrO_2, 2143

Double-charge-transfer spectroscopy
Double ionization of the *n*-alkyl iodides C_2H_5I, C_3H_7I and C_4H_9I, 3293

Double ionization
Double ionization of the *n*-alkyl iodides C_2H_5I, C_3H_7I and C_4H_9I, 3293

Double laser Doppler electrophoresis apparatus
Measurement of rise and electrophoretic velocities of gas bubbles, 3879
Electrophoretic behaviour of bubbles in aqueous electrolytes, 3887

3D quantum scattering calculation
Reaction dynamics for the $N(^2D) + H_2$ reaction, 1311

Droplet
Crystallization kinetics in oil-in-water emulsions containing a mixture of solid and liquid droplets, 1213

Drug molecule
^1H NMR investigation of self-association of aromatic drug molecules in aqueous solution. Structural and thermodynamical analysis, 383

Dual emission
Temperature effects on dual emission from ion pairs produced by excited-state proton transfer in the 1-naphthol–triethylamine system, 1481

Dye
Adsorption of Methylene Blue from aqueous solutions by amorphous aluminosilicate gels and zeolite X, 317
Structure of merocyanine dyes with a hydrocarbon chain studied by vibrational spectroscopy. Part 1.—Dependence of the solid-state structure upon the chain length, 413
Structure of merocyanine dyes with a hydrocarbon chain studied by vibrational spectroscopy. Part 2.—IR study in cast and Langmuir–Blodgett films, 419
Red-edge excitation fluorescence study of the inhomogeneous broadening of electronic transitions in solution, 629
Second-order optical non-linearity of new 1,3,2(2*H*)-dioxaborine dyes, 945
Photophysics of cyanine dyes on surfaces. A new emission from aggregates of 2,2′-cyanines adsorbed onto microcrystalline cellulose, 1217
Photochromism of naphthoxazine-spiro-indolines by direct excitation and following sensitisation by triplet-energy donors, 1323
Picosecond time-resolved spectroscopy of the photocolouration reaction of photochromic naphthoxazine-spiro-indolines, 1331
Activity analysis of a water oxidation catalyst immobilized in a polymer membrane, 2457
Effect of salt and solvents on the ionic solvation of *p*-toluidinonaphthalene sulfonate, 3097
Activity analysis of a water oxidation catalyst

adsorbed on an inorganic particle matrix, 3431
Photophysics of oxacyanine dyes on surfaces. Re-examination of the origins of the 'new emission' observed with laser excitation and high concentrations of adsorbed dyes, 4809
Effects of substituents in the polymethine chain on the photoprocesses in indodicarbocyanine dyes, 4917
Dynamical stereochemistry
Dynamical stereochemistry of bimolecular reactions, 881
Dynamics
IR study of the symmetric $\nu_s(PO_3^{2-})$ mode of 5′-CMP in H_2O solution. Relaxation of the phosphate group, 1111
Structural and dynamic properties of the 1,10-dibromodecane/urea inclusion compound, investigated by variable-temperature powder X-ray diffraction, solid-state ^2H NMR lineshape analysis and solid-state ^2H NMR spin–lattice relaxation time measurements, 2179
Dynamics of bimetallic Ni–Cu catalysts, 2291
Dynamic scaling
Dynamic scaling analysis of scanning force microscopy images of electrochemically formed polyaniline films in the oxidized form. Scale-dependent roughening kinetics, 4093
Electric behaviour
Crystal structure, electric and magnetic behaviour of $Ce_2Pd_9Sb_3$, 2167
Electric field
Fluid–fluid equilibrium of a mixture of non-polar and dipolar hard spheres in an applied field, 2709
Proximity effects on nuclear spin–spin coupling constants. Part 2.—The electric field effect on $^1J(CH)$ couplings, 3029
Electrified interface
New theoretical description of electrified interfaces, 3677
Electroactive polymer
Theory for solvent and salt transfer accompanying redox switching of electroactive polymers under permselective and non-permselective conditions. Part 1.—Complete redox switching, 4087
Electrocatalysis
Orientation and electrocatalysis of riboflavin adsorbed on carbon substrate surfaces, 1913
Electrocatalytic properties of spinel-type $Mn_xFe_{3-x}O_4$ synthesized below 100 °C for oxygen evolution in KOH solutions, 2397
New catalysts for oxygen reduction based on transition-metal sulfides, 4311
Electrochemical cell
Partial oxidation of C_2–C_4 alkanes into oxygenates using an Au | yttria-stabilized zirconia | Ag electrochemical reaction cell, 3579
Electrochemical communication
A study on the direct electrochemical communication between horseradish peroxidase and a poly(aniline) modified electrode, 3123
Electrochemical copolymerisation
Electrochemical copolymerisation of 5-substituted indoles, 4109
Electrochemical recognition
Electrochemical recognition of chloride ions by a poly[tris-(2,2′-bipyridine)ruthenium(II)] modified electrode, 1527
Electrochemical reduction
Mechanism of the electrochemical reduction of carbon dioxide at inert electrodes in media of low proton availability, 3963
Electrochemical removal
Electrochemical removal of NO and CH_4 in the presence of excess O_2, H_2O and CO_2 using Sm_2O_3-doped CeO_2 as a solid electrolyte, 4297
Electrochemical sensor
Electrochemical detection of halothane by adsorptive stripping voltammetry, 3669
Electrochemical shift
Adsorption of pyrazine on Au(111) and Ag(111) electrodes. An *ex situ* XPS study, 3785
Electrochemistry
Electrochemical response to anions in acetonitrile by neutral molecular receptors containing ferrocene, amide and amine moieties, 97
Electrochemical intercalation of lithium into vanadium pentaoxide: An *in situ* X-ray absorption study, 103
Mechanistic signatures in the oxidation of butan-1-ol at a rotating Pd disk in alkaline media from combining cyclic voltammetry with instabilities, 395
Electrochemical and ^1H NMR studies on the complexation of hexacyanoferrate(II) anions by aminocyclodextrins, 645
Synthesis of *N*-(*n*-octyl)-*N*′-(10-mercaptodecyl)-4,4′-bipyridinium dibromide and electrochemical behaviour of its monolayers on a gold electrode, 1001
Investigation of transport across an immiscible liquid/liquid interface. Electrochemical and second harmonic generation studies, 1369
Tetrakis(decyl)ammonium tetraphenylborate: A novel electrolyte for non-polar media, 1747
The phospha-2-allyl-system: Electrochemical and quantum chemical investigations, 1751
Synthesis of (La, Sr)CoO_3 perovskite films *via* a sol–gel route and their physicochemical and electrochemical surface characterization for anode application in alkaline water electrolysis, 2593
Electrochemical study of the interaction of thiourea with copper electrodes in alkaline aqueous solution, 2725
Surface electrochemical transformations on spinel iron oxide electrodes in aqueous solutions, 3371
Electrochemical investigations in supercritical carbon dioxide, 3895
Comparative study of the kinetics of two-dimensional condensation of thiourea at mercury/water and mercury/ethanol interfaces, 3935
An electrochemical study of the composition of thin, compact Pd oxide films, 4041
General aperiodic equivalent circuit for charge permeable thin-layer cells of symmetric or asymmetric types. Part 2.—Interfacial kinetics, 4987
A new approach to the measurement of transfer rates across immiscible liquid/liquid interfaces, 5177
Electrocrystallisation
In situ and real time X-ray diffraction study of an electrocrystallisation process: Ag electrodeposition on Au(111), 1277
A potential-pulse interference method for studies of the nucleation of a single silver centre on carbon microelectrodes, 2389
Electrode
Roughening of thin silver films in aqueous electrolytes, 2381
A potential-pulse interference method for studies of the nucleation of a single silver centre on carbon microelectrodes, 2389
Symmetry or asymmetry of k_{ET} and i_{STM} *vs.* potential curves, 3905
Electrode/electrolyte interface
Probing electrode/electrolyte interfacial structure in the potential region of hydrogen evolution by Raman spectroscopy, 3829
Electrodeposition
In situ and real time X-ray diffraction study of an electrocrystallisation process: Ag electrodeposition on Au(111), 1277
Induced adsorption of sulfate/bisulfate anions by submonolayer amounts of copper on deliberately stepped Pt surfaces, 3757
Electrodeposition of metallic gold clusters at the water/1,2-dichloroethane interface, 3865
Electrochemical reduction *vs.* vapour deposition for n-GaAs/Cu Schottky-barrier formation: A comparative study, 4069
Mechanistic aspects of the electrodeposition of stoichiometric CdTe on semiconductor substrates, 4077
In situ and real time X-ray diffraction study of interdiffusion at the Ag/Au(111) interface after electrolytic deposition, 4657
Electrode reaction
Calculation of cyclic voltammetric responses for the reductive formation of catalyst–substrate adducts on electrode surfaces, 3917
Electrolysis
Synthesis of (La, Sr)CoO_3 perovskite films *via* a sol–gel route and their physicochemical and electrochemical surface characterization for anode application in alkaline water electrolysis, 2593
Electrolyte
Ionic conduction of lithium and magnesium salts within laminar arrays in a smectic liquid-crystal polymer electrolyte, 2599
Transport phenomena and ion binding in poly(styrenesulfonate) solutions containing mixtures of two counter ions differing in charge and size, 3109
Donnan equilibria of simple electrolytes in polyelectrolyte solutions, 3117
Donnan equilibria of simple electrolytes in polyelectrolyte solutions. Part 2.—Extension to polycations and the effect of charge densities, 4441
Electrolyte interface
Evaluation of parasitic elements contributing to experimental cell impedance: Impedance measurements at interfaces between two immiscible electrolyte solutions, 3843
Electromotive force
Thermodynamics of the interaction of HCl with propan-2-ol in water at 278.15–338.15 K, 41
Thermodynamics of the interaction of HCl with *tert*-butyl alcohol in water at 278.15–318.15 K, 3361
'Primary' hydration numbers of the hydrohalic acids and equilibrium constants of their resolvation using the emf method, 4505
Electron capture
^{57}Fe emission Mössbauer study of electron capture after-effects in ^{57}Co-doped diaquadiformato complexes of the first transition series, 117
Electron donor–acceptor complex
Electron donor–acceptor complex of ICl with diethyl ether. He I photoelectron spectroscopy and *ab initio* molecular orbital study, 1677
Electronegativity
Consistent implementation of the electronegativity equalization method in molecular mechanics and molecular dynamics, 2469
Study of methane adsorption in MFI and MEL zeolites by combination of the electronegativity equalization method and molecular dynamics, 2475
Electron energy loss spectroscopy
Influence of metal–metal bonds on electron spectra of MoO_2 and WO_2, 2137
Structure of thin, ordered cyclohexane films on metal surfaces, 2611
Recent advances in electron energy loss spectroscopy of surface vibrations, 4771
Electron exchange
Intramolecular triplet energy transfer in alkyne-bridged Ru—Os multinuclear complexes: switching between dipole–dipole and electron-exchange mechanisms, 2223
Electron–hole recombination
Modelling of geminate annihilation in quasi-one-dimensional solids, 3391
Electronic property
Polaron effects on electronic properties of metal/medium interfaces. Part 1.—Uncharged metal/dielectric and metal/electrolyte interfaces, 3997
Polaron effects on electronic properties of metal/medium interfaces. Part 2.—Electrified interfaces: *in situ* second harmonic generation, 4005
Electronic structures and optical properties of LiB_3O_5, $Li_2B_4O_7$ and $KBe_2BO_3F_2$, 5073
Electronic spectroscopy
Red-edge excitation fluorescence study of the inhomogeneous broadening of electronic transitions in solution, 629
Influence of metal–metal bonds on electron spectra of MoO_2 and WO_2, 2137
Computation of the electronic structure and conduction properties of poly(pyrrole–isonaphthopyrrole) quasi-one-dimensional superlattices, 2281
Electronic structure
Computation of the electronic structure and conduction properties of poly(pyrrole–isonaphthopyrrole) quasi-one-dimensional superlattices, 2281

Designing of quasi-one-dimensional compositional superlattices of donor–acceptor polymers, 5017

Electronic transport
Theory of galvanostatic processes in mixed conductors with arbitrary electronic transport numbers, 1197

Electron irradiation
Electron-stimulated chemistry of CF_3I adsorbed on Ag(111). C—F bond cleavage and C—C coupling, 4739

Electron microscopy
Growth and properties of small Rh particles within an NaX matrix. Thermal analysis, electron microscopy, IR and photoelectron spectroscopy, 693

Electron paramagnetic resonance imaging
Binding and transport of Mo^V in perfluorinated ionomers by EPR and EPR imaging, 4239

Electron paramagnetic resonance spectroscopy
Evidence for different copper species in precursors of copper–cerium oxide catalysts for hydrogenation reactions. An X-ray diffraction, EPR and X-ray photoelectron spectroscopy study, 131
EPR and electron spin echo modulation spectroscopy of Cu^{II} ion species in Cu^{II}-exchanged K-L gallosilicate, 855
EPR study of X-irradiated hydroxyalkyl phosphate esters. Phosphate radical formation in polycrystalline glucose phosphate, ribose phosphate and glycerol phosphate salts at 77 and 295 K, 995
Effect of divalent cations on the formation and structure of calcium carbonate polymorphs, 1017
Spectroscopic studies of vanadium-substituted zeolitic silicates of MFI topology, 1067
Spectroscopic study of oxygen adsorption on CeO_2–γ-Al_2O_3 catalyst supports, 1619
Electrochemical, EPR and AM1 studies of acetylenic and ethylenic carotenoids, 1757
Reactions of conjugated dienes with nitrogen monoxide and dioxide, 1767
EPR characterization of O^- and trapped electrons in 20% SrF_2/SmOF, 1793
Magnetic properties of metal–quinone high-spin complexes prepared by solid-state mechano-activation and by chemical synthesis in solution. Comparative study with very high-field and low-temperature EPR and ENDOR, 1959
Oxidation sites in dealuminated mordenite. A combined EPR, NMR and product distribution study, 2027
Exact analytical solution for the powder pattern of orthorhombic-*g* systems. Predicted EPR powder spectrum and application to powder $TiO:Cr^{3+}$ in the rutile phase, 2303
Electron paramagnetic resonance of heterogeneous chromium catalysts, 2431
Characterization of Lewis-acid sites in zeolites by EPR using the NO molecule as a probe, 2495
Dynamics of spin-labelled α-chymotrypsin in reverse micelles of differently charged surfactants, 3151
Electron paramagnetic resonance (EPR) study of Cu^{2+} and Mn^{2+} ions interacting as probes with calcium carbonate during the transformation of vaterite into cubic calcite, 3211
Interaction of alkenes with CoAPO molecular sieves, 3453
Generation of ion-exchange capacity by silicon incorporation into the aluminophosphate VPI-5/$AlPO_4$-8 molecular sieve system, 3661
Configuration-dependent electron hopping between equivalent ligands in isomeric ruthenium(II) complexes, 4227
Structure, EPR and UV–VIS and IR spectroelectrochemistry of reversibly reducible compounds $[(C_5Me_5)IrCl(L)](PF_6)$, L = 1,3-dimethyllumazine or 1,3-dimethylalloxazine, 4233
Binding and transport of Mo^V in perfluorinated ionomers by EPR and EPR imaging, 4239
Manganese(II) in superlattices consisting of alternate cadmium telluride and zinc sulfide layers, 4247
Multi-frequency single-crystal and powder electron paramagnetic resonance spectroscopy of $[Cu_2(chp)_4]$(chp = 6-chloro-2-pyridonate), 4251
Investigation of vanadium phosphorus oxide catalysts (VPO) during toluene ammoxidation: New mechanistic insights by *in situ* EPR, 4257
Characterisation of VO_x/ZrO_2 catalysts by electron paramagnetic resonance and X-ray photoelectron spectroscopy, 4337
XPS and EPR study of high and low surface area CoO–MgO solid solutions: Surface composition and Co^{2+} ion dispersion, 4567

Electron pulse radiolysis
pK_a of the hydrazinium ion and the reaction of hydrogen atoms with hydrazine in aqueous solution, 2541

Electron transfer
Relaxation processes in the excited state of C_{60}–*o*-quinodimethane adducts, 377
Effect of changing the charge of an iron(II) chelate on electron transfer to a cobalt(III) complex-containing poly(methacrylic acid-co-styrenesulfonic acid) in aqueous solution, 409
Transient optical absorption and time-resolved resonance Raman experiments on covalently linked porphyrin–quinone systems, 949
Tris(bipyridine)ruthenium(II) photosensitized reduction of a macrocyclic cobalt(III) complex using phenol as a donor in aqueous acidic solutions, 969
Synthesis of *N*-(*n*-octyl)-*N'*-(10-mercaptodecyl)-4,4'-bipyridinium dibromide and electrochemical behaviour of its monolayers on a gold electrode, 1001
Corrigendum to Orbital symmetry effects in photoinduced bimolecular electron-transfer reactions, 1085
Effects of non-planarity and β-substitution on the singlet-excited-state properties of basket-handle porphyrins, 1095
Solvent effects on the $Co(NH_3)_4(pzCO_2)^{2+}$–$Fe(CN)_6^{4-}$ reaction. An interpretation based on spectroscopic data, 1155
H^- reaction pathways, 1281
One-electron transfer reactions of some hydroxynaphthoquinones. Solvent and substitution effect as studied by pulse radiolysis, 1891
Electrochemical investigations in supercritical carbon dioxide, 3895
Solvent effects in simple fast electron transfer reactions, 3899
Symmetry or asymmetry of k_{ET} and i_{STM} *vs.* potential curves, 3905
Mode-specific quantum rate effects for interfacial electron transfer: Computational case studies based upon 4-cyano-*N*-methylpyridinium reduction, 3909
Electron-transfer kinetics of ferrocene alkanethiolate monolayers in ether and polyether solvents, 3941
Electron transfer kinetics for weakly bonded, labile metal–ligand complexes, 3969
Inverted potentials in two-electron processes in organic electrochemistry, 3983
Configuration-dependent electron hopping between equivalent ligands in isomeric ruthenium(II) complexes, 4227
Intra-polymer electron-transfer reaction between partially quaternized poly(1-vinylimidazole) and a cobalt(II) Schiff-base complex: Effect of alkyl chain length, 4511

Electron transmission spectroscopy
Frontier electronic structure in gas-phase epoxy and hydroxy cyclohexenes by means of photoelectron and electron transmission spectroscopies, 1447

Electrooxidation
Anodic oxidation mechanism of a spiropyran, 3991
Electrooxidation of hypophosphite on single-crystal nickel electrodes: An *in situ* IR study, 4663

Electrophoretic mobility
Measurement of rise and electrophoretic velocities of gas bubbles, 3879
Electrophoretic behaviour of bubbles in aqueous electrolytes, 3887

Electropolymerization
Electrochemical quartz crystal microbalance studies of the electropolymerization, electroactivity and complexing properties of poly(1,8-diaminonaphthalene) films, 4101

Electroreduction
Calculation of cyclic voltammetric responses for the reductive formation of catalyst–substrate adducts on electrode surfaces, 3917
Use of isotopically labelled compounds for the *in situ* IR study of the electroreduction of CO_2 in aqueous hydrogencarbonate and buffered phosphate solutions, 3957

Electrosorption
Irreversibly adsorbed silver on Pt(111) and transformation of the electrosorption behaviour induced by thermal annealing, 3777

Electrostatic charge distribution
Photoinduced electron transfer between triethylamine and aromatic carbonyl compounds: The role of the nature of the lowest triplet state, 1689

Electrostatic modelling
Applications of realistic electrostatic modelling to molecules in complexes, solids and proteins, 2997

Electrostatic theory
Classical electrostatic theory and the molecular anisotropy of C_{70}, 3009

Ellipsometry
Physical characterization of non-ionic surfactant layers adsorbed at hydrophilic and hydrophobic solid surfaces by time-resolved ellipsometry, 531

Embedded nano-cluster
Embedding nano-clusters in siliceous faujasite, 2093

Emeraldine
In situ FTIR–attenuated total reflection spectroscopic investigations on the base–acid transitions of polyaniline. Base–acid transition in the emeraldine form of polyaniline, 3063

Emission Mössbauer spectroscopy
^{57}Fe emission Mössbauer study of electron capture after-effects in ^{57}Co-doped diaquadiformato complexes of the first transition series, 117

Emulsion
Crystallization kinetics in oil-in-water emulsions containing a mixture of solid and liquid droplets, 1213
Crystallisation of oil-in-water emulsions. Amphiphile directed nucleation in aqueous emulsions of *m*-chloronitrobenzene, 1927
Intercluster exchange rates in AOT water-in-oil microemulsions: Percolation, material transport mechanism and activation energy, 3145

Encapsulated ion
Application of classical electrostatic theory to the polarisation energy of encapsulated ions in C_{60}, 2519

Endohedral complex
Classical electrostatic theory and the molecular anisotropy of C_{70}, 3009

ENDOR spectroscopy
ENDOR investigation of S_2^-, SSe^- and Se_2^- defects in NaCl, 1579
Magnetic properties of metal–quinone high-spin complexes prepared by solid-state mechano-activation and by chemical synthesis in solution. Comparative study with very high-field and low-temperature EPR and ENDOR, 1959

Energetics
Energetics of fullerenes with heptagonal rings, 2203

Energy-dispersive diffractometry
Thermal decomposition of ettringite $Ca_6[Al(OH)_6]_2(SO_4)_3 \cdot 26H_2O$, 2125

Energy transfer
Photophysical triplet state processes of 4-*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 2.—Delayed $S_2 \rightarrow S_0$ fluorescence due to triplet–triplet annihilation, 741
Energy transfer between lanthanide ions in dinuclear complexes, 1105
Photochemistry in modified supercritical carbon dioxide. Effect of modifier concentration on diffusion probed by triplet–triplet energy

transfer, 1467
Electronic-energy migration and molecular rotation within bichromophoric macromolecules. Part 1.—Test of a model using bis(9-anthrylmethyl)phosphonate) bisteroid, 1563
Energy transfer and photodecomposition of anthracene laser dyes, 2685
Enthalpy
Corrigendum to Gibbs energies, entropies and enthalpies of transfer for divalent cations to several solvents, 1083
G2 calculations on the thermochemistry of MgCN, MgNC and related species, 1135
Additive bond-energy scheme for the calculation of enthalpies of formation of hydrocarbons including geminal H–H terms, 1141
Molecular recognition and effects of steric and geometric isomerism. Thermodynamic study of non-bonding interations in aqueous solutions of cycloalkanols, 1149
Prediction of the enthalpy of transfer of alkali-metal halides in binary mixtures, 2563
Adsorption of ethanoic acid on zeolites NaY and HY, 3647
Preferential configurations in solution. Calorimetric study of ternary aqueous systems containing a destructuring agent and derivatives of α-amino acids at 298 K, 4215
Additive bond energy scheme for the calculation of enthalpies of formation and bond dissociation energies for alkyl radicals, 4415
Aqueous solutions containing amino acids and peptides. Part 30.—The enthalpies of interaction of some alkali-metal halides with some amino acids at 25 °C, 4983
Entropy
Corrigendum to Gibbs energies, entropies and enthalpies of transfer for divalent cations to several solvents, 1083
Computer simulations of energetic and entropic changes of a single polymer chain under extension, 1375
Crystal and *pVT* data and thermodynamics of the phase transitions of 2-methyl-2-nitropropane, 1899
Adsorption of ethanoic acid on zeolites NaY and HY, 3647
Enzyme
Mixed-mode oscillations and homoclinic chaos in an enzyme reaction, 2857
Electroactivity, stability and application in an enzyme switch at pH 7 of poly(aniline)–poly(styrenesulfonate) composite films, 4137
Lipase-catalysed interfacial reactions in reverse micellar systems. Role of water and microenvironment in determining enzyme activity or dormancy, 4701
Epilayer surface
Rotation anisotropy by second harmonic generation of II–VI epilayers on a GaAs ⟨100⟩ substrate: Bare CMT and CdS on CMT, 4061
Epitaxial growth
Manganese(II) in superlattices consisting of alternate cadmium telluride and zinc sulfide layers, 4247
Epoxybutane
Cooperative association of diblock and triblock copolymers in aqueous solution. A study of mixed micelles of *block*-copoly(oxyethylene/oxybutylene) and *block*-copoly(oxybutylene/oxyethylene/oxybutylene), 257
Equation of motion
Stokesian sphere simulations of suspension rheology, 657
Equation of state
A simple model for size non-additive mixtures, 4943
Equilibrium
Photochemistry of 3,4′-dimethoxy-7-hydroxyflavylium chloride. Photochromism and excited-state proton transfer, 1693
Solution of the multiphase equilibrium problem for pure component, binary and ternary systems using the area method, 4419
Ethanoic acid
Adsorption of ethanoic acid on zeolites NaY and HY, 3647
Ethanol–water system
Molecular dynamics investigation of the surface/bulk equilibrium in an ethanol–water solution, 559
Ethene
Dependence of ethene dimerization activity and selectivity on Ni^{II} in ion-exchange *vs.* framework sites in SAPO-5 and SAPO-11 materials, 1429
IR spectra of CH_4, CD_4, C_2H_4, C_2H_2, CH_3OH and CH_3OD adsorbed on C_{60} films, 2269
Adsorption, desorption, monolayer structure and dynamics of C_2H_4 on Cu(001), 4749
Ethene adsorption
Adsorption and photochemistry of ethene on NaCl crystallites, 4853
Ethene polymerisation
FTIR study of the active ethene polymerisation catalyst, alumina-supported $C_6H_6Cr(CO)_3$, 4763
FTIR study of the adsorption of chromium carbonyl complexes on silica, 5093
Ether
Nature of the non-bonded (C—*H*)···O interaction of ethers $CH_3O—(CH_2)_n—OCH_3$ (n = 4–8), 4885
Ethidium bromide
Structural and thermodynamical analysis of molecular complexation by ^1H NMR spectroscopy. Intercalation of ethidium bromide with the isomeric deoxytetranucleoside triphosphates 5′-d(GpCpGpC) and 5′-d(CpGpCpG) in aqueous solution, 3545
Ethylation
Conformation and dynamics of the mispair O^6-ethylguanine:thymine, 1353
Ethylene glycol
Volumetric properties of aqueous solutions of ethylene glycol oligomers at 25 °C, 1163
Comparative adsorption study of dodecanol and cholesterol from ethylene glycol on the mercury electrode and air/solution interface, 3859
Ethylene oxide
Cooperative association of diblock and triblock copolymers in aqueous solution. A study of mixed micelles of *block*-copoly(oxyethylene/oxybutylene) and *block*-copoly(oxybutylene/oxyethylene/oxybutylene), 257
High-temperature oxidation of ethylene oxide in shock waves, 715
Ethyl radical
Vibrational behaviour of the carbon–muonium bond in the muonated ethyl radical, 2331
Ethyne
Evidence for a pre-reactive intermediate in a gaseous mixture of ethyne and chlorine monofluoride. Rotational spectrum of the Mulliken bπ · aσ complex $C_2H_2\cdots ClF$, 1291
Ion–molecule association of H_3O^+ and C_2H_2: Interstellar CH_3CHO, 1305
Ettringite
Thermal decomposition of ettringite $Ca_6[Al(OH)_6]_2(SO_4)_3\cdot 26H_2O$, 2125
Euler–Schläfli theorem
Symmetry generalisation of the Euler–Schläfli theorem for multi-shell polyhedra, 4877
Europium
Magnetic circular dichroism and optical absorption spectra of Eu^{3+} in $Y_3Al_5O_{12}$ (YAG), 2487
Europium(III)–lanthanide(III) chelate
Self-assembled heterodinuclear europium(III)–lanthanide(III) chelates of 2,6-bis[*N*,*N*-bis(carboxymethyl)aminomethyl]-4-benzoylphenol and their radiative $^5D_0 \rightarrow {}^7F_J$ transitions of Eu^{III}, 3321
Evanescent wave-induced fluorescence
Evanescent wave-induced fluorescence study of Rhodamine 101 at dielectric interfaces, 4723
EXAFS
Characterization of Pt–Sn/SiO_2 catalysts and the role of Sn in NO–hydrocarbon reactions, 461
Examination of the structure and melting behaviour of thin film *n*-alkanes using ultra-soft polarised near-edge X-ray absorption spectroscopy, 783
Application of EXAFS spectroscopy to probe structural properties of solid inclusion compounds containing halogenoalkane guest molecules within the *catena*-[(1,2-diaminopropane)cadmium(II) tetra-μ-cyanonickelate(II)] host structure, 1043
Mechanism of the catalytic oxidation of CO with O_2 on an Mo catalyst supported on silica and on bulk MoO_3, 1249
Extended X-ray absorption fine structure studies of the amorphous tungsten sulfides and selenides, WS_3, WSe_3 and WS_2, 2131
Influence of zirconium phosphate on the properties of $(VO)_2P_2O_7$ catalysts for the selective oxidation of *n*-butane to maleic anhydride, 3273
Effects of fine structure changes of strontium hydroxyapatites on ion-exchange properties with divalent cations, 4305
Excess molar volume
Excess volumes and isentropic compressibilities of pyrrolidin-2-one–alkanol (C_1–C_5) binary mixtures, 1167
Measurements and analysis of excess volumes of some alkan-2-one–1-chloroalkane mixtures using Nitta–Chao and Prigogine–Flory–Patterson models, 4453
Excess thermodynamic property
Formamide–(C_1–C_5) alkan-1-ols solvent systems, 3347
Study of experimental-to-McMillan–Mayer conversion of thermodynamic excess functions, 3519
Exchange kinetics
NMR study of the ligand interchange of 18-crown-6 complexes with La^{3+}, Ca^{2+}, Pb^{2+} and Ba^{2+} ions in 70% methanol solution, 4391
Excimer formation
Intramolecular excimer formation in diphenylsiloxane-based copolymers, 3593
Excitable medium
Cellular automaton model of three-dimensional excitable media, 2883
Excitation function
Excitation functions of cation formation in collisions of diatomic molecules with an ionic bond: CsCl + RbI, 1683
Excited oxygen
State-specific rate constants for the relaxation of $O_2(X\,^3\Sigma_g^-, v = 8–11)$ in collisions with O_2, N_2, NO_2, CO_2, N_2O, CH_4 and He, 193
Excited state
Phase-shift studies of ligand exchanges between *tert*-butyl alcohol and amines in excited mercury complexes in the gas phase, 729
Photophysical triplet state processes of 4-*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 1.—Temperature dependence of unimolecular triplet decay, 733
Photophysical triplet state processes of 4-*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 2.—Delayed $S_2 \rightarrow S_0$ fluorescence due to triplet–triplet annihilation, 741
Effects of non-planarity and β-substitution on the singlet-excited-state properties of basket-handle porphyrins, 1095
Photophysical triplet state processes of 4*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 3.—Excitation-wavelength dependence of luminescence quantum yields, 1101
J-dependent linewidths for the (110)–(000) band of the $\tilde{A}\,^1A''$–$\tilde{X}\,^1A'$ transition of HNO studied by cavity ring-down spectroscopy, 1283
Mass-selected detection of $N(^2D)$ by resonance-enhanced multiphoton ionization following two-photon dissociation of NO, 1315
Photochromism of naphthoxazine-spiro-indolines by direct excitation and following sensitisation by triplet-energy donors, 1323
Picosecond time-resolved spectroscopy of the photocolouration reaction of photochromic naphthoxazine-spiro-indolines, 1331
Pump–probe femtosecond-laser VUV REMPI technique applied to the study of highly excited states of allyl iodide, 1681
Photoinduced electron transfer between triethylamine and aromatic carbonyl compounds: The role of the nature of the lowest triplet state, 1689
Excited-state prototropic reactions of tetrahydroharmane, 2239

(*E*)-9-Styrylanthracene derivatives and their interactions with electron donors and acceptors. Fluorimetric and flash photolytic studies, 3315
(*E*)-9-Styrylanthracene derivatives and their interactions with electron donors and acceptors. Fluorimetric and flash photolytic studies, 3315
Self-assembled heterodinuclear europium(III)–lanthanide(III) chelates of 2,6-bis[*N*,*N*-bis(carboxymethyl)aminomethyl]-4-benzoylphenol and their radiative $^5D_0 \rightarrow {}^7F_J$ transitions of Eu^{III}, 3321
Unusual frequency increases of the C=C stretching mode of polyenes and of the Kekulé mode of benzene in S_1 states: Application of a simple valence bond model, 3481
Triplet state decay of some thioketones in solution, 3487
Polarization of the CaI* chemiluminescence from the $Ca^* + CH_3I \rightarrow CaI^* + CH_3$ reaction: Evidence for Hund's case (c) coupling, 3671
Multi-frequency single-crystal and powder electron paramagnetic resonance spectroscopy of $[Cu_2(chp)_4]$(chp = 6-chloro-2-pyridonate), 4251
Kinetic study of the reaction of Ru(a $^5F_3$) with N_2O and O_2 from 296 to 623 K, 4377

Excited-state proton transfer
Temperature effects on dual emission from ion pairs produced by excited-state proton transfer in the 1-naphthol–triethylamine system, 1481

Extension
Computer simulations of energetic and entropic changes of a single polymer chain under extension, 1375

Extraction
Electrochemical quartz crystal microbalance studies of the electropolymerization, electroactivity and complexing properties of poly(1,8-diaminonaphthalene) films, 4101

Fatty acid
Photophysical studies on a fluorescence probe labelled fatty-acid: Chain folding in a micellar environment, 2697

Faujasite
Heterogeneity of Si–OH–Al groups in HNaY zeolites, 499
Chemistry of the calcination of 15-crown-5 and 18-crown-6 ethers occluded in faujasite polytype zeolites, 3281
Diffuse reflectance laser photolytic studies of naphthalene, biphenyl and some aromatic hydrocarbons adsorbed in the cavities of faujasitic zeolites, 3653

Faulting
Prediction of template location *via* a combined Monte Carlo–simulated annealing approach, 2065

Femtosecond laser
Pump–probe femtosecond-laser VUV REMPI technique applied to the study of highly excited states of allyl iodide, 1681

Fermi contact
Proximity effects on nuclear spin–spin coupling constants. Part 2.—The electric field effect on ^1J(CH) couplings, 3029

Ferrite
Cation valence charge states of $MnFe_2O_4$: An *ab initio* Hartree–Fock study, 2043
Corrigendum to Cation valence charge states of $MnFe_2O_4$: An *ab initio* Hartree–Fock study, 4661

Ferrocene
Electrochemical response to anions in acetonitrile by neutral molecular receptors containing ferrocene, amide and amine moieties, 97

Ferrocene alkanethiolate monolayer
Electron-transfer kinetics of ferrocene alkanethiolate monolayers in ether and polyether solvents, 3941

Fick's law
Theory of galvanostatic processes in mixed conductors with arbitrary electronic transport numbers, 1197

Film
Long-wavelength dynamics of spread films of poly(methyl methacrylate) and poly(ethylene oxide) at the air/water interface, 601
New approaches to measure interfacial rheology of confined fluids, 619
Examination of the structure and melting behaviour of thin film *n*-alkanes using ultra-soft polarised near-edge X-ray absorption spectroscopy, 783
Crystal impedance: A new technique for monitoring the sol–gel process, 1079
Structure of thin, ordered cyclohexane films on metal surfaces, 2611
An electrochemical study of the composition of thin, compact Pd oxide films, 4041

Film ageing
Ageing of alkanethiol self-assembled monolayers, 4759

Film formation
Comparative study of the kinetics of two-dimensional condensation of thiourea at mercury/water and mercury/ethanol interfaces, 3935

Fire retardant
Synergistic effect of zeolite in an intumescence process: Study of the carbonaceous structures using solid-state NMR, 149
Synergistic effect of zeolite in an intumescence process. Study of the interactions between the polymer and the additives, 3435

Flame
Kinetics of dissociative recombination of H_3O^+ ions with free electrons in premixed flames, 707

Flash photolysis
(*E*)-9-Styrylanthracene derivatives and their interactions with electron donors and acceptors. Fluorimetric and flash photolytic studies, 3315
Mechanistic studies of the one-electron oxidation of water to hydroxyl radicals photosensitized by perfluorinated *p*-terphenyl, 3491

Flavylium cation
Photochemistry of 3,4′-dimethoxy-7-hydroxyflavylium chloride. Photochromism and excited-state proton transfer, 1693

Flexible chain
Simulation of adsorption of flexible chains: Concentration effects, 2275

Flip mechanism
Continuous chirality analysis of interconversion pathways of the water-trimer enantiomers, 2523

Flocculation
Phase separation in mixtures of polysaccharides and proteins, 4515

Flory distribution
Thermodynamics of alkanol–alkane systems. New modifications of the ERAS model, 1175
Microscopic theory of gelation: Distribution of cyclic species and theory of critical point, 2417
Corrigendum to Microscopy theory of gelation: Distribution of cyclic species and theory of critical point, 5185

Flow
Mesoporous membranes: thermo-osmotic and isothermal flows with and without capillary condensation, 235

Flow microcalorimetry
Dependence of the cooperativity of hydrophobic interactions on the nature of functional groups. A microcalorimetric study of binary aqueous solutions of α,ω-difunctional compounds at 298.15 K, 3093

Flow reactor
Dehydration of 4-methylpentan-2-ol over lanthanum and cerium oxides, 2619

Fluid–fluid equilibrium
Fluid–fluid equilibrium of a mixture of non-polar and dipolar hard spheres in an applied field, 2709

Fluorescence
Cyclodextrin effects on intramolecular charge transfer of 2-biphenylcarboxylic acid: A pre-twisted molecule, 29
Threshold photoelectron spectroscopy of BCl_3 and fragmentation of the valence electronic states of BCl_3^+, studied by coincidence spectroscopies, 185
Preferential solvation studied by the fluorescence lifetime of acridine in water–alcohol mixtures, 227
Relaxation processes in the excited state of C_{60}–*o*-quinodimethane adducts, 377
Red-edge excitation fluorescence study of the inhomogeneous broadening of electronic transitions in solution, 629
Photophysical triplet state processes of 4-*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 2.—Delayed $S_2 \rightarrow S_0$ fluorescence due to triplet–triplet annihilation, 741
Temperature effects on dual emission from ion pairs produced by excited-state proton transfer in the 1-naphthol–triethylamine system, 1481
Corrigendum to Threshold photoelectron spectroscopy of BCl_3 and fragmentation of the valence electronic states of BCl_3^+, studied by coincidence spectroscopies, 1819
Excited-state prototropic reactions of tetrahydroharmane, 2239
Intramolecular deactivation of photoexcited anthracenes by aromatic ketones. Part 2.—Charge-transfer deactivation of ω-(9-anthryl)ketones in different solvents and binary solvent mixtures and at different temperatures, 3043
Possibility of ring opening and closure with pyrylium ions under laser excitation, 3051
Effect of salt and solvents on the ionic solvation of *p*-toluidinonaphthalene sulfonate, 3097
(*E*)-9-Styrylanthracene derivatives and their interactions with electron donors and acceptors. Fluorimetric and flash photolytic studies, 3315
Solvent effects on the fluorescence quenching rate constant of an intramolecular exciplex by poly(chlorobenzenes), 3327
Photoionization of aniline in aqueous solution and its photolysis in cyclohexane, 4177
Rotational dynamics of lipid–detergent mixtures probed by a cyanine dye: A mechanism for vesicle formation, 4279
Conspicuous absorption and fluorescence spectroscopic properties of 3,3′-dihydroxy-2,2′-bipyridines in solution, 4909

Fluorescence anisotropy
Electronic-energy migration and molecular rotation within bichromophoric macromolecules. Part 1.—Test of a model using bis(9-anthrylmethylphosphonate) bisteroid, 1563

Fluorescence emission
Shape of acid–base fluorescence emission titration curves in the presence of buffer and quenching effects, 957

Fluorescence probe
Photophysical studies on a fluorescence probe labelled fatty-acid: Chain folding in a micellar environment, 2697

Fluorescence quenching
Physical properties of cetylpyridinium chloride micelles (CPyCl) and their behaviour as reaction media, 59
Fluorescence quenching and complexation behaviour of tetraphenylporphyrin with some divalent metal ions, 747
Effects of non-planarity and β-substitution on the singlet-excited-state properties of basket-handle porphyrins, 1095
(*E*)-9-Styrylanthracene derivatives and their interactions with electron donors and acceptors. Fluorimetric and flash photolytic studies, 3315
Solvent effects on the fluorescence quenching rate constant of an intramolecular exciplex by poly(chlorobenzenes), 3327

Fluorescence spectroscopy
Synthesis of hybrid metal–semiconductor ultrafine particles. Photochemical deposition of silver on a ZnO colloid surface, 1555
Effects of substituents in the polymethine chain on the photoprocesses in indodicarbocyanine dyes, 4917

Fluoride
The photophysics of disulfonated metallophthalocyanines upon complexation with fluoride, 2689
Magneto-optical constants of fluoride optical crystals and other AB_2 and A_2B type compounds, 2753
X-Ray photoelectron spectroscopy of Cu^{3+} in NaK_2CuF_6, 3605

Fluorinated thiophenol
Surface modification of CdS quantum dots with fluorinated thiophenol, 4575

Fluorine ion
Characterization of SAPO-11 synthesized conventionally and in the presence of fluoride ions, 2017
^{19}F NMR spectroscopy
^{7}Li nuclear magnetic spin–lattice relaxation investigation of lithium trifluoromethanesulfonate and its complex with poly(ethylene oxide), 5043
Foam
Surface viscoelasticity of a foam-forming solution, 611
Force-balance model
Direct measurement of the depletion interaction in a charged colloidal dispersion, 4997
Force field
Molecular mechanics force field for tertiary carbocations, 353
Rotational spectrum of the isotopically substituted van der Waals complex Ar–CO_2 investigated with a molecular beam Fourier transform microwave spectrometer, 901
Formaldehyde
The rotational constant A_0 and planarity of the hydrogen-bonded complex $H_2CO\cdots HCl$, 2677
Formamidealkan-1-ol mixture
Formamide–(C_1–C_3) alkan-1-ols solvent systems, 3347
Formic acid
Spectroscopic and kinetic studies of formic acid adsorption on Cu(110), 4683
Temperature dependence of dissociation constants for formic acid and 2,6-dinitrophenol in aqueous solutions up to 175 °C, 4951
Fourier transform
Evidence for a pre-reactive intermediate in a gaseous mixture of ethyne and chlorine monofluoride. Rotational spectrum of the Mulliken bπ · aσ complex $C_2H_2\cdots ClF$, 1291
Framework aluminium
State of aluminium in hydrothermally dealuminated MFI zeolite, 1647
Framework site
Dependence of ethene dimerization activity and selectivity on Ni^{II} in ion-exchange *vs.* framework sites in SAPO-5 and SAPO-11 materials, 1429
Small-pore aluminium phosphate molecular sieves with chabazite structure. Incorporation of magnesium in structures -34 and -44, 2481
Free radical
Kinetic studies of the allylperoxyl radical self-reaction and reaction with HO_2, 201
Kinetics of dissociative recombination of H_3O^+ ions with free electrons in premixed flames, 707
Kinetics of reactions between neutral free radicals. Rate constants for the reaction of CH radicals with N atoms between 216 and 584 K, 723
EPR study of X-irradiated hydroxyalkyl phosphate esters. Phosphate radical formation in polycrystalline glucose phosphate, ribose phosphate and glycerol phosphate salts at 77 and 295 K, 995
Pulse radiolysis study of the reaction of $SO_5^{\bullet-}$ with $HO_2^{\bullet}$, 1287
Kinetics of the OH + C_2H_2 reaction in the presence of O_2, 1459
Reactions of conjugated dienes with nitrogen monoxide and dioxide, 1767
Is the reaction between $CH_3C(O)O_2$ and NO_2 important in the night-time troposphere?, 2211
Arrhenius parameter determination for the reaction of the oxide radical, hydrated electron and hydroxyl radical with iodate in aqueous solution, 2251
Kinetics and spectral characteristics of transient species formed on one-electron oxidation of acridine-1,8-dione in aqueous solution. Pulse radiolysis study, 2353
Translational diffusion of a carbene and radicals derived from carbenes, 2361
pK_a of the hydrazinium ion and the reaction of hydrogen atoms with hydrazine in aqueous solution, 2541
Translational diffusion of chemically stable and reactive radicals in solution, 3057
Kinetics and thermochemisty of the R + HBr ⇌ RH + Br (R = CH_2Cl, $CHCl_2$, CH_3CHCl or CH_3CCl_2) equilibrium, 3069
Kinetics of the self-reaction of CF_2 radical and its reaction with H_2, O_2, CH_4 and C_2H_4 over the temperature range 295–873 K, 3305
FTIR studies of the NO_3 initiated degradation of but-2-yne: Mechanism and rate constant determination, 3459
Identification of an unexpected peroxide formed by successive isomerization reactions of the *n*-butoxy radical in oxygen, 4167
Structure, EPR and UV–VIS and IR spectroelectrochemistry of reversibly reducible compounds $[(C_5Me_5)IrCl(L)](PF_6)$, L = 1,3-dimethyllumazine or 1,3-dimethylalloxazine, 4233
Muonium adduct of benzaldehyde: A novel probe of cation–molecule interactions in zeolite catalysts and of solvation and electronic substituent effects, 4265
Fries Kekulé structure
Leapfrog, Fries, Clar and phason-line-free fullerenes, 3673
Frontal polymerization
Free-radical frontal polymerization: Self-propagating thermal reaction waves, 2825
FTIR–photoacoustic spectroscopy
Characterization and quantification of the NH_3 modification of a BCl_3-treated silica gel surface, 679
FTIR spectroscopy
ν_2 Band region of nitrate as an indicator for contact ion pairing in aqueous lithium and calcium nitrate solutions, 23
Studies of the selective reduction of nitric oxide by carbon monoxide in the presence and absence of hydrogen over Au/NaY catalysts, 301
In situ FTIR study of charge conduction in a poly(3-methylthiophene)–poly({1-[2-(3-thienyl) ethyl]-1,4,8,11-tetraazacyclotetradecane}nickel(II) perchlorate) copolymer film, 773
Surface chemical heterogeneity of pillared hydrotalcites, 1243
Pyridine and ammonia as probes for FTIR analysis of solid acid catalysts, 1401
FTIR studies on the selective oxidation and combustion of light hydrocarbons at metal oxide surfaces. Part 2.—Propane and propene oxidation on Co_3O_4, 1587
Spectroscopic study of oxygen adsorption on CeO_2–γ-Al_2O_3 catalyst supports, 1619
Surface silanol groups of mesoporous silica FSM-16, 1985
Surface characterization of modified aluminas. Part 4.—Surface hydration and Lewis acidity of CeO_2–Al_2O_3 systems, 1991
High nuclearity Pt carbonyls in alkali-metal X zeolites, 2035
Photochemistry of dinitrogen pentaoxide in low-temperature matrices, 2347
Investigation of acid properties of dealuminated H-mordenite zeolites by low-temperature diffuse reflectance FTIR, 2641
In situ FTIR–attenuated total reflection spectroscopic investigations on the base–acid transitions of polyaniline. Base–acid transition in the emeraldine form of polyaniline, 3063
Metastable intermediates from glassy solutions. Part 3.—FTIR spectra of α-carbonic acid and its ^2H and ^{13}C isotopic forms, isolated from methanolic solution, 3183
Metastable intermediates from glassy solutions. Part 4.—FTIR spectra of β-carbonic acid and its ^2H and ^{13}C isotopic forms, isolated from aqueous solution, 3197
FTIR studies on the spectral changes of the surface functional groups of ultradispersed diamond powder synthesized by explosive detonation after treatment in hydrogen, nitrogen, methane and air at different temperatures, 3401
FTIR studies of the NO_3 initiated degradation of but-2-yne: Mechanism and rate constant determination, 3459
Geometry and molecular parameters of 3,4-bis(dimethylamino)-3-cyclobutene-1,2-dione and its isomer bis(dimethylamino)squaraine. Combined study by IR spectroscopy, XRD and *ab initio* MO calculations, 3611
Adsorption of ethanoic acid on zeolites NaY and HY, 3647
Use of isotopically labelled compounds for the *in situ* IR study of the electroreduction of CO_2 in aqueous hydrogencarbonate and buffered phosphate solutions, 3957
An FTIR study of surface ceria hydroxy groups during a redox process with H_2, 4669
UV reflectance and FTIR spectroscopic studies of CO adsorption and reaction on lanthanum oxide, 4675
IR study of alkene allylic activation on magnesium ferrite and alumina catalysts, 4687
FTIR studies of CO–water complexes in argon matrices and in porous ices, 4927
FTIR investigation of the co-adsorption of acetonitrile and carbon monoxide on Cu-ZSM-5, 5165
FT-Raman spectroscopy
FT-Raman spectroscopic study of ionic association and solvation in acrylonitrile solutions of calcium and magnesium perchlorate, 1187
Fullerene
Formation of radical adducts of C_{60} with alkyl and halo-alkyl radicals. Transient absorption and emission characteristics of the adducts, 941
Energetics of fullerenes with heptagonal rings, 2203
Application of classical electrostatic theory to the polarisation energy of encapsulated ions in C_{60}, 2519
Classical electrostatic theory and the molecular anisotropy of C_{70}, 3009
Leapfrog, Fries, Clar and phason-line-free fullerenes, 3673
G2 procedure
G2 calculations on the thermochemistry of MgCN, MgNC and related species, 1135
Gallium
Solution equilibria of gallium(III) and indium(III) complexes with halide and thiocyanate ions in *N*,*N*-dimethylformamide, 2715
Gallium arsenide
Electrochemical reduction *vs.* vapour deposition for n-GaAs/Cu Schottky-barrier formation: A comparative study, 4069
Galloaluminosilicate
Synthesis and characterization of the mesoporous galloaluminosilicate molecular sieve MCM-41, 289
Gallosilicate
EPR and electron spin echo modulation spectroscopy of Cu^{II} ion species in Cu^{II}-exchanged K-L gallosilicate, 855
Galvanostatic pulse plating
Galvanostatic pulse and pulse reverse plating of zinc–nickel alloys from sulfate electrolytes on a rotating disc electrode, 4021
Ganglioside
Intermicellar interaction of ganglioside aggregates and structural stability on pH variation, 4533
Garnet
Magnetic circular dichroism and optical absorption spectra of Eu^{3+} in $Y_3Al_5O_{12}$ (YAG), 2487
Gas basicity
Calculation of proton affinities and absolute gas basicities of X_3 Group VI triatomics: A density functional study, 2681
Gas bubble
Measurement of rise and electrophoretic velocities of gas bubbles, 3879
Electrophoretic behaviour of bubbles in aqueous electrolytes, 3887
Gas chromatography–mass spectrometry
Separation of hexane isomers on zeolites mordenite and beta, 143
Formation of carbon clusters C_n ($1 \leqslant n \leqslant 4$) by laser vaporization of graphite and a study of their chemical reactivity by gas chromatography–mass spectrometry, 1831
Gas mixture
Fluid–fluid equilibrium of a mixture of non-polar and dipolar hard spheres in an applied field, 2709
Gasoline engine knock

'Hot spots' and gasoline engine knock, 2959
Gas-phase kinetics
Time-resolved study of the transients produced in the CO_2 and ArF laser flash photolysis of gaseous silacyclobutane and 1,3-disilacyclobutane, 179
State-specific rate constants for the relaxation of $O_2(X\ ^3\Sigma_g^-, v = 8–11)$ in collisions with O_2, N_2, NO_2, CO_2, N_2O, CH_4 and He, 193
Rate coefficients for the room temperature reaction of Cl atoms with dimethyl sulfide and related alkyl sulfides, 369
Kinetics of reactions between neutral free radicals. Rate constants for the reaction of CH radicals with N atoms between 216 and 584 K, 723
Kinetic study of the Cu(^{2}S) atom reaction with chlorine ($^1\Sigma_g^+$) at 305–809 K, 1455
Kinetics of the OH + C_2H_2 reaction in the presence of O_2, 1459
Corrigendum to Time-resolved study of the transients produced in the CO_2 and ArF laser flash photolysis of gaseous silacyclobutane and 1,3-disilacyclobutane, 2503
Kinetic study of the reaction of Ru(a $^5F_5$) with N_2O and O_2 from 296 to 623 K, 4377
Gas-phase oxidation
Effect of alkali-metal promoter on silica-supported copper catalysts in benzyl alcohol oxidation, 2631
Gas-phase reaction
Rate constants for removal of CH(D) (v = 0 and 1) by collisions with N_2, CO, O_2, NO and NO_2 at 298 K and with CO_2 at 296 ⩽ T/K ⩽ 873, 2335
Gas-sensitive resistor
Room-temperature response of platinised tin dioxide gas-sensitive resistors, 3411
Gas sensor
Resolving combustible gas mixtures using gas sensitive resistors with arrays of electrodes, 4497
GC headspace analysis
Thermodynamic study of complex formation by hydrogen bonding in halogenoalkane–oxygenated solvent mixtures. Halothane with propyl ether, isopropyl ether, 1,4-dioxane and 2,5-dioxahexane, 1877
Gel
Synthesis and characterization of large-pore molecular sieves CoSAPO-36 and CoSAPO-46, 1257
Gelatin
Small-angle neutron scattering studies of sodium dodecyl sulfate interactions with gelatin. Part 2.—Effect of temperature and pH, 595
Gelation
Crystal impedance: A new technique for monitoring the sol–gel process, 1079
Microscopic theory of gelation: Distribution of cyclic species and theory of critical point, 2417
Corrigendum to Microscopy theory of gelation: Distribution of cyclic species and theory of critical point, 5185
Gel–liquid crystal transition
Influence of polar head groups on the gel to liquid-crystal transition in vesicular and lipid bilayer systems, 3163
Gel phase chromatography
Effect of cyclisation on the self-association behaviour of block copolymers in aqueous solution. Comparison of oxyethylene/oxybutylene block copolymers *cyclo*-$B_{27}E_{144}$ and $E_{72}B_{27}E_{72}$, 5021
Geminate annihilation
Modelling of geminate annihilation in quasi-one-dimensional solids, 3391
Gibbs energy
Calculation of one-electron reduction potentials for nitroheterocyclic hypoxia-selective agents, 763
Corrigendum to Gibbs energies, entropies and enthalpies of transfer for divalent cations to several solvents, 1083
Solvent effects on the $Co(NH_3)_4(pzCO_2)^{2+}$–$Fe(CN)_6^{4-}$ reaction. An interpretation based on spectroscopic data, 1155
Prediction of the enthalpy of transfer of alkali-metal halides in binary mixtures, 2563
Preferential solvation in binary mixtures. Comparison between the quasi-lattice quasi-chemical model and the stepwise solvent exchange model, 2569
Transfer Gibbs energies for ClO_3^-, BrO_3^-, IO_3^-, ClO_4^- and IO_4^- anions for water–methanol and water–propan-2-ol mixtures: Some quantum-chemical aspects of ionic solvation, 4935
Glass
Conductivity of maltose–water–KCl mixtures in the supercooled liquid and glassy states, 1921
Crystal, melted and glassy states of glucose. A molecular dynamics simulation, 2285
Glass transition
Photochromism of naphthoxazine-spiro-indolines by direct excitation and following sensitisation by triplet-energy donors, 1323
Crystalline and amorphous phases in the binary system water–β,β-trehalose, 1337
Conductivity of maltose–water–KCl mixtures in the supercooled liquid and glassy states, 1921
Global potential
Global potentials for calcium and strontium solids, 425
Glucose crystal
Crystal, melted and glassy states of glucose. A molecular dynamics simulation, 2285
Glucose oxidase
'Wiring' of glucose oxidase and lactate oxidase within a hydrogel made with poly(vinyl pyridine) complexed with $[Os(4,4'\text{-dimethoxy-}2,2'\text{-bipyridine})_2Cl]^{+/2+}$, 4131
Gluten
Vitrification and structural relaxation of a water-swollen protein, wheat gluten and the thermodynamics of its water–protein ↔ ice equilibrium, 4521
Gold
Imaging nanosized gold colloids by atomic force microscopy: A direct comparison with transmission electron microscopy, 3137
Template preparation of nanoelectrode ensembles. Achieving the 'pure-radial' electrochemical-response limiting case, 4029
Adsorption of carbon monoxide on the gold(332) surface, 4829
Gold cluster
Electrodeposition of metallic gold clusters at the water/1,2-dichloroethane interface, 3865
Gold electrode
Synthesis of *N*-(*n*-octyl)-*N'*-(10-mercaptodecyl)-4,4'-bipyridinium dibromide and electrochemical behaviour of its monolayers on a gold electrode, 1001
Electrochemical detection of halothane by adsorptive stripping voltammetry, 3669
Interfacial solvent structure in butan-1-ol, butan-2-ol and 2-methylpropan-1-ol at Au and Ag electrodes from surface enhanced Raman scattering and capacitance measurements, 3683
^{36}Cl labelling and electrochemical study of chloride adsorption on a gold electrode from perchloric acid media, 3727
Electrochemical and second harmonic generation study of bromide adsorption at the Au(111) electrode surface, 3737
Adsorption of benzenesulfonate anions at an Au(111) electrode: Application to study of the reconstruction phenomenon of the Au(100) surface, 3763
Structure sensitivity of irreversibly adsorbed tin on gold single-crystal electrodes in acid media, 3769
Adsorption of pyrazine on Au(111) and Ag(111) electrodes. An *ex situ* XPS study, 3785
Measuring surface stress induced by electrode processes using a micromechanical sensor, 3807
Electrochemical *in situ* FT-IRRAS studies of a self-assembled monolayer of 2-(11-mercaptoundecyl)hydroquinone, 3813
Gold–water interaction
Temperature coefficient of the potential of zero charge and entropies of formation for the interface of stepped faces of gold in contact with aqueous perchloric acid solutions, 3693
Gouy–Chapman theory
New theoretical description of electrified interfaces, 3677
Grafting
$FeSbO_4$ phase formed at the surface of antimony(v) oxide grafted on silica gel, 1569
Graphite
Using computer simulation to study the properties of molecules in micropores, 1
Graph theory
Topological indices and graph polynomials of some macrocyclic belt-shaped molecules, 625
Gray–Scott reaction
Parallel Gray–Scott reactions in a stirred vessel, 2839
Grazing-incidence FTIR spectroscopy
Adsorption and photochemistry of dinitrogen tetraoxide on low temperature ice layers, 933
Grazing-incidence X-ray diffraction
Structural studies of semifluorinated hydrocarbon monolayers at the air/water interface, 545
Ground-state rotational spectroscopy
Evidence for a pre-reactive intermediate in a gaseous mixture of ethyne and chlorine monofluoride. Rotational spectrum of the Mulliken bπ · aσ complex $C_2H_2\cdots ClF$, 1291
Group contribution theory
Thermodynamic properties of *n*-alcohol–*n*-alkane mixtures. A comparative study of some group contribution theories, 3565
Group VI
Calculation of proton affinities and absolute gas basicities of X_3 Group VI triatomics: A density functional study, 2681
***O*^{6}-Guanine**
Conformation and dynamics of the mispair *O*^{6}-ethylguanine:thymine, 1353
Thermodynamic investigation of the effect of the mutual miscibility of some higher alkanols and water on the partitioning and solubility of some guanine derivatives, 1721
Guest molecule
Proton magnetic resonance of C_nH_{2n+2} (n = 1–4) adsorbed in mordenite. Dynamic behaviour and host–guest interaction, 1039
Application of EXAFS spectroscopy to probe structural properties of solid inclusion compounds containing halogenoalkane guest molecules within the *catena*-[(1,2-diaminopropane)cadmium(II) tetra-μ-cyanonickelate(II)] host structure, 1043
H_3O^+
Ion–molecule association of H_3O^+ and C_2H_2: Interstellar CH_2CHO, 1305
Haemoglobin
Effect of A3[6]$\beta^{Glu\rightarrow Val}$ mutation on reactivity of the CysF9[93]β sulfhydryl group of human haemoglobin S, 1739
Halide
Solution equilibria of gallium(III) and indium(III) complexes with halide and thiocyanate ions in *N*,*N*-dimethylformamide, 2715
Halogenoalkane
Characterization of *gauche* end-groups in α,ω-dibromoalkanes: vibrational properties of the 1,6-dibromohexane/urea inclusion compound, 267
Temperature-dependent structural properties of the chlorocyclohexane/thiourea inclusion compound investigated by synchrotron X-ray powder diffraction, 273
Application of EXAFS spectroscopy to probe structural properties of solid inclusion compounds containing halogenoalkane guest molecules within the *catena*-[(1,2-diaminopropane)cadmium(II) tetra-μ-cyanonickelate(II)] host structure, 1043
Thermodynamic study of complex formation by hydrogen bonding in halogenoalkane–oxygenated solvent mixtures. Halothane with propyl ether, isopropyl ether, 1,4-dioxane and 2,5-dioxahexane, 1877
Halopropene
Kinetic study of the reactions of NO_3 with 3-chloropropene, 3-bromopropene and 3-iodopropene using LIF detection, 4385

Halothane
Electrochemical detection of halothane by adsorptive stripping voltammetry, 3669
Hard-sphere model
Excitation functions of cation formation in collisions of diatomic molecules with an ionic bond: CsCl + RbI, 1683
Hartree–Fock theory
Cation valence charge states of $MnFe_2O_4$: An *ab initio* Hartree–Fock study, 2043
Corrigendum to Cation valence charge states of $MnFe_2O_4$: An *ab initio* Hartree–Fock study, 4661
Nature of the non-bonded (C—H)···O interaction of ethers $CH_3O—(CH_2)_n—OCH_3$ (n = 4–8), 4885
H-atom photofragment translational spectroscopy
Near-UV photolysis of methylamine studied by H-atom photofragment translational spectroscopy, 4897
Heat capacity
Ionic partial molar heat capacities in non-aqueous solvents, 757
Heat resistance
Heat resistance of a shock-synthesized B–C–N heterodiamond, 5067
Helical configuration
Small-angle scattering study of aqueous gels of sodium lithocholate, 3157
Helium
A method to calculate vibrational frequency shifts in heteroclusters: Application to N_2^+–He_n, 11
α-Helix
Vibrational Raman optical activity of α-helical and unordered poly-L-lysine, 1503
Helmholtz layer
Interpretation and use of Mott–Schottky plots at the semiconductor/electrolyte interface, 4083
Hemiacetal
Photochemistry of 3,4′-dimethoxy-7-hydroxyflavylium chloride. Photochromism and excited-state proton transfer, 1693
Hen egg-white lysozyme
Thermodynamics of the interations of some chloro-substituted alcohols with hen egg-white lysozyme, 1905
Heptagonal faced carbon cage
Energetics of fullerenes with heptagonal rings, 2203
Heterocluster
A method to calculate vibrational frequency shifts in heteroclusters: Application to N_2^+–He_n, 11
Heterodiamond
Heat resistance of a shock-synthesized B–C–N heterodiamond, 5067
Heterogeneous catalysis
Compensation behaviour in the hydrogenation of benzene, toluene and *o*-xylene over Ni/SiO_2. Determination of true activation energies, 1413
Structure-sensitivity study of partial propene oxidation over $AV_2P_2O_{10}$ vanadium phosphate compounds, 1423
Combined Raman and IR study of MO_x–V_2O_5/Al_2O_3 (MO_x = MoO_3, WO_3, NiO, CoO) catalysts under dehydrated conditions, 3259
Selective catalytic reduction of nitric oxide with ammonia on vanadia/alumina catalysts. Influence of vanadia loading and secondary metal oxide additives, 3267
Structure and catalysis of cobalt oxide overlayers prepared on zirconia by low-temperature-plasma oxidation, 3425
IR study of alkene allylic activation on magnesium ferrite and alumina catalysts, 4687
Reaction pathways of propane and propene conversion in the presence of NO and O_2 on Cu/MFI, 5129
Surface chemistry of V–Sb–oxide in relation to the mechanism of acrylonitrile synthesis from propane. Part 2.—Reactivity towards ammonia and relationship with catalytic behaviour, 5151
Heteropolyacid
Characterization of $H_4PMo_{11}VO_{40}$ heteropolyacid on SiO_2 and SiC supports, 5103
Heteropolyanion
Adsorption studies and species characterization in catalysts obtained from aqueous solutions or phosphomolybdic acid and γ-alumina, 3239
Hexacyanoferrate(II) anion
Electrochemical and ^1H NMR studies on the complexation of hexacyanoferrate(II) anions by aminocyclodextrins, 645
Hexane cracking
Catalytic studies with dealuminated Y zeolite. Part 3.–*n*-Hexane cracking, 2817
Hexane isomer separation
Separation of hexane isomers on zeolites mordenite and beta, 143
Hexane/water interface
Resonant-surface second-harmonic generation studies of phenol derivatives at air/water and hexane/water interfaces, 3079
High internal phase emulsion
Non-aqueous high internal phase emulsions. Preparation and stability, 1543
High-purity iron
The influence of trace impurities on the passivity of iron revealed by photoelectrochemical microscopy, 4033
High-resolution electron microscopy
High-resolution electron microscopy investigation of metal–support interactions in Rh/TiO_2, 2799
Hildebrand parameter
Determination of cohesion parameters for terpenoids such as 1,8-cineole using semi-empirical methods and calculations based on group contributions, 753
^1H NMR spectroscopy
Pore structure analysis of the mesoporous titanosilicate molecular sieve MCM-41 by ^1H NMR and N_2 sorption, 849
Variable-temperature, ^1H NMR study of hydrogen chemisorption on EuroPt-1, 4709
HNO
J-dependent linewidths for the (110)–(000) band of the $\tilde{A}\,^1A''$–$\tilde{X}\,^1A'$ transition of HNO studied by cavity ring-down spectroscopy, 1283
Homoclinic chaos
Mixed-mode oscillations and homoclinic chaos in an enzyme reaction, 2857
Horseradish peroxidase
A study on the direct electrochemical communication between horseradish peroxidase and a poly(aniline) modified electrode, 3123
Host
Prediction of template location *via* a combined Monte Carlo–simulated annealing approach, 2065
Hot spot
'Hot spots' and gasoline engine knock, 2959
HREELS
Buta-1,3-diene and but-1-ene chemisorption on Pt(111), Pd(111), Pd(110) and $Pd_{50}Cu_{50}$(111) as studied by UPS, NEXAFS and HREELS in relation to catalysis, 4835
Hund's case (c) coupling
Polarization of the CaI* chemiluminescence from the $Ca^* + CH_3I \rightarrow CaI^* + CH_3$ reaction: Evidence for Hund's case (c) coupling, 3671
Hybrid metal–semiconductor
Synthesis of hybrid metal–semiconductor ultrafine particles. Photochemical deposition of silver on a ZnO colloid surface, 1555
Hydration
Molecular modelling of the mechanism of action of phosphonate retarders on hydrating cements, 831
Hydration of amines, diamines, polyamines and amides studied by NMR, 1853
Hydrogen-bonding behaviour in the hydrophobic hydration of simple hydrocarbons in water, 2547
'Primary' hydration numbers of the hydrohalic acids and equilibrium constants of their resolvation using the emf method, 4505
Hydrazine
Radiation chemistry of aqueous solutions of hydrazine at elevated temperatures. Part 1.—Oxygen-free solutions, 1519
pK_a of the hydrazinium ion and the reaction of hydrogen atoms with hydrazine in aqueous solution, 2541
Hydrazinium ion
pK_a of the hydrazinium ion and the reaction of hydrogen atoms with hydrazine in aqueous solution, 2541
Hydrocarbon
Using computer simulation to study the properties of molecules in micropores, 1
Structure of hydrocarbon chains in surfactant monolayers at the air/water interface: neutron reflection from dodecyl trimethylammonium bromide, 403
Structure of merocyanine dyes with a hydrocarbon chain studied by vibrational spectroscopy. Part 1.—Dependence of the solid-state structure upon the chain length, 413
Structure of merocyanine dyes with a hydrocarbon chain studied by vibrational spectroscopy. Part 2.—IR study in cast and Langmuir–Blodgett films, 419
Characterization pf Pt–Sn/SiO_2 catalysts and the role of Sn in NO–hydrocarbon reactions, 461
Structural studies of semifluorinated hydrocarbon monolayers at the air/water interface, 545
Additive bond-energy scheme for the calculation of enthalpies of formation of hydrocarbons including geminal H–H terms, 1141
Non-aqueous high internal phase emulsions. Preparation and stability, 1543
FTIR studies on the selective oxidation and combustion of light hydrocarbons at metal oxide surfaces. Part 2.—Propane and propene oxidation on Co_3O_4, 1587
Hydrogen-bonding behaviour in the hydrophobic hydration of simple hydrocarbons in water, 2547
Hydrodechlorination
Surface structure of bulk nickel catalysts, active in the gas-phase hydrodechlorination reaction of aromatics, 2811
Hydrodehalogenation
Mechanism of the silicide-catalysed hydrodehalogenation of silicon tetrachloride to trichlorosilane, 4605
Hydrogel
'Wiring' of glucose oxidase and lactate oxidase within a hydrogel made with poly(vinyl pyridine) complexed with $[Os(4,4'$-dimethoxy-$2,2'$-bipyridine$)_2Cl]^{+/2+}$, 4131
Hydrogen
Diffusion of hydrogen in titanium, $Ti_{88}Al_{12}$ and Ti_3Al, 483
Coadsorption of atomic and molecular hydrogen on Rh/Al_2O_3, 1409
Isotope-exchange reaction between hydrogen molecules and surface hydroxy groups on bare and modified ZrO_2, 4491
Hydrogen absorption
Isotope effect in the diffusion of hydrogen and deuterium in titanium, $Ti_{88}Al_{12}$ and Ti_3Al, 3407
Hydrogen abstraction
Kinetic studies of the reaction of Cl atoms with SiH_4, 3299
Computational study of the $CH_4 + OH \rightarrow CH_3 + H_2O$ reaction using *ab initio* and density functional theory methods, 3467
Hydrogen adsorption–desorption
Scanning electrochemical microscopy (SECM) study of pH changes at Pt electrode surfaces in Na_2SO_4 solution (pH 4) under potential cycling conditions, 3791
Hydrogenation
Regioselective hydrogenation of alkenes over Pt-loaded zeolite BEA, 871
Compensation behaviour in the hydrogenation of benzene, toluene and *o*-xylene over Ni/SiO_2. Determination of true activation energies, 1413
Effect of adsorption geometry on the selectivity of carbonyl group hydrogenation on Pd/SiO_2, 1595
Photocatalytic transfer hydrogenation of Schiff bases with propan-2-ol by suspended semiconductor particles loaded with platinum deposits, 4291
Hydrogen-atom transfer
Intramolecular hydrogen-atom transfer at the lowest excited singlet and triplet states resulting in solvent-dependent novel photochemistry of a sterically strained 1,4-

hexyl-bridged anthraquinone, 1473
Hydrogen bonding
Ab initio study of the potential-energy well of malondialdehyde on varying the O···O distance, 347
Molecular dynamics investigation of the surface/bulk equilibrium in an ethanol–water solution, 559
Conformational dependence of the molecular charge distribution and its influence on intermolecular interactions, 1701
Diffusion of cyclohexane and cyclopentane derivatives in some polar and non-polar solvents. Effect of intermolecular and intramolecular hydrogen-bonding interactions, 1863
Thermodynamic study of complex formation by hydrogen bonding in halogenoalkane–oxygenated solvent mixtures. Halothane with propyl ether, isopropyl ether, 1,4-dioxane and 2,5-dioxahexane, 1877
Hydrogen bonding and surface interactions in protic solvents. Coadsorption of ammonia and hydrogen fluoride with water on silver(110), 2445
Hydrogen-bonding behaviour in the hydrophobic hydration of simple hydrocarbons in water, 2547
The rotational constant A_0 and planarity of the hydrogen-bonded complex $H_2CO\cdots HCl$, 2677
Solvation-controlled clustering of a phenol–pyridine acid–base pair, 3339
IR spectroscopy of neutral and ionic hydrogen-bonded complexes formed upon interaction of CH_3OH, C_2H_5OH, $(CH_3)_2O$, $(C_2H_5)_2O$ and C_4H_8O with H-Y, H-ZSM-5 and H-mordenite: Comparision with analogous adducts formed on the H-Nafion superacidic membrane, 4863
Characterisation of the {111} growth planes of a type II gas hydrate and study of the mechanism of kinetic inhibition by poly(vinylpyrrolidone), 5029
Deuterium isotope effects on ^{31}P NMR parameters: Hydrogen bonding in a solid urea–phosphoric acid adduct, 5047
Hydrogen bromide
Relativistic pseudopotential calculations of the ground-state spectroscopic properties of HBr, 167
Hydrogen carbonate
Use of isotopically labelled compounds for the *in situ* IR study of the electroreduction of CO_2 in aqueous hydrogencarbonate and buffered phosphate solutions, 3957
Hydrogen chemisorption
Variable-temperature, ^1H NMR study of hydrogen chemisorption on EuroPt-1, 4709
Hydrogen chloride
The rotational constant A_0 and planarity of the hydrogen-bonded complex $H_2CO\cdots HCl$, 2677
Hydrogen cyanide
Detailed study of the dynamics of the $O^+(^4S) + HCN$ reaction. A case study of ion–molecule reactions in the spacecraft environment, 2659
Adsorption and decomposition of HCN on a polycrystalline Pt foil studied by TPD, MBRS, XPS and FT-RAIRS, 4799
Hydrogen evolution
Competitive effects of S-containing catalyst poisons on the UPD of H in relation to H_2 evolution kinetics and OPD of H at Pt, 3709
Hydrogen electrochemistry on platinum low-index single-crystal surfaces in alkaline solution, 3719
Probing electrode/electrolyte interfacial structure in the potential region of hydrogen evolution by Raman spectroscopy, 3829
Hydrogen fluoride
Hydrogen bonding and surface interactions in protic solvents. Coadsorption of ammonia and hydrogen fluoride with water on silver(110), 2445
Hydrogenolysis
Hydrogenolysis of propane and *n*-butane over rhodium catalysts, 5117
Hydrogen oxidation reaction
Hydrogen electrochemistry on platinum low-index single-crystal surfaces in alkaline solution, 3719
Hydrogen permeation
Hysteresis in hydrogen permeation through palladium membranes, 2745
Hydrogen peroxide
Kinetics of the $OH + C_2H_2$ reaction in the presence of O_2, 1459
Mechanism of bleaching by peroxides. Part 4.—Kinetics of bleaching of malvin chloride by hydrogen peroxide at low pH and its catalysis by transition-metal salts, 2535
Model for the oscillatory reaction between hydrogen peroxide and thiosulfate catalysed by copper(II) ions, 2851
Hydrogen sulfide
Photolysis of CH_3SH and H_2S at 243.1 nm studied by photofragment ion imaging, 5181
Hydrohalic acid
'Primary' hydration numbers of the hydrohalic acids and equilibrium constants of their resolvation using the emf method, 4505
Hydronium jarosite
Structure and magnetism of hydronium jarosite, a model Kagomé antiferromagnet, 2161
Hydrophobic interaction
Role of cosolvent in hydrophobic interactions. Calorimetric studies of alkanols in concentrated aqueous solutions of urea at 298 K, 3087
Dependence of the cooperativity of hydrophobic interactions on the nature of functional groups. A microcalorimetric study of binary aqueous solutions of α,ω-difunctional compounds at 298.15 K, 3093
3α-Hydroxy-1,2-dioxane
Identification of an unexpected peroxide formed by successive isomerization reactions of the *n*-butoxy radical in oxygen, 4167
Hydroxyapatite
Enhancement of the selectivity to carbon monoxide with feedstream doping by tetrachloromethane in the oxidation of methane on stoichiometric calcium hydroxyapatite, 293
Methanol adsorption and dehydrogenation over stoichiometric and non-stoichiometric hydroxyapatite catalysts, 1981
Effects of fine structure changes of strontium hydroxyapatites on ion-exchange properties with divalent cations, 4305
Hydroxy group
^1H NMR spectroscopy of titania. Chemical shift assignments for hydroxy groups in crystalline and amorphous forms of TiO_2, 2791
An FTIR study of surface ceria hydroxy groups during a redox process with H_2, 4669
Hydroxyl radical
Computational study of the $CH_4 + OH \rightarrow CH_3 + H_2O$ reaction using *ab initio* and density functional theory methods, 3467
Mechanistic studies of the one-electron oxidation of water to hydroxyl radicals photosensitized by perfluorinated *p*-terphenyl, 3491
Hydroxynaphthoquinone
One-electron transfer reactions of some hydroxynaphthoquinones. Solvent and substitution effect as studied by pulse radiolysis, 1891
Hydroxy stretching frequency
O—H stretching frequencies in NaHX and NaHY zeolites: IR spectroscopic studies and quantum chemical calculations, 4643
Hyperpolarisability
The sum of hyperpolarizabilities approach to third-order non-linear optical susceptibilities of π-conjugated polymer crystals, 3165
Hypoxic cell
Calculation of one-electron reduction potentials for nitroheterocyclic hypoxia-selective agents, 763
Hysteresis
New theory of water activity in heterogeneous systems, 979
Hysteresis in hydrogen permeation through palladium membranes, 2745
I_2(B)
Dynamical spectroscopy of many-body interactions. Coherent vibrations and predissociation of I_2(B) in solid Kr, 1821
Ice layer
Adsorption and photochemistry of dinitrogen tetraoxide on low temperature ice layers, 933
Ideal gas behaviour
Ideality of water vapour and its adsorption on the glass surfaces of a conventional glass vacuum apparatus at 295 K between 0 and 10 Torr, 4301
Ignition
Reactor model for ignition and burning of a gasifying solid, 2951
Self-ignition of solids with diminishing reaction rates. Exact comparison between the results predicted using time-dependent and surface-oxygen absorption-dependent reaction rate, 2977
Impedance
Crystal impedance: A new technique for monitoring the sol–gel process, 1079
Evaluation of parasitic elements contributing to experimental cell impedance: Impedance measurements at interfaces between two immiscible electrolyte solutions, 3843
General aperiodic equivalent circuit for charge permeable thin-layer cells of symmetric or asymmetric types. Part 2.—Interfacial kinetics, 4987
Inclusion
Characterization of *gauche* end-groups in α,ω-dibromoalkanes: vibrational properties of the 1,6-dibromohexane/urea inclusion compound, 267
Temperature-dependent structural properties of the chlorocyclohexane/thiourea inclusion compound investigated by synchrotron X-ray powder diffraction, 273
Application of EXAFS spectroscopy to probe structural properties of solid inclusion compounds containing halogenoalkane guest molecules within the *catena*-[(1,2-diaminopropane)cadmium(II) tetra-μ-cyanonickelate(II)] host structure, 1043
Structural and dynamic properties of the 1,10-dibromodecane/urea inclusion compound, investigated by variable-temperature powder X-ray diffraction, solid-state ^2H NMR lineshape analysis and solid-state ^2H NMR spin–lattice relaxation time measurements, 2179
Incorporated semiconductor
Intercalation of iron oxide in layered $H_2Ti_4O_9$ and $H_4Nb_6O_{17}$: visible-light induced photocatalytic properties, 5089
Incorporation model
The dispersion of molybdena on ceria, 4589
Indium
Solution equilibria of gallium(III) and indium(III) complexes with halide and thiocyanate ions in *N,N*-dimethylformamide, 2715
Indole
Electrochemical copolymerisation of 5-substituted indoles, 4109
Indoline
Photochromism of naphthoxazine-spiro-indolines by direct excitation and following sensitisation by triplet-energy donors, 1323
Induced adsorption
Induced adsorption of sulfate/bisulfate anions by submonolayer amounts of copper on deliberately stepped Pt surfaces, 3757
Industrial process
Applied crystallography solutions to problems in industrial solid-state chemistry. Case examples with ceramics, cements and zeolites, 2187
Inelastic neutron diffraction
Spin conversion in mixed ammonium–potassium halide systems, 4367
Inelastic neutron scattering
Inelastic neutron scattering spectra of polyethylene, 1941
Inert electrode
Mechanism of the electrochemical reduction of carbon dioxide at inert electrodes in media of low proton availability, 3963
Inositol triphosphate
Quantitative investigation of the interactions between inositol-tris(phosphates) and polyamines, 3101
Insertion

CO_2 insertion into ion-bombarded porous silica, 2453

***In situ* transmission FTIR spectroscopy**
Thin $Mo(CO)_6$–Y-zeolite layers: Preparation and *in situ* transmission FTIR spectroscopy, 1633

Insulation material
Spatial effects in the thermal runaway of combustible fluids in insulation materials, 2965

Intelligent material
Growth of patterns in a multicellular chemical system and their responses to boundaries, 2879

Interaction potential
Non-adiabatic effects in the reactions of strongly polar ions with molecules, 4155

Intercalation
Electrochemical intercalation of lithium into vanadium pentaoxide: An *in situ* X-ray absorption study, 103
Intercalation of Methylene Blue into vanadium pentaoxide gels, 4479
Intercalation of iron oxide in layered $H_2Ti_4O_9$ and $H_4Nb_6O_{17}$: visible-light induced photocatalytic properties, 5089

Interdiffusion
In situ and real time X-ray diffraction study of interdiffusion at the Ag/Au(111) interface after electrolytic deposition, 4657

Interface
Particle wettability and line tension, 85
Grazing incidence surface scattering of X-rays, 505
Sum-frequency vibrational spectroscopy of soluble surfactants at the air/water interface, 515
Investigation at the air/water interface using polarization modulation IR spectroscopy, 525
Physical characterization of non-ionic surfactant layers adsorbed at hydrophilic and hydrophobic solid surfaces by time-resolved ellipsometry, 531
Structural phase transitions of small molecules at air/water interfaces, 539
Structural studies of semifluorinated hydrocarbon monolayers at the air/water interface, 545
Structure of the surface films of AOT solutions and of Newton black films drawn from the same solutions, 553
Molecular dynamics investigation of the surface/bulk equilibrium in an ethanol–water solution, 559
Neutron reflection study of butanol and hexanol adsorbed at the surface of their aqueous solutions, 565
Structural phase transition of a dodecan-1-ol monolayer at the solid/liquid interface studied by sum-frequency spectroscopy, 573
Self-consistent field theory for wetting of binary polymer–solvent mixtures on rigid and soft interfaces, 579
Composition of mixed surfactant–polymer layers adsorbed at the air/water interface as determined by specular neutron reflection, 589
Small-angle neutron scattering studies of sodium dodecyl sulfate interactions with gelatin. Part 2.—Effect of temperature and pH, 595
Long-wavelength dynamics of spread films of poly(methyl methacrylate) and poly(ethylene oxide) at the air/water interface, 601
Surface viscoelasticity of a foam-forming solution, 611
New approaches to measure interfacial rheology of confined fluids, 619
Metal films and particles on oxide surfaces: Structural, electronic and chemisorptive properties, 1435
Structure of the mixed cationic–non-ionic surfactant monolayer of hexadecyltrimethylammonium bromide and monododecyl hexaethylene glycol at the air/water interface, 1549
Crystallisation of oil-in-water emulsions. Amphiphile directed nucleation in aqueous emulsions of *m*-chloronitrobenzene, 1927
Corrigendum to Structure of the surface films of AOT solutions and of Newton black films drawn from the same solutions, 2317
Resonant-surface second-harmonic generation studies of phenol derivatives at air/water and hexane/water interfaces, 3079
Simple model for liquid/liquid interfaces, 3839
Electrodeposition of metallic gold clusters at the water/1,2-dichloroethane interface, 3865
Comparative adsorption study of dodecanol and cholesterol from ethylene glycol on the mercury electrode and air/solution interface, 3859
Salt effect on *p*-nitrophenol at the water surface: A surface second harmonic generation study, 4993

Interfacial capacitance
Evaluation of parasitic elements contributing to experimental cell impedance: Impedance measurements at interfaces between two immiscible electrolyte solutions, 3843

Interfacial heat capacity
Heat capacity of immiscible liquid/fluid interfaces and pressure dependence of the interfacial tension, 4471

Interfacial kinetics
Mode-specific quantum rate effects for interfacial electron transfer: Computational case studies based upon 4-cyano-*N*-methylpyridinium reduction, 3909
General aperiodic equivalent circuit for charge permeable thin-layer cells of symmetric or asymmetric types. Part 2.—Interfacial kinetics, 4987

Interfacial photophysics
Evanescent wave-induced fluorescence study of Rhodamine 101 at dielectric interfaces, 4723

Interfacial polarisation
Complex permittivity of a film of poly[4-(acryloxy)phenyl(4-chlorophenyl)methanone] containing free ion impurities and the separation of the contributions from interfacial polarization, Maxwell–Wagner–Sillars effects and dielectric relaxations of the polymer chains, 1947

Interfacial reaction
Lipase-catalysed interfacial reactions in reverse micellar systems. Role of water and microenvironment in determining enzyme activity or dormancy, 4701

Interfacial structure
Interfacial solvent structure in butan-1-ol, butan-2-ol and 2-methylpropan-1-ol at Au and Ag electrodes from surface enhanced Raman scattering and capacitance measurements, 3683
Probing electrode/electrolyte interfacial structure in the potential region of hydrogen evolution by Raman spectroscopy, 3829

Intermicellar interaction
Intermicellar interaction of ganglioside aggregates and structural stability on pH variation, 4533

Intermolecular potential
Applications of realistic electrostatic modelling to molecules in complexes, solids and proteins, 2997

Intersystem crossing
Photoionization of aniline in aqueous solution and its photolysis in cyclohexane, 4177

Intramolecular excimer formation
Enhancement of intramolecular excimer formation, photodimerization and energy transfer of naphthalene end-labelled poly(ethylene glycol) oligomers *via* complexation of alkali-metal and lanthanide cations, 1381

Intumescence
Synergistic effect of zeolite in an intumescence process: Study of the carbonaceous structures using solid-state NMR, 149

Intumescent shield
Synergistic effect of zeolite in an intumescence process. Study of the interactions between the polymer and the additives, 3435

Inverse gas chromatography
Surface chemical heterogeneity of pillared hydrotalcites, 1243
Changes in the acidic properties of pillared taeniolites on heat treatment of alkene decomposition, 4631

Inverted potential
Inverted potentials in two-electron processes in organic electrochemistry, 3983

***In vivo* sensor**
'Wiring' of glucose oxidase and lactate oxidase within a hydrogel made with poly(vinyl pyridine) complexed with $[Os(4,4'\text{-dimethoxy-}2,2'\text{-bipyridine})_2Cl]^{+/2+}$, 4131

Iodate
Arrhenius parameter determination for the reaction of the oxide radical, hydrated electron and hydroxyl radical with iodate in aqueous solution, 2251

Iodoallene
Microwave spectra of monohalogenated allenes. Chloroallene and iodoallene, 4889

Ion association
Ionic association in asymmetric electrolytes, 91
FT-Raman spectroscopic study of ionic association and solvation in acrylonitrile solutions of calcium and magnesium perchlorate, 1187

Ion capture
Non-adiabatic effects in the reactions of strongly polar ions with molecules, 4155

Ion–dipole motion
Non-adiabatic effects in the reactions of strongly polar ions with molecules, 4155

Ion exchange
Characteristics of water transport in relation to microscopic structure in Nafion membranes, 663
Investigations of zeolites by photoelectron and ion-scattering spectroscopy. Part 3.—Cation depletion at the external surface of HNa-faujasites, 701
Spectroscopic studies of vanadium-substituted zeolitic silicates of MFI topology, 1067
Electron paramagnetic resonance of heterogeneous chromium catalysts, 2431
Effects of fine structure changes of strontium hydroxyapatites on ion-exchange properties with divalent cations, 4305

Ionic aggregate
Ionic aggregates in steam. Part 1.—Equilibrium configurations, 2703
Effect of salt and solvents on the ionic solvation of *p*-toluidinonaphthalene sulfonate, 3097

Ionic conduction
Ionic conduction of lithium and magnesium salts within laminar arrays in a smectic liquid-crystal polymer electrolyte, 2599

Ionic liquid solvent
Electron transfer kinetics for weakly bonded, labile metal–ligand complexes, 3969

Ionisation
Chemical transport in mixed conductors: Application to the model materials $SrTiO_3$ and ZrO_2, 2143

Ionisation energy
Double ionization of the *n*-alkyl iodides C_2H_5I, C_3H_7I and C_4H_9I, 3293

Ion migration
Investigations of zeolites by photoelectron and ion-scattering spectroscopy. Part 3.—Cation depletion at the external surface of HNa-faujasites, 701
$FeSbO_4$ phase formed at the surface of antimony(v) oxide grafted on silica gel, 1569

Ion–molecule association
Ion–molecule association of H_3O^+ and C_2H_2: Interstellar CH_3CHO, 1305

Ion–molecule reaction
Detailed study of the dynamics of the $O^+(^4S)$ + HCN reaction. A case study of ion–molecule reactions in the spacecraft environment, 2659

Ion pairing
Solvent effects on the $Co(NH_3)_4(pzCO_2)^{2+}$–$Fe(CN)_6^{4-}$ reaction. An interpretation based on spectroscopic data, 1155
Tetrakis(decyl)ammonium tetraphenylborate: A novel electrolyte for non-polar media, 1747
Volumetric properties of, and ion-pairing in, aqueous solutions of alkali-metal sulfates under superambient conditions, 4445

Ion scattering spectroscopy
Characterization of $H_4PMo_{11}VO_{40}$ heteropolyacid on SiO_2 and SiC supports, 5103

Ion solvation
FT-Raman spectroscopic study of ionic association and solvation in acrylonitrile

solutions of calcium and magnesium perchlorate, 1187
Effect of salt and solvents on the ionic solvation of *p*-toluidinonaphthalene sulfonate, 3097
Transfer Gibbs energies for ClO_3^-, BrO_3^-, IO_3^-, ClO_4^- and IO_4^- anions for water–methanol and water–propan-2-ol mixtures: Some quantum-chemical aspects of ionic solvation, 4935

Ion–solvent interaction
Transfer Gibbs energies for ClO_3^-, BrO_3^-, IO_3^-, ClO_4^- and IO_4^- anions for water–methanol and water–propan-2-ol mixtures: Some quantum-chemical aspects of ionic solvation, 4935

Ion transfer
Thermochemical and volumetric properties of aqueous urea systems. Heat capacities and volumes of transfer from water to urea–water mixtures for some 1 : 1 electrolytes at 298.15 K, 207

IPP-CLOPPA method
Proximity effects on nuclear spin–spin coupling constants. Part 2.—The electric field effect on ^1J(CH) couplings, 3029

Iron
Effect of changing the charge of an iron(II) chelate on electron transfer to a cobalt(III) complex-containing poly(methacrylic acid-co-styrenesulfonic acid) in aqueous solution, 409

Iron(III) porphyrin
Reduction of a water-soluble iron(III) porphyrin and an iron(II) nitrosyl porphyrin by benzophenone ketyl radical, 2579

Iron oxide
Photoelectrophoresis of colloidal iron oxides. Part 2.—Magnetite (Fe_3O_4), 791
Intercalation of iron oxide in layered $H_2Ti_4O_9$ and $H_4Nb_6O_{17}$: visible-light induced photocatalytic properties, 5089

Iron oxide electrode
Surface electrochemical transformations on spinel iron oxide electrodes in aqueous solutions, 3371

Iron sulfide
Structural and morphological studies of iron sulfide, 445

IR spectroscopy
Characterization of *gauche* end-groups in α,ω-dibromoalkanes: vibrational properties of the 1,6-dibromohexane/urea inclusion compound, 267
Structure of merocyanine dyes with a hydrocarbon chain studied by vibrational spectroscopy. Part 1.—Dependence of the solid-state structure upon the chain length, 413
Structure of merocyanine dyes with a hydrocarbon chain studied by vibrational spectroscopy. Part 2.—IR study in cast and Langmuir–Blodgett films, 419
Investigation at the air/water interface using polarization modulation IR spectroscopy, 525
Vibrational frequencies, vapour pressure and an assessment of the thermodynamic properties of dimethyl telluride, 973
IR study of the symmetric $\nu_s(PO_3^{2-})$ mode of 5′-CMP in H_2O solution. Relaxation of the phosphate group, 1111
Use of pyridine as a probe for the determination, by IR spectroscopy, of the Brønsted acid strength of M^IHNaY zeolites, 1263
IR spectroscopy studies of molecular states of alkali-metal acetates in acetic acid solution, 1725
IR mechanistic studies on NO reduction with NH_3 in the presence of oxygen over cerium-exchanged mordenite, 1799
Surface silanol groups of mesoporous silica FSM-16, 1985
IR spectra of CH_4, CD_4, C_2H_4, C_2H_2, CH_3OH and CH_3OD adsorbed on C_{60} films, 2269
Temperature effect on proton-transfer equilibrium and IR spectra of chlorophenol–tributylamine systems, 2555
IR study of nitrotoluene adsorption on oxide surfaces, 3225
Spectroscopic study of CO adsorption on palladium–ceria catalysts, 3233
Combined Raman and IR study of MO_x–V_2O_5/Al_2O_3 (MO_x = MoO_3, WO_3, NiO, CoO) catalysts under dehydrated conditions, 3259
Nature of hydroxy groups in MCM-41, 3287
Spectroscopic study of the solvation of dimethyl sulfoxide in aqueous acetonitrile and acetone solvent systems, 4395
O—H stretching frequencies in NaHX and NaHY zeolites: IR spectroscopic studies and quantum chemical calculations, 4643
Low-temperature reflection/absorption IR study of thin films of nitric acid hydrates and ammonium nitrate adsorbed on gold foil, 4787
Structure of alumina surfaces, 4843
Surface characterization of modified aluminas. Part 5.—Surface acidity and basicity of CeO_2–Al_2O_3 systems, 5111
IR spectroscopic studies of the acidic properties of the mesoporous molecular sieve MCM-41, 5161

IR–visible sum frequency generation
Sum-frequency vibrational spectroscopy of soluble surfactants at the air/water interface, 515
The hydrogenation and dehydrogenation of isobutene on Pt(111) monitored by IR–visible sum frequency generation and gas chromotography, 4717

Isentropic compressibility
Partial molar volumes and isentropic compressibilities of mixtures of γ-butyrolactam (n = 5) with higher alkanols, 4463

Isobutene
The hydrogenation and dehydrogenation of isobutene on Pt(111) monitored by IR–visible sum frequency generation and gas chromotography, 4717

Isocyanogen
Randomization and isomerization rate constants for isocyanogen, 4357

Isodesmic model
Stacking interactions between caffeine and methyl gallate, 231

Isomer
G2 calculations on the thermochemistry of MgCN, MgNC and related species, 1135
Picosecond time-resolved spectroscopy of the photocolouration reaction of photochromic naphthoxazine-spiro-indolines, 1331
Effectiveness of Cr^{III}, Mn^{II}, Co^{II} and Ni^{II} paramagnetic complexes in promoting the *ortho* into *para*-positronium conversion reactions, 1395

Isomer count
A sum rule for symmetries and isomer counts of trivalent polyhedra, 4145

Isomerization
Identification of an unexpected peroxide formed by successive isomerization reactions of the *n*-butoxy radical in oxygen, 4167
Randomization and isomerization rate constants for isocyanogen, 4357

Isooctane
Separation of close-boiling hydrocarbons with silicalite zeolite membranes, 2499

Isotope effect
Isotope effect in the diffusion of hydrogen and deuterium in titanium, $Ti_{88}Al_{12}$ and Ti_3Al, 3407
Isotope effects of barium in amalgam/aqueous hydroxide solution systems, 4485

Isotope exchange
High nuclearity Pt carbonyls in alkali-metal X zeolites, 2035
Isotope-exchange reaction between hydrogen molecules and surface hydroxy groups on bare and modified ZrO_2, 4491

Isotopomer
Vibrational behaviour of the carbon–muonium bond in the muonated ethyl radical, 2331

Isotropic substitution
Structure of the mixed cationic–non-ionic surfactant monolayer of hexadecyltrimethylammonium bromide and monododecyl hexaethylene glycol at the air/water interface, 1549

Kagomé lattice
Structure and magnetism of hydronium jarosite, a model Kagomé antiferromagnet, 2161

K-edge absorption
Extended X-ray absorption fine structure studies of the amorphous tungsten sulfides and selenides, WS_5, WSe_5 and WS_3, 2131

Keggin structure
Adsorption studies and species characterization in catalysts obtained from aqueous solutions or phosphomolybdic acid and γ-alumina, 3239

Kekulé mode
Unusual frequency increases of the C=C stretching mode of polyenes and of the Kekulé mode of benzene in S_1 states: Application of a simple valence bond model, 3481

Kinetics
Temperature dependence of the reactions of the nitrate radical with dichloroalkenes followed by LIF detection, 53
Kinetic studies of the allylperoxyl radical self-reaction and reaction with HO_2, 201
Copper(II) complexation kinetics with hydroxyoximes in CTAB micelles. Effect of extractant hydrophobicity and additives, 249
Shape of acid–base fluorescence emission titration curves in the presence of buffer and quenching effects, 957
Basicity of amides in water and in aqueous micellar solutions of SDS. Their influence on micellar structure, 1205
Reaction between gaseous sulfur dioxide and solid calcium oxide. Mechanism and kinetics, 1227
Kinetics of the reaction between gaseous sulfur trioxide and solid calcium oxide, 1239
Sensitivity of molecular dynamics unimolecular rate calculations to defects in the potential-energy surface, 1297
Radiation chemistry of aqueous solutions of hydrazine at elevated temperatures. Part 1.—Oxygen-free solutions, 1519
Kinetics, intermediates and mechanism for the CO_2-reforming of methane on supported nickel catalysts, 1627
Effect of A3[6]$\beta^{Glu\rightarrow Val}$ mutation on reactivity of the CysF9[93]β sulfhydryl group of human haemoglobin S, 1739
One-electron transfer reactions of some hydroxynaphthoquinones. Solvent and substitution effect as studied by pulse radiolysis, 1891
Arrhenius parameter determination for the reaction of the oxide radical, hydrated electron and hydroxyl radical with iodate in aqueous solution, 2251
Rate constants for removal of CH(D) (v = 0 and 1) by collisions with N_2, CO, O_2, NO and NO_2 at 298 K and with CO_2 at $296 \leqslant T/K \leqslant 873$, 2335
Kinetics and spectral characteristics of transient species formed on one-electron oxidation of acridine-1,8-dione in aqueous solution. Pulse radiolysis study, 2353
Activity analysis of a water oxidation catalyst immobilized in a polymer membrane, 2457
Mechanism of bleaching by peroxides. Part 4.—Kinetics of bleaching of malvin chloride by hydrogen peroxide at low pH and its catalysis by transition-metal salts, 2535
Modelling of sintering kinetics of naphtha-reforming Pt/Al_2O_3-Cl catalysts, 2637
Self-ignition of solids with diminishing reaction rates. Exact comparison between the results predicted using time-dependent and surface-oxygen absorption-dependent reaction rate, 2977
Kinetics and thermochemisty of the R + HBr⇌ RH + Br (R = CH_2Cl, $CHCl_2$, CH_3CHCl or CH_3CCl_2) equilibrium, 3069
Kinetics of the self-reaction of CF_2 radical and its reaction with H_2, O_2, CH_4 and C_2H_4 over the temperature range 295–873 K, 3305
Solvent effects on the fluorescence quenching rate constant of an intramolecular exciplex by poly(chlorobenzenes), 3327
Effect of solvent on the reactions of coordination complexes. Part 21.—Base hydrolysis of some *cis*-(halogeno)(amine)bis(ethylenediamine)-cobalt(III) complexes in methanol–water media: The role of substrate hydrophobicity and solvent structure, 3353

Common basis for salt, micelle and microemulsion effects upon the ionic reaction of hexachloroiridate(IV) with thiosulfate, 3381
Kinetic study of the reactions of *tert*-butyl radicals in the liquid phase in the presence and absence of oxygen, 3497
Oxidation rates of soot particulates by oxygen in the temperature range 1500–3500 K determined using a shock tube, 4159
Kinetic studies of the reaction of Cl atoms with CH_3SSCH_3, 4905
A new approach to the measurement of transfer rates across immiscible liquid/liquid interfaces, 5177

Kinetic spectrophotometry
Time-resolved study of the transients produced in the CO_2 and ArF laser flash photolysis of gaseous silacyclobutane and 1,3-disilacyclobutane, 179
Corrigendum to Time-resolved study of the transients produced in the CO_2 and ArF laser flash photolysis of gaseous silacyclobutane and 1,3-disilacyclobutane, 2503

Kirkwood–Buff integral
NMR study of the influence of urea on the self-association of propan-1-ol in water and comparison with Kirkwood–Buff integral results, 35
Volumetric properties of aqueous solutions of ethylene glycol oligomers at 25 °C, 1163

Kirkwood–Frölich theory
Association of pure polar liquids: Dielectric properties of docosanoic acid, 3367

Kretschmer–Wiebe model
Thermodynamics of alkanol–alkane systems. New modifications of the ERAS model, 1175

Kr matrix
Dynamical spectroscopy of many-body interactions. Coherent vibrations and predissociation of $I_2(B)$ in solid Kr, 1821

Lactate oxidase
'Wiring' of glucose oxidase and lactate oxidase within a hydrogel made with poly(vinyl pyridine) complexed with $[Os(4,4'$-dimethoxy-2,2'-bipyridine$)_2Cl]^{+/2+}$, 4131

Langmuir–Blodgett film
Structure of merocyanine dyes with a hydrocarbon chain studied by vibrational spectroscopy. Part 2.—IR study in cast and Langmuir–Blodgett films, 419
Langmuir–Blodgett film and second harmonic generation of a new type of amphiphilic non-linear optical bis-chromophore complex dye, 2585
Photoelectric response from a stilbazolium dye in a Langmuir–Blodgett film-modified SnO_2 electrode, 3131

Langmuir monolayer
Investigation at the air/water interface using polarization modulation IR spectroscopy, 525
Structural studies of semifluorinated hydrocarbon monolayers at the air/water interface, 545

Lanthanide
Energy transfer between lanthanide ions in dinuclear complexes, 1105
Enhancement of intramolecular excimer formation, photodimerization and energy transfer of naphthalene end-labelled poly(ethylene glycol) oligomers *via* complexation of alkali-metal and lanthanide cations, 1381
Theoretical model for the prediction of electronic spectra of lanthanide complexes, 1835
Steric solvent effect on formation thermodynamics and structure of halogeno complexes of lanthanide(III) ions in *N,N*-dimethylacetamide, 1869
Interactions between lanthanide cations and nitrate anions in water. Part 1.—Effect of the ionic strength on the Gibbs energy, enthalpy and entropy of complexation of the neodymium cation, 4957

Lanthanide complex
Photoelectric response of a bilayer lipid membrane doped with an azopyridinium compound containing a rare-earth-metal complex, 769

Lanthanum oxide
Characterization of porous lanthanum oxide catalysts. Microscopic and spectroscopic studies, 2425
Dehydration of 4-methylpentan-2-ol over lanthanum and cerium oxides, 2619
UV reflectance and FTIR spectroscopic studies of CO adsorption and reaction on lanthanum oxide, 4675

Laplace transform
Theory of galvanostatic processes in mixed conductors with arbitrary electronic transport numbers, 1197

Laser Doppler anemometry
Measurement of rise and electrophoretic velocities of gas bubbles, 3879

Laser excitation
Possibility of ring opening and closure with pyrylium ions under laser excitation, 3051

Laser excited fluorescence
Photophysics of oxacyanine dyes on surfaces. Re-examination of the origins of the 'new emission' observed with laser excitation and high concentrations of adsorbed dyes, 4809

Laser flash photolysis
Time-resolved study of the transients produced in the CO_2 and ArF laser flash photolysis of gaseous silacyclobutane and 1,3-disilacyclobutane, 179
Kinetic studies of the allylperoxyl radical self-reaction and reaction with HO_2, 201
Formation of radical adducts of C_{60} with alkyl and halo-alkyl radicals. Transient absorption and emission characteristics of the adducts, 941
Intramolecular hydrogen-atom transfer at the lowest excited singlet and triplet states resulting in solvent-dependent novel photochemistry of a sterically strained 1,4-hexyl-bridged anthraquinone, 1473
Rate constants for removal of CH(D) ($v = 0$ and 1) by collisions with N_2, CO, O_2, NO and NO_2 at 298 K and with CO_2 at $296 \leqslant T/K \leqslant 873$, 2335
Corrigendum to Time-resolved study of the transients produced in the CO_2 and ArF laser flash photolysis of gaseous silacyclobutane and 1,3-disilacyclobutane, 2503
Kinetics of the self-reaction of CF_2 radical and its reaction with H_2, O_2, CH_4 and C_2H_4 over the temperature range 295–873 K, 3305

Laser-induced fluorescence spectroscopy
Temperature dependence of the reactions of the nitrate radical with dichloroalkenes followed by LIF detection, 53
Pressure and temperature dependence of the rate constants for the association reactions of CH radicals with CO and N_2 between 202 and 584 K, 1087
Rate constants for removal of CH(D) ($v = 0$ and 1) by collisions with N_2, CO, O_2, NO and NO_2 at 298 K and with CO_2 at $296 \leqslant T/K \leqslant 873$, 2335
A kinetic study of the reactions of Fe(a ^{5}D) and Fe$^+$(a ^{6}D) with N_2O over the temperature range 294–850 K, 4371
Kinetic study of the reaction of Ru(a $^5F_4$) with N_2O and O_2 from 296 to 623 K, 4377
Kinetic study of the reactions of NO_3 with 3-chloropropene, 3-bromopropene and 3-iodopropene using LIF detection, 4385

Laser vaporisation
Formation of carbon clusters C_n ($1 \leqslant n \leqslant 4$) by laser vaporization of graphite and a study of their chemical reactivity by gas chromatography–mass spectrometry, 1831

Lattice
Interaction of side-chains in poly(3-alkylthiophene) lattices, 671

Lattice defect
Oxidation catalysts: A comparative simulation study of the lattice, defect and surface structure of the stannates $ASnO_3$ (A = Ca, Sr and Ba) and SnO_2, 2057

Lattice symmetry
Crystal and pVT data and thermodynamics of the phase transitions of 2-methyl-2-nitropropane, 1899

Lattice vibration
Lattice vibrations in compounds crystallising with the baryte structure, 3625

Layered compound
Structural properties of A_2SnO_4 (A = Ba,Sr). A neutron diffraction study, 2155
Intercalation of iron oxide in layered $H_2Ti_4O_9$ and $H_4Nb_6O_{17}$: visible-light induced photocatalytic properties, 5089

Leapfrog fullerene
Leapfrog, Fries, Clar and phason-line-free fullerenes, 3673

Lennard-Jones fluid
Chemical-potential paradox in molecular simulation. Explanation and Monte Carlo results for a Lennard-Jones fluid, 1129

Lewis acid site
FT-Raman spectroscopic study of the active sites on silica-supported $ZnCl_2$ catalyst, 1027
Pyridine and ammonia as probes for FTIR analysis of solid acid catalysts, 1401
Surface characterization of modified aluminas. Part 4.—Surface hydration and Lewis acidity of CeO_2–Al_2O_3 systems, 1991
Characterization of porous lanthanum oxide catalysts. Microscopic and spectroscopic studies, 2425
Characterization of Lewis-acid sites in zeolites by EPR using the NO molecule as a probe, 2495
Nature of hydroxy groups in MCM-41, 3287
Surface characterization of modified aluminas. Part 5.—Surface acidity and basicity of CeO_2–Al_2O_3 systems, 5111

Lifetime
Phase-shift studies of ligand exchanges between *tert*-butyl alcohol and amines in excited mercury complexes in the gas phase, 729

Light scattering
Long-wavelength dynamics of spread films of poly(methyl methacrylate) and poly(ethylene oxide) at the air/water interface, 601
Surface viscoelasticity of a foam-forming solution, 611

L_{III}-edge absorption
Extended X-ray absorption fine structure studies of the amorphous tungsten sulfides and selenides, WS_3, WSe_3 and WS_2, 2131

Line tension
Particle wettability and line tension, 85

^{7}Li NMR spectroscopy
^{7}Li nuclear magnetic spin–lattice relaxation investigation of lithium trifluoromethanesulfonate and its complex with poly(ethylene oxide), 5043

Lipase catalysis
Lipase-catalysed interfacial reactions in reverse micellar systems. Role of water and microenvironment in determining enzyme activity or dormancy, 4701

Liquid crystal
Deuterium NMR study of a probe molecule dissolved in a carbohydrate liquid crystal, 111
NMR studies of correlations between molecular motions and liquid-crystalline phase transitions in two hydrogen-bonded carboxylic acid–pyridyl complexes. Part 1.—The aromatic regions, 803
NMR studies of correlations between molecular motions and liquid-crystalline phase transitions in two hydrogen-bonded carboxylic acid–pyridyl complexes. Part 2.—The alkyl regions, 811
Ionic conduction of lithium and magnesium salts within laminar arrays in a smectic liquid-crystal polymer electrolyte, 2599
Modelling of geminate annihilation in quasi-one-dimensional solids, 3391

Liquid/fluid interface
Heat capacity of immiscible liquid/fluid interfaces and pressure dependence of the interfacial tension, 4471

Liquid/liquid interface
Investigation of transport across an immiscible liquid/liquid interface. Electrochemical and second harmonic generation studies, 1369
Ac impedance analysis of tetraethylammonium ion transfer at liquid/liquid microinterfaces, 3851
A new approach to the measurement of transfer rates across immiscible liquid/liquid interfaces, 5177

Liquid mixture
Thermodynamic studies of triangular molecules: Liquid mixtures of xenon and the boron

halides, BF_3 and BCl_3, 215
Thermodynamic properties of *n*-alcohol–*n*-alkane mixtures. A comparative study of some group contribution theories, 3565
Liquid surface
Wettability of spherical particles at liquid surfaces, 4271
Lithium polymer electrolyte
A QCM analysis of water absorption in lithium polymer electrolytes, 4115
Lithium trifluoromethanesulfonate
^{7}Li nuclear magnetic spin–lattice relaxation investigation of lithium trifluoromethanesulfonate and its complex with poly(ethylene oxide), 5043
Lithocholate
Small-angle scattering study of aqueous gels of sodium lithocholate, 3157
Low-index face
Bromide electrosorption on the low-index faces of silver, 3747
Low spin
Simple correlation between Mn-Kα X-ray emission and Mn 2p X-ray photoelectron spectra for high oxidation number or low-spin manganese compounds, 2759
Low-temperature plasma oxidation
Structure and catalysis of cobalt oxide overlayers prepared on zirconia by low-temperature-plasma oxidation, 3425
Luminescence
Phase-shift studies of ligand exchanges between *tert*-butyl alcohol and amines in excited mercury complexes in the gas phase, 729
Photophysical triplet state processes of 4*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 3.—Excitation-wavelength dependence of luminescence quantum yields, 1101
Sonoluminescence of chelated terbium(III) in aqueous solution, 2529
Luminescence quenching
Intercluster exchange rates in AOT water-in-oil microemulsions: Percolation, material transport mechanism and activation energy, 3145
Lyotropic organisation
Small-angle scattering study of aqueous gels of sodium lithocholate, 3157
Macrocyclic ligand
New lower rim calix[4]arene amine derivatives: Synthesis, characterisation and acid–base properties. Potential anion and cation binders, 1731
Macromolecule–metal complex
Intra-polymer electron-transfer reaction between partially quaternized poly(1-vinylimidazole) and a cobalt(II) Schiff-base complex: Effect of alkyl chain length, 4511
Macroscopic phase separation
Simple thermodynamics of macroscopic phase separation in shrinking gels, 1537
Magnesia
Atomistic simulation of dislocations, surfaces and interfaces in MgO, 433
Effect of calcination on the structure of Ni/MgO catalyst: An X-ray diffraction study, 469
Theoretical aspects of methane chemisorption on MgO surfaces. Modelling of impurity-induced trapping of a hole, surface defects and site dependence of methane chemisorption on $(MgO)_{9,12}$ clusters, 2765
Magnesium
G2 calculations on the thermochemistry of MgCN, MgNC and related species, 1135
Atomistic simulation of adsorption of water on three-, four- and five-coordinated surface sites of magnesium oxide, 2081
Small-pore aluminium phosphate molecular sieves with chabazite structure. Incorporation of magnesium in structures -34 and -44, 2481
Study of the mechanism of oscillatory solid-phase combustion by a non-linear chemical kinetic model, 2971
Magnesium ferrite
IR study of alkene allylic activation on magnesium ferrite and alumina catalysts, 4687
Magnetic circular dichroism
Magnetic circular dichroism and optical absorption spectra of Eu^{3+} in $Y_3Al_5O_{12}$ (YAG), 2487
Magnetic exchange
Multi-frequency single-crystal and powder electron paramagnetic resonance spectroscopy of $[Cu_2(chp)_4](chp$ = 6-chloro-2-pyridonate), 4251
Magnetic structure
Magnetic structure of $La_{1.2}Tb_{0.8}CuO_4$, 2151
Magnetic susceptibility
Structure and magnetism of hydronium jarosite, a model Kagomé antiferromagnet, 2161
Magnetism
Stern–Gerlach study of nitric oxide, 329
Crystal structure, magnetism and phase transformation in perovskites A_2CrNbO_6 (A = Ca, Sr, Ba), 1051
Magnetism in oxygen clusters. Study of pure and mixed clusters of oxygen by Stern–Gerlach spectroscopy, 1319
Crystal structure, electric and magnetic behaviour of $Ce_2Pd_2Sb_3$, 2167
Magnetic circular dichroism and optical absorption spectra of Eu^{3+} in $Y_3Al_5O_{12}$ (YAG), 2487
Magnetite
Photoelectrophoresis of colloidal iron oxides. Part 2.—Magnetite (Fe_3O_4), 791
Magneto-optical rotation
Magneto-optical constants of fluoride optical crystals and other AB_2 and A_2B type compounds, 2753
Maleic anhydride
Influence of zirconium phosphate on the properties of $(VO)_2P_2O_7$ catalysts for the selective oxidation of *n*-butane to maleic anhydride, 3273
Malondialdehyde
Ab initio study of the potential-energy well of malondialdehyde on varying the O···O distance, 347
Malvin chloride
Mechanism of bleaching by peroxides. Part 4.—Kinetics of bleaching of malvin chloride by hydrogen peroxide at low pH and its catalysis by transition-metal salts, 2535
Manganese
Simple correlation between Mn-Kα X-ray emission and Mn 2p X-ray photoelectron spectra for high oxidation number or low-spin manganese compounds, 2759
Electron paramagnetic resonance (EPR) study of Cu^{2+} and Mn^{2+} ions interacting as probes with calcium carbonate during the transformation of vaterite into cubic calcite, 3211
MAS NMR spectroscopy
Synthesis and characterization of the mesoporous galloaluminosilicate molecular sieve MCM-41, 289
^{29}Si magic-angle spinning NMR study of Phillips catalysts: multi-exponential spin–lattice relaxation resulting from adsorption of paramagnetic chromium species onto a silica surface, 453
NMR studies of correlations between molecular motions and liquid-crystalline phase transitions in two hydrogen-bonded carboxylic acid–pyridyl complexes. Part 1.—The aromatic regions, 803
NMR studies of correlations between molecular motions and liquid-crystalline phase transitions in two hydrogen-bonded carboxylic acid–pyridyl complexes. Part 2.—The alkyl regions, 811
Acidic and catalytic properties of aluminated mordenite zeolite: Effect of extraframework aluminium, 861
Structural state of boron in MFI-titanium boralites and their catalytic properties, 1031
Synthesis and characterization of large-pore molecular sieves CoSAPO-36 and CoSAPO-46, 1257
State of aluminium in hydrothermally dealuminated MFI zeolite, 1647
Solid-state NMR studies of the borosilicate mesoporous molecular sieve MCM-41, 2011
Oxidation sites in dealuminated mordenite. A combined EPR, NMR and product distribution study, 2027
Small-pore aluminium phosphate molecular sieves with chabazite structure. Incorporation of magnesium in structures -34 and -44, 2481
Adsorption competition onto activated carbon, studied by magic-angle spinning NMR, 2615
^{1}H NMR spectroscopy of titania. Chemical shift assignments for hydroxy groups in crystalline and amorphous forms of TiO_2, 2791
Mass spectrometry
Kinetics of dissociative recombination of H_3O^+ ions with free electrons in premixed flames, 707
Molecular self-assembly controlled by acid–base non-covalent interactions: A mass spectrometric study of some organic acids and bases, 3539
Matrix isolation
Dynamical spectroscopy of many-body interactions. Coherent vibrations and predissociation of I_2(B) in solid Kr, 1821
Photochemistry of dinitrogen pentaoxide in low-temperature matrices, 2347
Maxwell–Wagner–Sillars
Complex permittivity of a film of poly[4-(acryloxy)phenyl(4-chlorophenyl)methanone] containing free ion impurities and the separation of the contributions from interfacial polarization, Maxwell–Wagner–Sillars effects and dielectric relaxations of the polymer chains, 1947
MCM-41
Nature of hydroxy groups in MCM-41, 3287
IR spectroscopic studies of the acidic properties of the mesoporous molecular sieve MCM-41, 5161
McMillan–Mayer system
Study of experimental-to-McMillan–Mayer conversion of thermodynamic excess functions, 3519
Mean activity coefficient
Study of experimental-to-McMillan–Mayer conversion of thermodynamic excess functions, 3519
Mean spherical approximation
Departures from ideality in pure ionic solutions using the mean spherical approximation, 1533
Mechanical property
Effect of temperature on crystal growth and crystal properties of paracetamol, 439
Mechanistic study
Is the reaction between $CH_3C(O)O_2$ and NO_3 important in the night-time troposphere?, 2211
Mechanoactivation
Magnetic properties of metal–quinone high-spin complexes prepared by solid-state mechano-activation and by chemical synthesis in solution. Comparative study with very high-field and low-temperature EPR and ENDOR, 1959
Melt
Oxidation of UO_2 in molten alkali-metal carbonate mixtures: Formation of uranates and diuranates, 5059
Melting behaviour
Examination of the structure and melting behaviour of thin film *n*-alkanes using ultra-soft polarised near-edge X-ray absorption spectroscopy, 783
Membrane
Mesoporous membranes: thermo-osmotic and isothermal flows with and without capillary condensation, 235
Vulnerability and spiral-wave evolution in the Belousov–Zhabotinsky reaction on a membrane surface, 325
ATR-FTIR spectroscopic studies of the structure and permeability of sulfonated poly(ether sulfone) membranes. Part 1.—Interfacial water–polymer interactions, 2731
ATR-FTIR spectroscopic studies of the structure and permeability of sulfonated poly(ether sulfone) membranes. Part 2.—Water diffusion processes, 2737
Membrane support
Activity analysis of a water oxidation catalyst immobilized in a polymer membrane, 2457
Mercury
Phase-shift studies of ligand exchanges between *tert*-butyl alcohol and amines in excited

mercury complexes in the gas phase, 729
Electrochemical quartz crystal microbalance studies of the electropolymerization, electroactivity and complexing properties of poly(1,8-diaminonaphthalene) films, 4101
Mercury electrode
Comparative adsorption study of dodecanol and cholesterol from ethylene glycol on the mercury electrode and air/solution interface, 3859
Mesoporous material
Synthesis and characterization of the mesoporous galloaluminosilicate molecular sieve MCM-41, 289
Surface silanol groups of mesoporous silica FSM-16, 1985
Solid-state NMR studies of the borosilicate mesoporous molecular sieve MCM-41, 2011
Experimental verification of a proposed unified formulation of adsorbate transport in mesoporous media over the full vapour pressure range, 3217
Nature of hydroxy groups in MCM-41, 3287
Textural, structural and acid properties of a catalytically active mesoporous aluminosilicate MCM-41, 4623
IR spectroscopic studies of the acidic properties of the mesoporous molecular sieve MCM-41, 5161
Metal bond
Influence of metal–metal bonds on electron spectra of MoO_2 and WO_2, 2137
Metal colloid
Electrodeposition of metallic gold clusters at the water/1,2-dichloroethane interface, 3865
Metal complex
Effectiveness of Cr^{III}, Mn^{II}, Co^{II} and Ni^{II} paramagnetic complexes in promoting the *ortho* into *para*-positronium conversion reactions, 1395
Metal film
Metal films and particles on oxide surfaces: Structural, electronic and chemisorptive properties, 1435
Metal/gas interface
Interaction of titanium with atomic and molecular oxygen, 2775
Metal ion
Cyanide thermodynamics. Part 4.—Enthalpies and entropies of cyanide complexation of Cu^{I}, Ag^{I}, Zn^{II} and Cd^{II}, 641
Fluorescence quenching and complexation behaviour of tetraphenylporphyrin with some divalent metal ions, 747
Metal–ligand complex
Electron transfer kinetics for weakly bonded, labile metal–ligand complexes, 3969
Metallopolymer
Photosensitized charge separation using ruthenium(II) complex-containing polymers in MeOH, 3599
Metal/medium interface
Polaron effects on electronic properties of metal/medium interfaces. Part 1.—Uncharged metal/dielectric and metal/electrolyte interfaces, 3997
Polaron effects on electronic properties of metal/medium interfaces. Part 2.—Electrified interfaces: *in situ* second harmonic generation, 4005
Metal oxide
Defect chemistry of $LaBO_3$ (B = Al, Mn or Co) perovskite-type oxides. Relevance to catalytic and transport behaviour, 479
Photo-oxidation of light alkenes using solid metal oxide semiconductor-based catalysts: Effects of reaction temperature and metal oxide additives, 685
Combined Raman and IR study of MO_x–V_2O_5/Al_2O_3 (MO_x = MoO_3, WO_3, NiO, CoO) catalysts under dehydrated conditions, 3259
Selective catalytic reduction of nitric oxide with ammonia on vanadia/alumina catalysts. Influence of vanadia loading and secondary metal oxide additives, 3267
Metal oxide surface
FTIR studies on the selective oxidation and combustion of light hydrocarbons at metal oxide surfaces. Part 2.—Propane and propene oxidation on Co_3O_4, 1587
Metal silicide catalyst
Mechanism of the silicide-catalysed hydrodehalogenation of silicon tetrachloride to trichlorosilane, 4605
Metal surface
Structure of thin, ordered cyclohexane films on metal surfaces, 2611
Methane
Enhancement of the selectivity to carbon monoxide with feedstream doping by tetrachloromethane in the oxidation of methane on stoichiometric calcium hydroxyapatite, 293
Dynamical stereochemistry of bimolecular reactions, 881
IR spectra of CH_4, CD_4, C_2H_4, C_2H_2, CH_3OH and CH_3OD adsorbed on C_{60} films, 2269
Oxidative coupling of CH_4 using alkali-metal ion conductors as a solid electrolyte, 2393
Study of methane adsorption in MFI and MEL zeolites by combination of the electronegativity equalization method and molecular dynamics, 2475
Methane activation
Theoretical aspects of methane chemisorption on MgO surfaces. Modelling of impurity-induced trapping of a hole, surface defects and site dependence of methane chemisorption on $(MgO)_{9,12}$ clusters, 2765
Methane oxidation
Bulk-scale modelling of a combustion oscillator, 2983
Methanethiol
An experimental and theoretical study of the interaction of CH_3OH and CH_3SH with ZnO, 3247
Photolysis of CH_3SH and H_2S at 243.1 nm studied by photofragment ion imaging, 5181
Methanol
IR spectra of CH_4, CD_4, C_2H_4, C_2H_2, CH_3OH and CH_3OD adsorbed on C_{60} films, 2269
An experimental and theoretical study of the interaction of CH_3OH and CH_3SH with ZnO, 3247
Methanol adsorption
Methanol adsorption and dehydrogenation over stoichiometric and non-stoichiometric hydroxyapatite catalysts, 1981
Methylamine
Near-UV photolysis of methylamine studied by H-atom photofragment translational spectroscopy, 4897
Methylene Blue
Adsorption of Methylene Blue from aqueous solutions by amorphous aluminosilicate gels and zeolite X, 317
Intercalation of Methylene Blue into vanadium pentaoxide gels, 4479
Methylidyne reaction
Rate constants for removal of CH(D) ($v = 0$ and 1) by collisions with N_2, CO, O_2, NO and NO_2 at 298 K and with CO_2 at $296 \leqslant T/K \leqslant 873$, 2335
2-Methylpropane
Photo-assisted oxidation of 2-methylpropane over RB^+-modified V_2O_5/SiO_2. Formation of 2-methylpropane-2-ol from 2-methylpropane and O_2, 1975
MgO(100) surface
Adsorption of atomic oxygen on the MgO (100) surface, 2075
Micellar system
Basicity of amides in water and in aqueous micellar solutions of SDS. Their influence on micellar structure, 1205
Common basis for salt, micelle and microemulsion effects upon the ionic reaction of hexachloroiridate(IV) with thiosulfate, 3381
Photochemical electron transfer in micellar systems and across surfactant vesicle bilayers promoted by esters of 2,1,3-benzothiadiazole-4,7-dicarboxylic acid, 5005
Micelle
Physical properties of cetylpyridinium chloride micelles (CPyCl) and their behaviour as reaction media, 59
Copper(II) complexation kinetics with hydroxyoximes in CTAB micelles. Effect of extractant hydrophobicity and additives, 249
Cooperative association of diblock and triblock copolymers in aqueous solution. A study of mixed micelles of *block*-copoly(oxyethylene/oxybutylene) and *block*-copoly(oxybutylene/oxyethylene/oxybutylene), 257
Structure of hydrocarbon chains in surfactant monolayers at the air/water interface: neutron reflection from dodecyl trimethylammonium bromide, 403
Salt-dependent phase behaviour of the phosphatidylinositol 4,5-diphosphate–water system, 1493
Effect of the addition of *n*-alkylamines on the growth of sodium dodecyl sulfate micelles, 2413
Photophysical studies on a fluorescence probe labelled fatty-acid: Chain folding in a micellar environment, 2697
Corrigendum to Effect of the addition of *n*-alkylamines on the growth of sodium dodecyl sulfate micelles, 5185
Microcalorimetry
Interactions between lanthanide cations and nitrate anions in water. Part 1.—Effect of the ionic strength on the Gibbs energy, enthalpy and entropy of complexation of the neodymium cation, 4957
Microcrystalline cellulose
Photophysics of cyanine dyes on surfaces. A new emission from aggregates of 2,2′-cyanines adsorbed onto microcrystalline cellulose, 1217
Photophysics of oxacyanine dyes on surfaces. Re-examination of the origins of the 'new emission' observed with laser excitation and high concentrations of adsorbed dyes, 4809
Microemulsion
Structure in microemulsions of di-chained surfactants, 65
Solubilisation of α-chymotrypsin by water-in-oil microemulsions. An analytical ultracentrifugation study, 73
Common basis for salt, micelle and microemulsion effects upon the ionic reaction of hexachloroiridate(IV) with thiosulfate, 3381
Microgel
Thermal and osmotic deswelling of poly(NIPAM) microgel particles, 3385
Microinterface
Ac impedance analysis of tetraethylammonium ion transfer at liquid/liquid microinterfaces, 3851
Microporosity
Using computer simulation to study the properties of molecules in micropores, 1
Reaction between gaseous sulfur dioxide and solid calcium oxide. Mechanism and kinetics, 1227
Kinetics of the reaction between gaseous sulfur trioxide and solid calcium oxide, 1239
Evaluation of accessible and inaccessible microporosities of microporous carbons, 2297
Microporous carbon
Evaluation of accessible and inaccessible microporosities of microporous carbons, 2297
Microporous material
CO_2 insertion into ion-bombarded porous silica, 2453
Microwave photoelectrochemistry
Microwave photoelectrochemical studies of silicon interfaces covered with platinum dots, 4053
Microwave spectroscopy
Rotational spectrum of the isotopically substituted van der Waals complex Ar–CO_2 investigated with a molecular beam Fourier transform microwave spectrometer, 901
Evidence for a pre-reactive intermediate in a gaseous mixture of ethyne and chlorine monofluoride. Rotational spectrum of the Mulliken $b\pi \cdot a\sigma$ complex $C_2H_2 \cdots ClF$, 1291
Miscibility
Thermodynamic investigation of the effect of the mutual miscibility of some higher alkanols and water on the partitioning and solubility of some guanine derivatives, 1721
Mixed cationic–non-ionic surfactant

Adsorption of mixed cationic–non-ionic surfactants at the air/water interface, 1773

Mixed conductor
Theory of galvanostatic processes in mixed conductors with arbitrary electronic transport numbers, 1197

Mixed halide
Spin conversion in mixed ammonium–potassium halide systems, 4367

Mixed metal oxide
Evidence for different copper species in precursors of copper–cerium oxide catalysts for hydrogenation reactions. An X-ray diffraction, EPR and X-ray photoelectron spectroscopy study, 131

Mixed-mode oscillation
Mixed-mode oscillations and homoclinic chaos in an enzyme reaction, 2857

Mixed solvent system
Rheological and densitometric studies of poly(propylene oxide)–water mixtures over a range of temperatures, 1859
Adsorption of DMSO at the free surface of water: Surface excesses and surface potential shifts in the low concentration range, 3873
Ternary mutual diffusion coefficients and densities of the system $\{z_1NaCl + (1 - z_1)Na_2SO_4\}(aq)$ at 298.15 K and a total molarity of 0.5000 mol dm^{-3}, 4187
Spectroscopic study of the solvation of dimethyl sulfoxide in aqueous acetonitrile and acetone solvent systems, 4395
Partial molar volumes and isentropic compressibilities of mixtures of γ-butyrolactam ($n = 5$) with higher alkanols, 4463
'Primary' hydration numbers of the hydrohalic acids and equilibrium constants of their resolvation using the emf method, 4505

Mixing
Prediction of the enthalpy of transfer of alkali-metal halides in binary mixtures, 2563
Aqueous solutions containing amino acids and peptides. Part 30.—The enthalpies of interaction of some alkali-metal halides with some amino acids at 25 °C, 4983

Mixture model
A simple model for size non-additive mixtures, 4943

Mobile species transfer
Influence of swelling phenomena on mobile species transfer during redox switching of $[Os(bipy)_2(PVP)_{10}Cl]^+$ films in mixed solvent electrolytes, 4121

Mo catalyst
Mechanism of the catalytic oxidation of CO with O_2 on an Mo catalyst supported on silica and on bulk MoO_3, 1249

Modelling
Interaction of side-chains in poly(3-alkylthiophene) lattices, 671
Salt-dependent phase behaviour of the phosphatidylinositol 4,5-diphosphate–water system, 1493

Modified alumina
Surface characterization of modified aluminas. Part 5.—Surface acidity and basicity of CeO_2–Al_2O_3 systems, 5111

Modified electrode
A study on the direct electrochemical communication between horseradish peroxidase and a poly(aniline) modified electrode, 3123

Modified membrane
Refraction of chemical waves propagating in modified membranes, 2903

Modulated wave
Modulated and alternating waves in a reaction-diffusion model with wave instability, 2919

Molecular anisotropy
Classical electrostatic theory and the molecular anisotropy of C_{70}, 3009

Molecular beam
Molecular beam studies of the interaction of oxygen with silver surfaces, 2319

Molecular dynamics
Study of carbon dioxide diffusion in zeolites with one- and three-dimensional channel networks by MD simulations and FR methods, 487
Molecular dynamics investigation of the surface/bulk equilibrium in an ethanol–water solution, 559
Molecular dynamics of putrescine, 913
Sensitivity of molecular dynamics unimolecular rate calculations to defects in the potential-energy surface, 1297
Crystal, melted and glassy states of glucose. A molecular dynamics simulation, 2285
Consistent implementation of the electronegativity equalization method in molecular mechanics and molecular dynamics, 2469
Study of methane adsorption in MFI and MEL zeolites by combination of the electronegativity equalization method and molecular dynamics, 2475
Hydrogen-bonding behaviour in the hydrophobic hydration of simple hydrocarbons in water, 2547
Ionic aggregates in steam. Part 1.—Equilibrium configurations, 2703

Molecular geometry
C_8H_8: A density functional theory introducing the localised bond density, 3015
Geometry and molecular parameters of 3,4-bis(dimethylamino)-3-cyclobutene-1,2-dione and its isomer bis(dimethylamino)squaraine. Combined study by IR spectroscopy, XRD and *ab initio* MO calculations, 3611

Molecular graph
Topological indices and graph polynomials of some macrocyclic belt-shaped molecules, 625

Molecular mechanics
Molecular mechanics force field for tertiary carbocations, 353
Molecular mechanics study of the interaction of molybdenum disulfide layers with a γ-alumina support in hydrotreating catalysts, 2437
Consistent implementation of the electronegativity equalization method in molecular mechanics and molecular dynamics, 2469

Molecular modelling
Molecular modelling of the mechanism of action of phosphonate retarders on hydrating cements, 831

Molecular motion
NMR studies of correlations between molecular motions and liquid-crystalline phase transitions in two hydrogen-bonded carboxylic acid–pyridyl complexes. Part 1.—The aromatic regions, 803

Molecular orbital
Corrigendum to Orbital symmetry effects in photoinduced bimolecular electron-transfer reactions, 1085

Molecular orbital calculation
Ab initio molecular orbital calculations of solvent clusters of *trans*-*N*-methylacetamide: Structure, ring cluster formation and out-of-plane deformation, 921
Ion–molecule association of H_3O^+ and C_2H_2: Interstellar CH_3CHO, 1305
Electron donor–acceptor complex of ICl with diethyl ether. He I photoelectron spectroscopy and *ab initio* molecular orbital study, 1677
Geometry and molecular parameters of 3,4-bis(dimethylamino)-3-cyclobutene-1,2-dione and its isomer bis(dimethylamino)squaraine. Combined study by IR spectroscopy, XRD and *ab initio* MO calculations, 3611

Molecular probe
Use of pyrrole as an IR spectroscopic molecular probe in a surface basicity study of metal oxides, 123

Molecular property
Rotational spectrum and molecular properties of the dinitrogen–chlorine monofluoride complex, 2671

Molecular recognition
Molecular recognition and effects of steric and geometric isomerism. Thermodynamic study of non-bonding interactions in aqueous solutions of cycloalkanols, 1149

Molecular relaxation dynamics
Molecular relaxation dynamics of poly(propylene oxide glycol)-400–$LiClO_4$ systems, 4969

Molecular rotation
Electronic-energy migration and molecular rotation within bichromophoric macromolecules. Part 1.—Test of a model using bis(9-anthrylmethylphosphonate) bisteroid, 1563

Molecular self-assembly
Molecular self-assembly controlled by acid–base non-covalent interactions: A mass spectrometric study of some organic acids and bases, 3539

Molecular sieve
Synthesis and characterization of the mesoporous galloaluminosilicate molecular sieve MCM-41, 289
Cyclic voltammetric studies of vanadium in V molecular sieves, 473
Pore structure analysis of the mesoporous titanosilicate molecular sieve MCM-41 by ^1H NMR and N_2 sorption, 849
Synthesis and characterization of large-pore molecular sieves CoSAPO-36 and CoSAPO-46, 1257
Solid-state NMR studies of the borosilicate mesoporous molecular sieve MCM-41, 2011
Characterization of SAPO-11 synthesized conventionally and in the presence of fluoride ions, 2017
Alumination of the purely siliceous mesoporous molecular sieve MCM-41 and its hydrothermal conversion into zeolite Na-A, 2311
Electron paramagnetic resonance of heterogeneous chromium catalysts, 2431
Small-pore aluminium phosphate molecular sieves with chabazite structure. Incorporation of magnesium in structures -34 and -44, 2481
Interaction of alkenes with CoAPO molecular sieves, 3453
Generation of ion-exchange capacity by silicon incorporation into the aluminophosphate VPI-5/$AlPO_4$-8 molecular sieve system, 3661
Titanium incorporated ATS and AFI type aluminophosphate molecular sieves, 4617
IR spectroscopic studies of the acidic properties of the mesoporous molecular sieve MCM-41, 5161

Molecular simulation
Study of the effect of solvent on the morphology of crystals using molecular simulation: Application to α-resorcinol and *N*-*n*-octyl-D-gluconamide, 1023
Chemical-potential paradox in molecular simulation. Explanation and Monte Carlo results for a Lennard-Jones fluid, 1129

Molecular structure
IR spectroscopy studies of molecular states of alkali-metal acetates in acetic acid solution, 1725
Molecular structure and physicochemical properties of acetone–chloroform mixtures, 3559

Molybdenum
Molecular mechanics study of the interaction of molybdenum disulfide layers with a γ-alumina support in hydrotreating catalysts, 2437
Binding and transport of Mo^V in perfluorinated ionomers by EPR and EPR imaging, 4239

Molybdenum hexacarbonyl
Adsorption and thermal decomposition of $Mo(CO)_6$ on $TiO_2(110)$, 4733

Molybdenum salt
Thin $Mo(CO)_6$–Y-zeolite layers: Preparation and *in situ* transmission FTIR spectroscopy, 1633

Molybdenum species
The dispersion of molybdena on ceria, 4589

Molybdenum sulfide
Dispersion and location of molybdenum sulfides supported on zeolite for hydrodesulfurization, 4647

Monolayer
Structure in microemulsions of di-chained surfactants, 65
Adsorption and photochemistry of dinitrogen tetraoxide on low temperature ice layers, 933
Metal films and particles on oxide surfaces: Structural, electronic and chemisorptive properties, 1435

Structure of the mixed cationic–non-ionic surfactant monolayer of hexadecyltrimethylammonium bromide and monododecyl hexaethylene glycol at the air/water interface, 1549
Adsorption, desorption, monolayer structure and dynamics of C_2H_4 on Cu(001), 4749

Monovacancy model
ENDOR investigation of S_2^-, SSe^- and Se_2^- defects in NaCl, 1579

Monte Carlo calculation
A method to calculate vibrational frequency shifts in heteroclusters: Application to N_3^+–He_n, 11
Study of the effect of solvent on the morphology of crystals using molecular simulation: Application to α-resorcinol and *N*-α-octyl-D-gluconamide, 1023
Chemical-potential paradox in molecular simulation. Explanation and Monte Carlo results for a Lennard-Jones fluid, 1129
Computer simulation studies of anisotropic systems. Part 25.—Chiral nematics, the Dzyaloshinsky–Moriya model, 1781
Prediction of template location *via* a combined Monte Carlo-simulated annealing approach, 2065
A Monte Carlo study of model dendrimers, 4151

Mordenite
Proton magnetic resonance of C_nH_{2n+2} (n = 1–4) adsorbed in mordenite. Dynamic behaviour and host–guest interaction, 1039
Oxidation sites in dealuminated mordenite. A combined EPR, NMR and product distribution study, 2027
Investigation of acid properties of dealuminated H-mordenite zeolites by low-temperature diffuse reflectance FTIR, 2641
Site selectivity of argon–methane co-adsorbed in mordenite as studied by NMR, 4601

Morphology
Structural and morphological studies of iron sulfide, 445
Influence of treatment with sulfuric acid on the angularity of a zirconia system, 451
Oxidation catalysts: A comparative simulation study of the lattice, defect and surface structure of the stannates $ASnO_3$ (A = Ca, Sr and Ba) and SnO_2, 2057
Polymorphism, twinning and morphology of crystals of 2,4,6-trinitrotoluene grown from solution, 2107
Corrigendum to Influence of treatment with sulfuric acid on the angularity of a zirconia system, 2503

Mössbauer spectroscopy
^{57}Fe emission Mössbauer study of electron capture after-effects in ^{57}Co-doped diaquadiformato complexes of the first transition series, 117

Moller–Plesset theory
Nature of the non-bonded (C—H)···O interaction of ethers CH_3O—$(CH_2)_n$—OCH_3 (n = 4–8), 4885

Mott–Schottky plot
Interpretation and use of Mott–Schottky plots at the semiconductor/electrolyte interface, 4083

MP2 calculation
α-Bond cleavage upon electronic excitation of acetyl chloride. Study of Cl single surfaces by full geometry optimization, 373

MSX$_\alpha$ calculation
Core and valence spectra of TaS_2 and WS_2. Experimental and theoretical studies, 4561

Multicellular chemical system
Growth of patterns in a multicellular chemical system and their responses to boundaries, 2879

Multinuclear complex
Intramolecular triplet energy transfer in alkyne-bridged Ru—Os multinuclear complexes: switching between dipole–dipole and electron-exchange mechanisms, 2223

Multiphase equilibrium
Solution of the multiphase equilibrium problem for pure component, binary and ternary systems using the area method, 4419

Multiphoton ionization
Mass-selected detection of N(^{2}D) by resonance-enhanced multiphoton ionization following two-photon dissociation of NO, 1315

Multiple model
Applications of realistic electrostatic modelling to molecules in complexes, solids and proteins, 2997

Multi-shell polyhedron
Symmetry generalisation of the Euler–Schläfli theorem for multi-shell polyhedra, 4877

Muonium
Vibrational behaviour of the carbon–muonium bond in the muonated ethyl radical, 2331
Muonium adduct of benzaldehyde: A novel probe of cation–molecule interactions in zeolite catalysts and of solvation and electronic substituent effects, 4265

Muon paramagnetic resonance spectroscopy
Muonium adduct of benzaldehyde: A novel probe of cation–molecule interactions in zeolite catalysts and of solvation and electronic substituent effects, 4265

NaCl crystallite
Adsorption and photochemistry of ethene on NaCl crystallites, 4853

Nafion
Characteristics of water transport in relation to microscopic structure in Nafion membranes, 663
Activity analysis of a water oxidation catalyst immobilized in a polymer membrane, 2457

Nanocrystal
Electrochemical and X-ray diffraction study of the redox cycling of nanocrystals of 7,7,8,8-tetracyanoquinodimethane. Observation of a solid–solid phase transformation controlled by nucleation and growth, 3925

Nanocrystalline SnO_2
Photochemistry of squaraine dyes. Part 10.—Excited-state properties and photosensitization behaviour of an IR sensitive cationic squaraine dye, 4913

Nanoelectrode
Template preparation of nanoelectrode ensembles. Achieving the 'pure-radial' electrochemical-response limiting case, 4029

Naphthalene
Diffuse reflectance laser photolytic studies of naphthalene, biphenyl and some aromatic hydrocarbons adsorbed in the cavities of faujasitic zeolites, 3653

Near-UV photolysis
Near-UV photolysis of methylamine studied by H-atom photofragment translational spectroscopy, 4897

Nematic
Computer simulation studies of anisotropic systems. Part 25.—Chiral nematics, the Dzyaloshinsky–Moriya model, 1781

Nephelauxetic effect
Interpretation of ^{59}Co NMR shielding using the hard and soft acid–base concept. Insight into the relative magnitude of the nephelauxetic and the spectrochemical effect, 1121

Network
Microscopic theory of gelation: Distribution of cyclic species and theory of critical point, 2417
Corrigendum to Microscopy theory of gelation: Distribution of cyclic species and theory of critical point, 5185

Neutron diffraction
Structural properties of A_2SnO_4 (A = Ba,Sr). A neutron diffraction study, 2155

Neutron reflection
Structure of hydrocarbon chains in surfactant monolayers at the air/water interface: neutron reflection from dodecyl trimethylammonium bromide, 403
Neutron reflection study of butanol and hexanol adsorbed at the surface of their aqueous solutions, 565
Adsorption of mixed cationic–non-ionic surfactants at the air/water interface, 1773

Newton black film
Structure of the surface films of AOT solutions and of Newton black films drawn from the same solutions, 553
Corrigendum to Structure of the surface films of AOT solutions and of Newton black films drawn from the same solutions, 2317

NEXAFS
Buta-1,3-diene and but-1-ene chemisorption on Pt(111), Pd(111), Pd(110) and $Pd_{50}Cu_{50}$(111) as studied by UPS, NEXAFS and HREELS in relation to catalysis, 4835

n-Heptane
Separation of close-boiling hydrocarbons with silicalite zeolite membranes, 2499

n-Hexane
Separation of close-boiling hydrocarbons with silicalite zeolite membranes, 2499

Nickel
Effect of calcination on the structure of Ni/MgO catalyst: An X-ray diffraction study, 469
Dependence of ethene dimerization activity and selectivity on Ni^I in ion-exchange *vs.* framework sites in SAPO-5 and SAPO-11 materials, 1429
Effect of incorporation of copper or nickel on hydrogen storage in ceria. Mechanism of reduction, 2001

Nickel surface
Surface structure determinations using X-ray absorption spectroscopy, 1653

Nickel–copper catalysts
Dynamics of bimetallic Ni–Cu catalysts, 2291

Nickel electrode
Electrooxidation of hypophosphite on single-crystal nickel electrodes: An *in situ* IR study, 4663

Nickel support
Kinetics, intermediates and mechanism for the CO_2-reforming of methane on supported nickel catalysts, 1627

Niobia
Influence of strong metal–support interaction on exchange with deuterium and other reactions of hydrocarbons. Part 2.—Studies with Pt/Nb_2O_5 and Rh/Nb_2O_5, 281

Nitrate anion
Interactions between lanthanide cations and nitrate anions in water. Part 1.—Effect of the ionic strength on the Gibbs energy, enthalpy and entropy of complexation of the neodymium cation, 4957

Nitrate radical
Temperature dependence of the reactions of the nitrate radical with dichloroalkenes followed by LIF detection, 53
Is the reaction between $CH_3C(O)O_2$ and NO_3 important in the night-time troposphere?, 2211
FTIR studies of the NO_3 initiated degradation of but-2-yne: Mechanism and rate constant determination, 3459
Kinetic study of the reactions of NO_3 with 3-chloropropene, 3-bromopropene and 3-iodopropene using LIF detection, 4385

Nitrate solution
ν_2 Band region of nitrate as an indicator for contact ion pairing in aqueous lithium and calcium nitrate solutions, 23

Nitric acid hydrate
Low-temperature reflection/absorption IR study of thin films of nitric acid hydrates and ammonium nitrate adsorbed on gold foil, 4787

Nitric oxide
Selective catalytic reduction of nitric oxide with ammonia on vanadia/alumina catalysts. Influence of vanadia loading and secondary metal oxide additives, 3267

Nitric oxide–hydrogen reaction
Investigation of the NO + H_2 reaction on Pt{100} with low-energy emission and reflection microscopy: PEEM studies, 4815

Nitrile–water system
Structural phase transitions of small molecules at air/water interfaces, 539

Nitrogen
A method to calculate vibrational frequency shifts in heteroclusters: Application to N_3^+–He_n, 11
Chemical interaction between plasma-excited nitrogen and the surface of HY zeolite, 1643
Boron–nitrogen analogues of the fullerenes: The isolated-square rule, 2197

Nitrogen dioxide
Reactions of conjugated dienes with nitrogen monoxide and dioxide, 1767

Nitrogen monoxide
Reactions of conjugated dienes with nitrogen

monoxide and dioxide, 1767
Nitrogen oxide removal
Hydrotalcite-derived mixed oxides containing copper: Catalysts for the removal of nitric oxide, 4331
Nitrogen sorption
Pore structure analysis of the mesoporous titanosilicate molecular sieve MCM-41 by ^{1}H NMR and N_2 sorption, 849
Nitrosation
IR mechanistic studies on NO reduction with NH_3 in the presence of oxygen over cerium-exchanged mordenite, 1799
Nitrotoluene
IR study of nitrotoluene adsorption on oxide surfaces, 3225
***N*-Methylformamide**
Rotational spectrum and *ab initio* calculations of *N*-methylformamide, 343
^{59}Co NMR shielding
Interpretation of ^{59}Co NMR shielding using the hard and soft acid–base concept. Insight into the relative magnitude of the nephelauxetic and the spectrochemical effect, 1121
NMR spectroscopy
NMR study of the influence of urea on the self-association of propan-1-ol in water and comparison with Kirkwood–Buff integral results, 35
Deuterium NMR study of a probe molecule dissolved in a carbohydrate liquid crystal, 111
^{11}B NMR studies on complexation of borate with linear and cross-linked polysaccharides, 651
Ab initio calculation and NMR spin–echo measurement of ^{19}F chemical shielding in the alkali-metal fluorides, 1117
Interpretation of ^{59}Co NMR shielding using the hard and soft acid–base concept. Insight into the relative magnitude of the nephelauxetic and the spectrochemical effect, 1121
New lower rim calix[4]arene amine derivatives: Synthesis, characterisation and acid–base properties. Potential anion and cation binders, 1731
^{129}Xe NMR chemical shifts and linewidths of xenon in zeolites ZnY. Part 2.—Examination of various origins of chemical shift distributions, 1815
Hydration of amines, diamines, polyamines and amides studied by NMR, 1853
X-Ray diffraction study on the aggregate structure of 5,10,15,20-tetra(4-sulfophenyl) porphinatopalladium(II)(4-) in aqueous solution, 1935
Alumination of the purely siliceous mesoporous molecular sieve MCM-41 and its hydrothermal conversion into zeolite Na-A, 2311
Structural and thermodynamical analysis of molecular complexation by ^{1}H NMR spectroscopy. Intercalation of ethidium bromide with the isomeric deoxytetranucleoside triphosphates 5′-d(GpCpGpC) and 5′-d(CpGpCpG) in aqueous solution, 3545
NMR study of the ligand interchange of 18-crown-6 complexes with La^{3+}, Ca^{2+}, Pb^{2+} and Ba^{2+} ions in 70% methanol solution, 4391
NMR spin–echo
Ab initio calculation and NMR spin–echo measurement of ^{19}F chemical shielding in the alkali-metal fluorides, 1117
NO
Stern–Gerlach study of nitric oxide, 329
Mass-selected detection of N(^{2}D) by resonance-enhanced multiphoton ionization following two-photon dissociation of NO, 1315
Characterization of Lewis-acid sites in zeolites by EPR using the NO molecule as a probe, 2495
Reduction of NO over TiO_2-supported Cu catalysts, 2625
NO adduct
Reduction of a water-soluble iron(III) porphyrin and an iron(II) nitrosyl porphyrin by benzophenone ketyl radical, 2579
Non-adiabatic effect
Non-adiabatic effects in the reactions of strongly polar ions with molecules, 4155
Non-aqueous emulsion
Non-aqueous high internal phase emulsions. Preparation and stability, 1543
Non-aqueous solvent
Ionic partial molar heat capacities in non-aqueous solvents, 757
Non-bonding interaction
Nature of the non-bonded (C−H)···O interaction of ethers $CH_3O-(CH_2)_n-OCH_3$ (n = 4–8), 4885
Non-constitutive molecular parameter
Deviation from Trouton's rule and a method for converting a non-constitutive molecular parameter into a constitutive one, 1717
Non-covalent interaction
Molecular self-assembly controlled by acid–base non-covalent interactions: A mass spectrometric study of some organic acids and bases, 3539
Non-equilibrium interaction force
Non-equilibrium interaction forces between adsorbed polymer layers, 2783
Non-ideal electrolyte
Departures from ideality in pure ionic solutions using the mean spherical approximation, 1533
Non-ionic surfactant
Physical characterization of non-ionic surfactant layers adsorbed at hydrophilic and hydrophobic solid surfaces by time-resolved ellipsometry, 531
Non-linear adsorption isotherm
Numerical simulation of desorption transients at electrodes on the basis of non-linear adsorption isotherms, 3701
Non-linear chemical dynamics
Application of the parametric representation method to construct bifurcation diagrams for highly non-linear chemical dynamical systems, 2865
Non-linear optical susceptibility
The sum of hyperpolarizabilities approach to third-order non-linear optical susceptibilities of π-conjugated polymer crystals, 3165
Non-linear optics
Second-order optical non-linearity of new 1,3,2(2*H*)-dioxaborine dyes, 945
Crystal structure and non-linear optical properties of a novel half-open cubane-like cluster $[Et_4N]_3[WOS_3(CuI)_3(\mu_2\text{-}I)]\cdot H_2O$, 2343
Langmuir–Blodgett film and second harmonic generation of a new type of amphiphilic non-linear optical bis-chromophore complex dye, 2585
Electronic structures and optical properties of LiB_3O_5, $Li_2B_4O_7$ and $KBe_2BO_3F_2$, 5073
Non-polar solvent
Diffusion of cyclohexane and cyclopentane derivatives in some polar and non-polar solvents. Effect of intermolecular and intramolecular hydrogen-bonding interactions, 1863
NO reduction
Studies of the selective reduction of nitric oxide by carbon monoxide in the presence and absence of hydrogen over Au/NaY catalysts, 301
IR mechanistic studies on NO reduction with NH_3 in the presence of oxygen over cerium-exchanged mordenite, 1799
Simulation of oscillatory behaviour in the reduction of NO by hydrogen on Pt{100}, 2941
Noyes–Field–Thompson model
Phase shifting in a chemical oscillator to encode analogue information, 2873
Nucleation
Crystallisation of oil-in-water emulsions. Amphiphile directed nucleation in aqueous emulsions of *m*-chloronitrobenzene, 1927
A potential-pulse interference method for studies of the nucleation of a single silver centre on carbon microelectrodes, 2389
Unstable supersaturated solutions of gases in liquids and nucleation theory, 2843
Electrochemical and X-ray diffraction study of the redox cycling of nanocrystals of 7,7,8,8-tetracyanoquinodimethane. Observation of a solid–solid phase transformation controlled by nucleation and growth, 3925
Comparative study of the kinetics of two-dimensional condensation of thiourea at mercury/water and mercury/ethanol interfaces, 3935
Nucleotide–drug interation
Structural and thermodynamical analysis of molecular complexation by ^{1}H NMR spectroscopy. Intercalation of ethidium bromide with the isomeric deoxytetranucleoside triphosphates 5′-d(GpCpGpC) and 5′-d(CpGpCpG) in aqueous solution, 3545
Numerical simulation
Numerical simulation of desorption transients at electrodes on the basis of non-linear adsorption isotherms, 3701
OCO···HF complex
Spectroscopic and theoretical studies of the OCO···HF complex in pressurized gases, 3473
Octanol
n-Butane oxidation using catalysts prepared by treatment of $VOPO_4\cdot 2H_2O$ with octanol, 137
Oil
Structure in microemulsions of di-chained surfactants, 65
Crystallisation of oil-in-water emulsions. Amphiphile directed nucleation in aqueous emulsions of *m*-chloronitrobenzene, 1927
One-electron oxidation
Mechanistic studies of the one-electron oxidation of water to hydroxyl radicals photosensitized by perfluorinated *p*-terphenyl, 3491
One-electron reduction
Calculation of one-electron reduction potentials for nitroheterocyclic hypoxia-selective agents, 763
Open cubane cluster
Crystal structure and non-linear optical properties of a novel half-open cubane-like cluster $[Et_4N]_3[WOS_3(CuI)_3(\mu_2\text{-}I)]\cdot H_2O$, 2343
Optical crystal
Magneto-optical constants of fluoride optical crystals and other AB_2 and A_2B type compounds, 2753
Optically detected magnetic resonance
Carotenoid interactions in peridinin chlorophyll *a* proteins from dinoflagellates. Evidence for optical excitons and triplet migration, 989
Orbital
Frontier electronic structure in gas-phase epoxy and hydroxy cyclohexenes by means of photoelectron and electron transmission spectroscopies, 1447
Organic radical
Mode-specific quantum rate effects for interfacial electron transfer: Computational case studies based upon 4-cyano-*N*-methylpyridinium reduction, 3909
Organo-chromium complex
FTIR study of the active ethene polymerisation catalyst, alumina-supported $C_6H_6Cr(CO)_3$, 4763
Organometallic
Surface organometallic chemistry of tin. Controlled thermal transformation *in vacuo* of $Sn(n\text{-}C_4H_9)_3$ fragments grafted on the surface of alumina, 3419
Orientation
Inelastic neutron scattering spectra of polyethylene, 1941
Orthogonal collocation method
Numerical simulation of desorption transients at electrodes on the basis of non-linear adsorption isotherms, 3701
Orthokinetic aggregation
Non-preserving cluster size distributions in the initial stages of orthokinetic aggregation, 1007
Corrigendum to Non-preserving cluster size distributions in the initial stages of orthokinetic aggregation, 2503
Orthorhombic
Exact analytical solution for the powder pattern of orthorhombic-*g* systems. Predicted EPR powder spectrum and application to powder $TiO:Cr^{3+}$ in the rutile phase, 2303
Oscillatory behaviour
Model for the oscillatory reaction between hydrogen peroxide and thiosulfate catalysed

by copper(II) ions, 2851
Simulation of oscillatory behaviour in the reduction of NO by hydrogen on Pt{100}, 2941
Study of the mechanism of oscillatory solid-phase combustion by a non-linear chemical kinetic model, 2971
Bulk-scale modelling of a combustion oscillator, 2983
Investigation of the oscillatory electro-oxidation of formaldehyde on Pt and Rh electrodes by cyclic voltammetry, impedance spectroscopy and the electrochemical quartz crystal microbalance, 3975

Osmium
Intramolecular triplet energy transfer in alkyne-bridged Ru—Os multinuclear complexes: switching between dipole–dipole and electron-exchange mechanisms, 2223

Osmium(4,4′-dimethoxy-2,2′-bipyridine) chloride
'Wiring' of glucose oxidase and lactate oxidase within a hydrogel made with poly(vinyl pyridine) complexed with $[Os(4,4'\text{-dimethoxy-2,2'-bipyridine})_2Cl]^{+/2+}$, 4131

Osmotic coefficient
Study of experimental-to-McMillan–Mayer conversion of thermodynamic excess functions, 3519

Overpotential
A potential-pulse interference method for studies of the nucleation of a single silver centre on carbon microelectrodes, 2389
Symmetry or asymmetry of k_{ET} and i_{ETst} *vs.* potential curves, 3905

Overpotential deposition
Competitive effects of S-containing catalyst poisons on the UPD of H in relation to H_2 evolution kinetics and OPD of H at Pt, 3709

Oxidation
n-Butane oxidation using catalysts prepared by treatment of $VOPO_4 \cdot 2H_2O$ with octanol, 137
Mechanistic signatures in the oxidation of butan-1-ol at a rotating Pd disk in alkaline media from combining cyclic voltammetry with instabilities, 395
High-temperature oxidation of ethylene oxide in shock waves, 715
Structure-sensitivity study of partial propene oxidation over $AV_2P_2O_{10}$ vanadium phosphate compounds, 1423
FTIR studies on the selective oxidation and combustion of light hydrocarbons at metal oxide surfaces. Part 2.—Propane and propene oxidation on Co_3O_4, 1587
Mechanism of bleaching by peroxides. Part 4.—Kinetics of bleaching of malvin chloride by hydrogen peroxide at low pH and its catalysis by transition-metal salts, 2535
Effect of alkali-metal promoter on silica-supported copper catalysts in benzyl alcohol oxidation, 2631
Kinetic study of the ruthenium catalysed oxidation of styrene and substituted styrenes, 3643
Oxidation rates of soot particulates by oxygen in the temperature range 1500–3500 K determined using a shock tube, 4159
Oxidation of UO_2 in molten alkali-metal carbonate mixtures: Formation of uranates and diuranates, 5059

Oxidation number
Simple correlation between Mn-Kα X-ray emission and Mn 2p X-ray photoelectron spectra for high oxidation number or low-spin manganese compounds, 2759

Oxidative coupling
Oxidative coupling of CH_4 using alkali-metal ion conductors as a solid electrolyte, 2393

Oxidative etching kinetics
Probing the oxidative etching kinetics of metals with the feedback mode of the scanning electrochemical microscope, 3799

Oxide
Raman spectroscopy of supported chromium oxide catalysts. Determination of chromium–oxygen bond distances and bond orders, 1969

Oxide support
IR study of nitrotoluene adsorption on oxide surfaces, 3225

Oxidised polyaniline film
Dynamic scaling analysis of scanning force microscopy images of electrochemically formed polyaniline films in the oxidized form. Scale-dependent roughening kinetics, 4093

Oxygen
Interaction of titanium with atomic and molecular oxygen, 2775

Oxygen cluster
Magnetism in oxygen clusters. Study of pure and mixed clusters of oxygen by Stern–Gerlach spectroscopy, 1319

Oxygen dissolution
Interaction of titanium with atomic and molecular oxygen, 2775

Oxygen evolution
Electrocatalytic properties of spinel-type $Mn_xFe_{3-x}O_4$ synthesized below 100 °C for oxygen evolution in KOH solutions, 2397
Activity analysis of a water oxidation catalyst immobilized in a polymer membrane, 2457

Oxygen-modified Cu(100)
A RAIRS study of higher alkoxide species on oxygen-modified Cu(100), 4695

Oxygen reduction catalyst
New catalysts for oxygen reduction based on transition-metal sulfides, 4311

Oxygen–silver interaction
Molecular beam studies of the interaction of oxygen with silver surfaces, 2319

Oxygen species
Reactivity of oxygen states at caesium surfaces towards carbon monoxide and carbon dioxide, 4793

Palladium
Mechanistic signatures in the oxidation of butan-1-ol at a rotating Pd disk in alkaline media from combining cyclic voltammetry with instabilities, 395
Metal–support interaction in Pd/CeO_2 catalysts. Part 2.—Ceria textural effects, 1603

Palladium(II) aquocomplex
Effects of fluorocarbon and hydrocarbon anionic micelles on the kinetics of water replacement in the palladium(II) aquocomplex of 1,1,7,7-tetraethyldiethylenetriamine by monoalkylthioureas, 2263

Palladium–ceria
Spectroscopic study of CO adsorption on palladium–ceria catalysts, 3233

Palladium membrane
Hysteresis in hydrogen permeation through palladium membranes, 2745

Palladium oxide
An electrochemical study of the composition of thin, compact Pd oxide films, 4041

Paracetamol
Effect of temperature on crystal growth and crystal properties of paracetamol, 439

Paramagnetism
Effectiveness of Cr^{III}, Mn^{II}, Co^{II} and Ni^{II} paramagnetic complexes in promoting the *ortho*- into *para*-positronium conversion reactions, 1395
X-Ray diffraction study on the aggregate structure of 5,10,15,20-tetra(4-sulfophenyl) porphinatopalladium(II)(4-) in aqueous solution, 1935

Parametric representation
Application of the parametric representation method to construct bifurcation diagrams for highly non-linear chemical dynamical systems, 2865

Parinello–Rahman molecular dynamics calculation
Molecular dynamics studies of titanylphthalocyanine crystals, 2463

Parsons–Zobel plot
New theoretical description of electrified interfaces, 3677

Partial molar volume
Thermodynamic study of the ternary system NaCl–H_2O–Et_4N at 25 °C. Part 2.—Compressibilities, 47
Volumetric properties of aqueous solutions of ethylene glycol oligomers at 25 °C, 1163
Volumetric properties of, and ion-pairing in, aqueous solutions of alkali-metal sulfates under superambient conditions, 4445
Partial molar volumes and isentropic compressibilities of mixtures of γ-butyrolactam (n = 5) with higher alkanols, 4463

Partial oxidation
Partial oxidation of C_2–C_4 alkanes into oxygenates using an Au | yttria-stabilized zirconia | Ag electrochemical reaction cell, 3579

Partition coefficient
Thermodynamic investigation of the effect of the mutual miscibility of some higher alkanols and water on the partitioning and solubility of some guanine derivatives, 1721
Partition functions and densities of states for butane and pentane, 3509

Passive oxide layer
The influence of trace impurities on the passivity of iron revealed by photoelectrochemical microscopy, 4033

Pentane
Partition functions and densities of states for butane and pentane, 3509

Perchlorate
Study of the mechanism of oscillatory solid-phase combustion by a non-linear chemical kinetic model, 2971
Aggregation of perchlorates in aprotic donor solvents. Part 1.—Lithium and sodium perchlorates, 4199
Aggregation of perchlorates in aprotic donor solvents. Part 2.—Alkaline-earth metal perchlorates, 4207

Perchloric acid
Pulse and γ-radiolysis of concentrated perchloric acid solutions, 2245

Perfluorinated ionomer
Binding and transport of Mo^V in perfluorinated ionomers by EPR and EPR imaging, 4239

Perfluoroalkane
Photophysical triplet state processes of 4-*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 1.—Temperature dependence of unimolecular triplet decay, 733
Photophysical triplet state processes of 4-*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 2.—Delayed $S_2 \rightarrow S_0$ fluorescence due to triplet–triplet annihilation, 741
Photophysical triplet state processes of 4*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 3.—Excitation-wavelength dependence of luminescence quantum yields, 1101

Peridinin
Carotenoid interactions in peridinin chlorophyll *a* proteins from dinoflagellates. Evidence for optical excitons and triplet migration, 989

Permeation
Separation of close-boiling hydrocarbons with silicalite zeolite membranes, 2499

Permselectivity
Theory for solvent and salt transfer accompanying redox switching of electroactive polymers under permselective and non-permselective conditions. Part 1.—Complete redox switching, 4087

Perovskite
Defect chemistry of $LaBO_3$ (B = Al, Mn or Co) perovskite-type oxides. Relevance to catalytic and transport behaviour, 479
Crystal structure, magnetism and phase transformation in perovskites A_2CrNbO_6 (A = Ca, Sr, Ba), 1051
Synthesis of (La, Sr)CoO_3 perovskite films *via* a sol–gel route and their physicochemical and electrochemical surface characterization for anode application in alkaline water electrolysis, 2593

Peroxidase–oxidase reaction
Mixed-mode oscillations and homoclinic chaos in an enzyme reaction, 2857

Perturbation theory
Fluid–fluid equilibrium of a mixture of non-polar and dipolar hard spheres in an applied field, 2709

Petroleum ether
Non-aqueous high internal phase emulsions. Preparation and stability, 1543

PGSE–NMR spectroscopy
Effect of cyclisation on the self-association behaviour of block copolymers in aqueous solution. Comparison of oxyethylene/oxybutylene block copolymers *cyclo*-$B_{27}E_{144}$ and $E_{72}B_{27}E_{72}$, 5021

pH
Radiation chemistry of aqueous solutions of hydrazine at elevated temperatures. Part

1.—Oxygen-free solutions, 1519
Phase separation
Phase separation in mixtures of polysaccharides and proteins, 4515
Phase shift
Phase-shift studies of ligand exchanges between *tert*-butyl alcohol and amines in excited mercury complexes in the gas phase, 729
Phase space
Quantum phase-space formulation for inelastic scattering of atom–diatomic molecules using the density operator, 1669
Phase transition
Global potentials for calcium and strontium solids, 425
Structural phase transitions of small molecules at air/water interfaces, 539
Structural phase transition of a dodecan-1-ol monolayer at the solid/liquid interface studied by sum-frequency spectroscopy, 573
NMR studies of correlations between molecular motions and liquid-crystalline phase transitions in two hydrogen-bonded carboxylic acid–pyridyl complexes. Part 1.—The aromatic regions, 803
NMR studies of correlations between molecular motions and liquid-crystalline phase transitions in two hydrogen-bonded carboxylic acid–pyridyl complexes. Part 2.—The alkyl regions, 811
Crystal structure, magnetism and phase transformation in perovskites A_2CrNbO_6 (A = Ca, Sr, Ba), 1051
Positrons in resorcinol, 1573
Structural properties of A_2SnO_4 (A = Ba,Sr). A neutron diffraction study, 2155
Adsorption of aromatic compounds in large MFI zeolite crystals, 3445
Electrochemical and X-ray diffraction study of the redox cycling of nanocrystals of 7,7,8,8-tetracyanoquinodimethane. Observation of a solid–solid phase transformation controlled by nucleation and growth, 3925
Phason line
Leapfrog, Fries, Clar and phason-line-free fullerenes, 3673
Phenol
Solvation-controlled clustering of a phenol–pyridine acid–base pair, 3339
Phenol derivative
Resonant-surface second-harmonic generation studies of phenol derivatives at air/water and hexane/water interfaces, 3079
Phenone
Intramolecular deactivation of photoexcited anthracenes by aromatic ketones. Part 2.—Charge-transfer deactivation of ω-(9-anthryl)ketones in different solvents and binary solvent mixtures and at different temperatures, 3043
Phillips catalyst
^{29}Si magic-angle spinning NMR study of Phillips catalysts: multi-exponential spin–lattice relaxation resulting from adsorption of paramagnetic chromium species onto a silica surface, 453
Phonon-assisted quantum tunnelling
A single-crystal neutron diffraction study of the temperature dependence of hydrogen-atom disorder in benzoic acid dimers, 5051
Phospha-2-allyl system
The phospha-2-allyl-system: Electrochemical and quantum chemical investigations, 1751
Phosphate
IR study of the symmetric $\nu_s(PO_3^{2-})$ mode of 5′-CMP in H_2O solution. Relaxation of the phosphate group, 1111
Adsorption competition onto activated carbon, studied by magic-angle spinning NMR, 2615
Phosphate ester
EPR study of X-irradiated hydroxyalkyl phosphate esters. Phosphate radical formation in polycrystalline glucose phosphate, ribose phosphate and glycerol phosphate salts at 77 and 295 K, 995
Phospholipid
Salt-dependent phase behaviour of the phosphatidylinositol 4,5-diphosphate–water system, 1493
Rotational dynamics of lipid–detergent mixtures probed by a cyanine dye: A mechanism for vesicle formation, 4279
Phosphomolybdic acid
Adsorption studies and species characterization in catalysts obtained from aqueous solutions or phosphomolybdic acid and γ-alumina, 3239
Phosphonate
Molecular modelling of the mechanism of action of phosphonate retarders on hydrating cements, 831
Adsorption competition onto activated carbon, studied by magic-angle spinning NMR, 2615
Phosphoric acid
Deuterium isotope effects on ^{31}P NMR parameters: Hydrogen bonding in a solid urea–phosphoric acid adduct, 5047
Photoacoustic spectroscopy
Interaction of alkenes with CoAPO molecular sieves, 3453
Photo-assisted oxidation
Photo-assisted oxidation of 2-methylpropane over RB^+-modified V_2O_5/SiO_2. Formation of 2-methylpropane-2-ol from 2-methylpropane and O_2, 1975
Photocatalysis
Semiconductor photocatalysis. Part 20.—Role of surface in the photoreduction of carbon dioxide catalysed by colloidal ZnS nanocrystallites in organic solvent, 2401
Photochemical electron transfer
Photoinduced electron transfer between triethylamine and aromatic carbonyl compounds: The role of the nature of the lowest triplet state, 1689
Photochemical electron transfer in micellar systems and across surfactant vesicle bilayers promoted by esters of 2,1,3-benzothiadiazole-4,7-dicarboxylic acid, 5005
Photochemical reduction
Synthesis of hybrid metal–semiconductor ultrafine particles. Photochemical depositio.. of silver on a ZnO colloid surface, 1555
Photo-oxidation and photo-reduction in alkylthiol monolayers self-assembled on gold, 3629
Photochemistry
Anthracene singlet quenching by indoles in media of different polarities: Mechanism and chemical photoreaction, 17
Adsorption and photochemistry of dinitrogen tetraoxide on low temperature ice layers, 933
Transient optical absorption and time-resolved resonance Raman experiments on covalently linked porphyrin–quinone systems, 949
Carotenoid interactions in peridinin chlorophyll *a* proteins from dinoflagellates. Evidence for optical excitons and triplet migration, 989
Photochemistry in modified supercritical carbon dioxide. Effect of modifier concentration on diffusion probed by triplet–triplet energy transfer, 1467
Intramolecular hydrogen-atom transfer at the lowest excited singlet and triplet states resulting in solvent-dependent novel photochemistry of a sterically strained 1,4-hexyl-bridged anthraquinone, 1473
Photocyclisation of 2-pyridyl phenyl ketone. A reaction driven by hydrogen bonding, 1841
Photochemistry of dinitrogen pentaoxide in low-temperature matrices, 2347
Photochemical processes of benzyltrimethylsilane at 77 K. Remarkable solvent effects and reaction mechanism, 3035
Self-assembled heterodinuclear europium(III)–lanthanide(III) chelates of 2,6-bis[*N*,*N*-bis(carboxymethyl)aminomethyl]-4-benzoylphenol and their radiative $^5D_0 \rightarrow {}^7F_J$ transitions of Eu^{III}, 3321
Intramolecular excimer formation in diphenylsiloxane-based copolymers, 3593
Photosensitized charge separation using ruthenium(II) complex-containing polymers in MeOH, 3599
Photoionization of aniline in aqueous solution and its photolysis in cyclohexane, 4177
Adsorption and photochemistry of ethene on NaCl crystallites, 4853
Photochemistry of squaraine dyes. Part 10.—Excited-state properties and photosensitization behaviour of an IR sensitive cationic squaraine dye, 4913
Photochromism
Photochromism of naphthoxazine-spiro-indolines by direct excitation and following sensitisation by triplet-energy donors, 1323
Picosecond time-resolved spectroscopy of the photocolouration reaction of photochromic naphthoxazine-spiro-indolines, 1331
Photochemistry of 3,4′-dimethoxy-7-hydroxyflavylium chloride. Photochromism and excited-state proton transfer, 1693
Photocurrent
Photoelectric response from a stilbazolium dye in a Langmuir–Blodgett film-modified SnO_2 electrode, 3131
Photocyclisation
Photocyclisation of 2-pyridyl phenyl ketone. A reaction driven by hydrogen bonding, 1841
Photodecomposition
Energy transfer and photodecomposition of anthracene laser dyes, 2685
Photodegradation
Influence of tungsten oxide on structural and surface properties of sol–gel prepared TiO_2 employed for 4-nitrophenol photodegradation, 819
Photodimerization energy transfer
Enhancement of intramolecular excimer formation, photodimerization and energy transfer of naphthalene end-labelled poly(ethylene glycol) oligomers *via* complexation of alkali-metal and lanthanide cations, 1381
Photoelectric effect
Photoelectric response of a bilayer lipid membrane doped with an azopyridinium compound containing a rare-earth-metal complex, 769
Photoelectrocatalysis
Photoelectrochemical study of titanium dioxide films prepared by anodisation of titanium metal in sulfuric acid, 4049
Photoelectrochemical microscopy
The influence of trace impurities on the passivity of iron revealed by photoelectrochemical microscopy, 4033
Photoelectron spectroscopy
Growth and properties of small Rh particles within an NaX matrix. Thermal analysis, electron microscopy, IR and photoelectron spectroscopy, 693
Investigations of zeolites by photoelectron and ion-scattering spectroscopy. Part 3.—Cation depletion at the external surface of HNa-faujasites, 701
Electron donor–acceptor complex of ICl with diethyl ether. He I photoelectron spectroscopy and *ab initio* molecular orbital study, 1677
X-Ray photoelectron spectroscopy of Cu^{3+} in NaK_2CuF_6, 3605
SnO_2–V_2O_5-based catalysts. Nature of surface species and their activity in *o*-xylene oxidation, 4321
Photoelectrophoresis
Photoelectrophoresis of colloidal iron oxides. Part 2.—Magnetite (Fe_3O_4), 791
Photoemission
Oxidation catalysts: A comparative simulation study of the lattice, defect and surface structure of the stannates $ASnO_3$ (A = Ca, Sr and Ba) and SnO_2, 2057
Influence of metal–metal bonds on electron spectra of MoO_2 and WO_2, 2137
Photoemission electron microscopy
Investigation of the NO + H_2 reaction on Pt{100} with low-energy emission and reflection microscopy: PEEM studies, 4815
Photo-excitation
α-Bond cleavage upon electronic excitation of acetyl chloride. Study of CI single surfaces by full geometry optimization, 373
Corrigendum to Orbital symmetry effects in photoinduced bimolecular electron-transfer reactions, 1085
Intramolecular deactivation of photoexcited anthracenes by aromatic ketones. Part 2.—Charge-transfer deactivation of ω-(9-anthryl)ketones in different solvents and binary solvent mixtures and at different temperatures, 3043

Photofragment ion imaging
Photolysis of CH_3SH and H_2S at 243.1 nm studied by photofragment ion imaging, 5181
Photoirradiation
Photo-assisted oxidation of 2-methylpropane over RB^+-modified V_2O_5/SiO_2. Formation of 2-methylpropane-2-ol from 2-methylpropane and O_2, 1975
Photoisomerization
Effects of substituents in the polymethine chain on the photoprocesses in indodicarbocyanine dyes, 4917
Photolysis
Kinetic study of the reactions of *tert*-butyl radicals in the liquid phase in the presence and absence of oxygen, 3497
A kinetic study of the reactions of Fe(a ^{5}D) and Fe^+(a ^{6}D) with N_2O over the temperature range 294–850 K, 4371
Near-UV photolysis of methylamine studied by H-atom photofragment translational spectroscopy, 4897
Photolysis of CH_3SH and H_2S at 243.1 nm studied by photofragment ion imaging, 5181
Photolytic hydrogenation
Photocatalytic transfer hydrogenation of Schiff bases with propan-2-ol by suspended semiconductor particles loaded with platinum deposits, 4291
Photo-oxidation
Photo-oxidation of light alkenes using solid metal oxide semiconductor-based catalysts: Effects of reaction temperature and metal oxide additives, 685
Mechanistic studies of the one-electron oxidation of water to hydroxyl radicals photosensitized by perfluorinated *p*-terphenyl, 3491
Photo-oxidation and photo-reduction in alkylthiol monolayers self-assembled on gold, 3629
Sensitization of TiO_2 with phthalocyanines. Part 1.—Photo-oxidations using hydroxoaluminium tricarboxymonoamidephthalocyanine adsorbed on TiO_2, 5081
Photophysics
Photophysical triplet state processes of 4-*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 1.—Temperature dependence of unimolecular triplet decay, 733
Photophysical triplet state processes of 4-*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 2.—Delayed $S_2 \rightarrow S_0$ fluorescence due to triplet–triplet annihilation, 741
Effects of non-planarity and β-substitution on the singlet-excited-state properties of basket-handle porphyrins, 1095
Photophysical triplet state processes of 4*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 3.—Excitation-wavelength dependence of luminescence quantum yields, 1101
Photophysics of cyanine dyes on surfaces. A new emission from aggregates of 2,2′-cyanines adsorbed onto microcrystalline cellulose, 1217
The photophysics of disulfonated metallophthalocyanines upon complexation with fluoride, 2689
Photophysical studies on a fluorescence probe labelled fatty-acid: Chain folding in a micellar environment, 2697
Photochemical processes of benzyltrimethylsilane at 77 K. Remarkable solvent effects and reaction mechanism, 3035
(*E*)-9-Styrylanthracene derivatives and their interactions with electron donors and acceptors. Fluorimetric and flash photolytic studies, 3315
Intramolecular excimer formation in diphenylsiloxane-based copolymers, 3593
Photoionization of aniline in aqueous solution and its photolysis in cyclohexane, 4177
Photoreaction
Diffuse reflectance laser photolytic studies of naphthalene, biphenyl and some aromatic hydrocarbons adsorbed in the cavities of faujasitic zeolites, 3653
Photosensitization
Photochemistry of squaraine dyes. Part 10.—Excited-state properties and photosensitization behaviour of an IR sensitive cationic squaraine dye, 4913
Photosensitized reduction
Tris(bipyridine)ruthenium(II) photosensitized reduction of a macrocyclic cobalt(III) complex using phenol as a donor in aqueous acidic solutions, 969
Phthalic anhydride
SnO_2–V_2O_5-based catalysts. Nature of surface species and their activity in *o*-xylene oxidation, 4321
Phthalocyanine
Modelling of geminate annihilation in quasi-one-dimensional solids, 3391
Sensitization of TiO_2 with phthalocyanines. Part 1.—Photo-oxidations using hydroxoaluminium tricarboxymonoamidephthalocyanine adsorbed on TiO_2, 5081
pK_a
pK_a of the hydrazinium ion and the reaction of hydrogen atoms with hydrazine in aqueous solution, 2541
Platinised tin dioxide
Room-temperature response of platinised tin dioxide gas-sensitive resistors, 3411
Platinised titanium oxide
Photocatalytic transfer hydrogenation of Schiff bases with propan-2-ol by suspended semiconductor particles loaded with platinum deposits, 4291
Platinum
Characterization pf Pt–Sn/SiO_2 catalysts and the role of Sn in NO–hydrocarbon reactions, 461
Regioselective hydrogenation of alkenes over Pt-loaded zeolite BEA, 871
Hydrogen electrochemistry on platinum low-index single-crystal surfaces in alkaline solution, 3719
Catalytic testing of TiO_2/platinum/silicalite-1 composites, 4609
Platinum cluster
Synthesis of Pt clusters in zeolite BEA. Effect of reduction rate on cluster size and location, 4637
Platinum electrode
Competitive effects of S-containing catalyst poisons on the UPD of H in relation to H_2 evolution kinetics and OPD of H at Pt, 3709
Irreversibly adsorbed silver on Pt(111) and transformation of the electrosorption behaviour induced by thermal annealing, 3777
Scanning electrochemical microscopy (SECM) study of pH changes at Pt electrode surfaces in Na_2SO_4 solution (pH 4) under potential cycling conditions, 3791
Investigation of the vibrational properties of CN^- on a Pt electrode by *in situ* VIS–IR sum frequency generation and functional density calculations, 3823
Platinum/silicon electrode
Microwave photoelectrochemical studies of silicon interfaces covered with platinum dots, 4053
Platinum surface
Simulation of oscillatory behaviour in the reduction of NO by hydrogen on Pt{100}, 2941
The hydrogenation and dehydrogenation of isobutene on Pt(111) monitored by IR–visible sum frequency generation and gas chromotography, 4717
Investigation of the NO + H_2 reaction on Pt{100} with low-energy emission and reflection microscopy: PEEM studies, 4815
^{31}P NMR spectroscopy
Quantitative investigation of the interactions between inositol-tris(phosphates) and polyamines, 3101
Hydrolysis of condensed phosphates in an anion-exchange resin, 3587
Deuterium isotope effects on ^{31}P NMR parameters: Hydrogen bonding in a solid urea–phosphoric acid adduct, 5047
Poisson–Boltzmann equation
Interpretation and use of Mott–Schottky plots at the semiconductor/electrolyte interface, 4083
Polarisation
Theory of galvanostatic processes in mixed conductors with arbitrary electronic transport numbers, 1197
Application of classical electrostatic theory to the polarisation energy of encapsulated ions in C_{60}, 2519
Polarisation emission
Polarisation of the CaI* chemiluminescence from the $Ca^* + CH_3I \rightarrow CaI^* + CH_3$ reaction: Evidence for Hund's case (c) coupling, 3671
Polarisation modulation
Investigation at the air/water interface using polarisation modulation IR spectroscopy, 525
Polaron effect
Polaron effects on electronic properties of metal/medium interfaces. Part 1.—Uncharged metal/dielectric and metal/electrolyte interfaces, 3997
Polaron effects on electronic properties of metal/medium interfaces. Part 2.—Electrified interfaces: *in situ* second harmonic generation, 4005
Polar solvent
Continuum and simple molecular approach to describe solvent polarity for real polar organic solvents, 637
Diffusion of cyclohexane and cyclopentane derivatives in some polar and non-polar solvents. Effect of intermolecular and intramolecular hydrogen-bonding interactions, 1863
Poly(1,8-diaminonaphthalene)
Electrochemical quartz crystal microbalance studies of the electropolymerization, electroactivity and complexing properties of poly(1,8-diaminonaphthalene) films, 4101
Poly(aniline) electrode
A study on the direct electrochemical communication between horseradish peroxidase and a poly(aniline) modified electrode, 3123
Poly(aniline)–poly(styrenesulfonate) composite film
Electroactivity, stability and application in an enzyme switch at pH 7 of poly(aniline)–poly(styrenesulfonate) composite films, 4137
Poly(chlorobenzene)
Solvent effects on the fluorescence quenching rate constant of an intramolecular exciplex by poly(chlorobenzenes), 3327
Poly(ether sulfone)
ATR-FTIR spectroscopic studies of the structure and permeability of sulfonated poly(ether sulfone) membranes. Part 2.—Water diffusion processes, 2737
Poly(ethylene glycol)
^{7}Li nuclear magnetic spin–lattice relaxation investigation of lithium trifluoromethanesulfonate and its complex with poly(ethylene oxide), 5043
Poly(ethylene oxide)
Long-wavelength dynamics of spread films of poly(methyl methacrylate) and poly(ethylene oxide) at the air/water interface, 601
Preparation and crystallinity of a large unsubstituted crown ether, cyclic heptacosa(oxyethylene) (*cyclo*-E_{27}, 81-crown-27), studied by Raman spectroscopy, X-ray scattering and differential scanning calorimetry, 3173
Poly(L-lysine)
Vibrational Raman optical activity of α-helical and unordered poly-L-lysine, 1503
Poly(methyl methacrylate)
Long-wavelength dynamics of spread films of poly(methyl methacrylate) and poly(ethylene oxide) at the air/water interface, 601
Poly(*N*-isopropylacrylamide)
Thermal and osmotic deswelling of poly(NIPAM) microgel particles, 3385
Colloidal copolymer microgels of *N*-isopropylacrylamide and acrylic acid: pH, ionic strength and temperature effects, 5013
Poly(propylene oxide)
Rheological and densitometric studies of poly(propylene oxide)–water mixtures over a range of temperatures, 1859
Poly(propylene oxide glycol)
Molecular relaxation dynamics of poly(propylene oxide glycol)-400–$LiClO_4$ systems, 4969

Poly(styrenesulfonate)
Transport phenomena and ion binding in poly(styrenesulfonate) solutions containing mixtures of two counter ions differing in charge and size, 3109
Poly(vinyl methyl ether)
Structure–reactivity studies on the crosslinking of poly(vinyl methyl ether) in aqueous solutions: A pulse radiolysis study, 4401
Poly(vinyl pyridine)
'Wiring' of glucose oxidase and lactate oxidase within a hydrogel made with poly(vinyl pyridine) complexed with $[Os(4,4'\text{-dimethoxy-2,2'-bipyridine})_2Cl]^{+/2+}$, 4131
Poly(vinylpyrrolidone)
Non-equilibrium interaction forces between adsorbed polymer layers, 2783
Characterisation of the {111} growth planes of a type II gas hydrate and study of the mechanism of kinetic inhibition by poiy(vinylpyrrolidone), 5029
Polyamine
Quantitative investigation of the interactions between inositol-tris(phosphates) and polyamines, 3101
Binding of carboxylic ligands by protonated amines, 4219
Polyaniline
In situ FTIR–attenuated total reflection spectroscopic investigations on the base–acid transitions of polyaniline. Base–acid transition in the emeraldine form of polyaniline, 3063
Polycarboxylate
Binding of carboxylic ligands by protonated amines, 4219
Polycrystalline
Inelastic neutron scattering spectra of polyethylene, 1941
Polycrystalline platinum foil
Adsorption and decomposition of HCN on a polycrystalline Pt foil studied by TPD, MBRS, XPS and FT-RAIRS, 4799
Polyelectrolyte
Transport phenomena and ion binding in poly(styrenesulfonate) solutions containing mixtures of two counter ions differing in charge and size, 3109
Donnan equilibria of simple electrolytes in polyelectrolyte solutions, 3117
Donnan equilibria of simple electrolytes in polyelectrolyte solutions. Part 2.—Extension to polycations and the effect of charge densities, 4441
Polyether
Enhancement of intramolecular excimer formation, photodimerization and energy transfer of naphthalene end-labelled poly(ethylene glycol) oligomers *via* complexation of alkali-metal and lanthanide cations, 1381
Electron-transfer kinetics of ferrocene alkanethiolate monolayers in ether and polyether solvents, 3941
Polyether sulfone
ATR-FTIR spectroscopic studies of the structure and permeability of sulfonated poly(ether sulfone) membranes. Part 1.—Interfacial water–polymer interactions, 2731
Polyethylene
Inelastic neutron scattering spectra of polyethylene, 1941
Polyhedron
Boron–nitrogen analogues of the fullerenes: The isolated-square rule, 2197
Polymer
Synergistic effect of zeolite in an intumescence process: Study of the carbonaceous structures using solid-state NMR, 149
Self-consistent field theory for wetting of binary polymer–solvent mixtures on rigid and soft interfaces, 579
Composition of mixed surfactant–polymer layers adsorbed at the air/water interface as determined by specular neutron reflectioe, 589
Interaction of side-chains in poly(3-alkylthiophene) lattices, 671
Diffusion coefficients of positronium in amorphous polymers, 985
UV–VIS–NIR and Raman spectroelectrochemistry of regioregular poly(3-octylthiophene): Comparison with its non-regioregular analogue, 1387
Ionic conduction of lithium and magnesium salts within laminar arrays in a smectic liquid-crystal polymer electrolyte, 2599
Intra-polymer electron-transfer reaction between partially quaternized poly(1-vinylimidazole) and a cobalt(II) Schiff-base complex: Effect of alkyl chain length, 4511
Polymer chain
Computer simulations of energetic and entropic changes of a single polymer chain under extension, 1375
Polymer film
In situ FTIR study of charge conduction in a poly(3-methylthiophene)–poly({1-[2-(3-thienyl)ethyl]-1,4,8,11-tetraazacyclotetradecane}nickel(II) perchlorate) copolymer film, 773
Polymerisation
Free-radical frontal polymerisation: Self-propagating thermal reaction waves, 2825
Polymethine chain
Effects of substituents in the polymethine chain on the photoprocesses in indodicarbocyanine dyes, 4917
Polymorphism
Effect of divalent cations on the formation and structure of calcium carbonate polymorphs, 1017
Polypeptide
Investigation at the air/water interface using polarization modulation IR spectroscopy, 525
Vibrational Raman optical activity of α-helical and unordered poly-L-lysine, 1503
Polysaccharide
^{11}B NMR studies on complexation of borate with linear and cross-linked polysaccharides, 651
Crystallization kinetics in oil-in-water emulsions containing a mixture of solid and liquid droplets, 1213
Phase separation in mixtures of polysaccharides and proteins, 4515
Polysilazane
Synthesis of a polysilazane layer on silica gel by chemical surface coating, 4285
Polysiloxane
Intramolecular excimer formation in diphenylsiloxane-based copolymers, 3593
Polysulfone membrane
Transition between circular fronts and spiral waves in marginally excitable media, 2897
Poly[tris(2,2'-bipyridine)ruthenium(II)]
Electrochemical recognition of chloride ions by a poly[tris-(2,2'-bipyridine)ruthenium(II)] modified electrode, 1527
Porosity
Pore structure analysis of the mesoporous titanosilicate molecular sieve MCM-41 by ^1H NMR and N_2 sorption, 849
New theory of water activity in heterogeneous systems, 979
Use of contrast matching small-angle neutron scattering to monitor the presence of closed porosity in controlled porosity styrene–divinylbenzene resins, 2607
Porous ice
FTIR studies of CO–water complexes in argon matrices and in porous ices, 4927
Porphyrin
Fluorescence quenching and complexation behaviour of tetraphenylporphyrin with some divalent metal ions, 747
Effects of non-planarity and β-substitution on the singlet-excited-state properties of basket-handle porphyrins, 1095
Modelling of geminate annihilation in quasi-one-dimensional solids, 3391
Porphyrin–quinone
Transient optical absorption and time-resolved resonance Raman experiments on covalently linked porphyrin–quinone systems, 949
Positron
Positrons in resorcinol, 1573
Positronium
Diffusion coefficients of positronium in amorphous polymers, 985
Potassium ion
Angular-resolved desorption of potassium ions from basal graphite surfaces. Ionization of Rydberg species from adsorbed and molecular beam supplied atoms, 4581
Potential-driven feedback
Probing the oxidative etching kinetics of metals with the feedback mode of the scanning electrochemical microscope, 3799
Potential-energy surface
Dynamical stereochemistry of bimolecular reactions, 881
Sensitivity of molecular dynamics unimolecular rate calculations to defects in the potential-energy surface, 1297
Randomization and isomerization rate constants for isocyanogen, 4357
Isomerism and spin–vibronic energy levels of silicon nitroxide, 4361
Potential-energy well
Ab initio study of the potential-energy well of malondialdehyde on varying the O···O distance, 347
Potentiometry
Quantitative study of the interactions of ATP with amines and amino acids, 1511
Quantitative investigation of the interactions between inositol-tris(phosphates) and polyamines, 3101
Changes in the acidic properties of pillared taeniolites on heat treatment of alkene decomposition, 4631
Powder diffraction
Effect of incorporation of copper or nickel on hydrogen storage in ceria. Mechanism of reduction, 2001
Crystal structure, electric and magnetic behaviour of $Ce_2Pd_9Sb_3$, 2167
Powder neutron diffraction
Magnetic structure of $La_{1.2}Tb_{0.8}CuO_4$, 2151
Structure and magnetism of hydronium jarosite, a model Kagomé antiferromagnet, 2161
Constrained Rietveld refinement of [β-$^1H_4$]decadeuteriodopamine deuteriobromide using powder neutron diffraction data, 4555
Powder spectrum
Exact analytical solution for the powder pattern of orthorhombic-*g* systems. Predicted EPR powder spectrum and application to powder TiO:Cr^{3+} in the rutile phase, 2303
Predissociation
Mass-selected detection of $N(^2D)$ by resonance-enhanced multiphoton ionization following two-photon dissociation of NO, 1315
Dynamical spectroscopy of many-body interactions. Coherent vibrations and predissociation of $I_2(B)$ in solid Kr, 1821
Pre-reactive intermediate
Evidence for a pre-reactive intermediate in a gaseous mixture of ethyne and chlorine monofluoride. Rotational spectrum of the Mulliken bπ·aσ complex $C_2H_2\cdots ClF$, 1291
Pressure
Ideality of water vapour and its adsorption on the glass surfaces of a conventional glass vacuum apparatus at 295 K between 0 and 10 Torr, 4301
Propan-1-ol
NMR study of the influence of urea on the self-association of propan-1-ol in water and comparison with Kirkwood–Buff integral results, 35
Propane
Hydrogenolysis of propane and *n*-butane over rhodium catalysts, 5117
Reaction pathways of propane and propene conversion in the presence of NO and O_2 on Cu/MFI, 5129
Propane ammoxidation
Surface chemistry of V–Sb–oxide in relation to the mechanism of acrylonitrile synthesis from propane. Part 2.—Reactivity towards ammonia and relationship with catalytic behaviour, 5151
Propene
Structure-sensitivity study of partial propene oxidation over $AV_2P_2O_{10}$ vanadium phosphate compounds, 1423
Reaction pathways of propane and propene conversion in the presence of NO and O_2 on Cu/MFI, 5129

Propyne adsorption
Propyne chemistry on Ni(111) and Cu(110); analogies with ethyne adsorption, 4823
Protein
Solubilisation of α-chymotrypsin by water-in-oil microemulsions. An analytical ultracentrifugation study, 73
Vibrational Raman optical activity of α-helical and unordered poly-L-lysine, 1503
Phase separation in mixtures of polysaccharides and proteins, 4515
Proton affinity
Calculation of proton affinities and absolute gas basicities of X_3 Group VI triatomics: A density functional study, 2681
Proton transfer
Shape of acid–base fluorescence emission titration curves in the presence of buffer and quenching effects, 957
Temperature effect on proton-transfer equilibrium and IR spectra of chlorophenol–tributylamine systems, 2555
IR spectroscopy of neutral and ionic hydrogen-bonded complexes formed upon interaction of CH_3OH, C_2H_5OH, $(CH_3)_2O$, $(C_2H_5)_2O$ and C_4H_8O with H-Y, H-ZSM-5 and H-mordenite: Comparision with analogous adducts formed on the H-Nafion superacidic membrane, 4863
Pseudo-capacitance
Surface electrochemical transformations on spinel iron oxide electrodes in aqueous solutions, 3371
Pseudopotential method
Adsorption of atomic oxygen on the MgO (100) surface, 2075
Pt(110)-hex
CO-induced removal of the Pt{100}-hex reconstruction studied by RAIRS, 4781
Pt-black
Activity analysis of a water oxidation catalyst adsorbed on an inorganic particle matrix, 3431
Pt carbonyl complex
High nuclearity Pt carbonyls in alkali-metal X zeolites, 2035
Pulse laser photolysis
Pressure and temperature dependence of the rate constants for the association reactions of CH radicals with CO and N_2 between 202 and 584 K, 1087
Pulse plating
Pulse-plating of copper–nickel alloys from a sulfamate solution, 4015
Pulse radiolysis
Formation of radical adducts of C_{60} with alkyl and halo-alkyl radicals. Transient absorption and emission characteristics of the adducts, 941
Pulse radiolysis study of the reaction of $SO_5^{\bullet-}$ with $HO_2^{\bullet}$, 1287
Radiation chemistry of aqueous solutions of hydrazine at elevated temperatures. Part 1.—Oxygen-free solutions, 1519
One-electron transfer reactions of some hydroxynaphthoquinones. Solvent and substitution effect as studied by pulse radiolysis, 1891
Pulse and γ-radiolysis of concentrated perchloric acid solutions, 2245
Kinetics and spectral characteristics of transient species formed on one-electron oxidation of acridine-1,8-dione in aqueous solution. Pulse radiolysis study, 2353
Mechanistic studies of the one-electron oxidation of water to hydroxyl radicals photosensitized by perfluorinated *p*-terphenyl, 3491
Disproportionation of Cr^{V} generated by the radiation-induced reduction of Cr^{VI} in aqueous solution containing formate: A pulse radiolysis study, 4173
Structure–reactivity studies on the crosslinking of poly(vinyl methyl ether) in aqueous solutions: A pulse radiolysis study, 4401
Pump–probe technique
Pump–probe femtosecond-laser VUV REMPI technique applied to the study of highly excited states of allyl iodide, 1681
Pure ionic solution
Departures from ideality in pure ionic solutions using the mean spherical approximation, 1533
Pure radial response
Template preparation of nanoelectrode ensembles. Achieving the 'pure-radial' electrochemical-response limiting case, 4029
Putrescine
Molecular dynamics of putrescine, 913
Pyrazine
Adsorption of pyrazine on Au(111) and Ag(111) electrodes. An *ex situ* XPS study, 3785
Pyridine
Pyridine and ammonia as probes for FTIR analysis of solid acid catalysts, 1401
Solvation-controlled clustering of a phenol–pyridine acid–base pair, 3339
Pyridine sorption
Use of pyridine as a probe for the determination, by IR spectroscopy, of the Brønsted acid strength of $M^{I}HNaY$ zeolites, 1263
2-Pyridyl phenyl ketone
Photocyclisation of 2-pyridyl phenyl ketone. A reaction driven by hydrogen bonding, 1841
Pyrophosphate
Synergistic effect of zeolite in an intumescence process: Study of the carbonaceous structures using solid-state NMR, 149
Pyrrole
Use of pyrrole as an IR spectroscopic molecular probe in a surface basicity study of metal oxides, 123
Pyrrolidin-2-one
Shear viscosities of binary mixtures of pyrrolidin-2-one with C_6–C_{10} *n*-alkan-1-ols, 219
Pyrylium ion
Possibility of ring opening and closure with pyrylium ions under laser excitation, 3051
Quantum chemical calculation
The phospha-2-allyl-system: Electrochemical and quantum chemical investigations, 1751
Computational studies of the reaction of methanol at aluminosilicate Brønsted acid sites, 2099
O—H stretching frequencies in NaHX and NaHY zeolites: IR spectroscopic studies and quantum chemical calculations, 4643
Quantum inelastic scattering
Quantum phase-space formulation for inelastic scattering of atom–diatomic molecules using the density operator, 1669
Quartz crystal microbalance
Investigation of the oscillatory electro-oxidation of formaldehyde on Pt and Rh electrodes by cyclic voltammetry, impedance spectroscopy and the electrochemical quartz crystal microbalance, 3975
An electrochemical study of the composition of thin, compact Pd oxide films, 4041
Electrochemical quartz crystal microbalance studies of the electropolymerization, electroactivity and complexing properties of poly(1,8-diaminonaphthalene) films, 4101
A QCM analysis of water absorption in lithium polymer electrolytes, 4115
Influence of swelling phenomena on mobile species transfer during redox switching of $[Os(bipy)_2(PVP)_{10}Cl]^{+}$ films in mixed solvent electrolytes, 4121
Quasiclassical trajectory calculation
Reaction dynamics for the $N(^2D) + H_2$ reaction, 1311
Quasi-lattice quasi-chemical model
Preferential solvation in binary mixtures. Comparison between the quasi-lattice quasi-chemical model and the stepwise solvent exchange model, 2569
Quasi-one-dimensional solid
Computation of the electronic structure and conduction properties of poly(pyrrole–isonaphthopyrrole) quasi-one-dimensional superlattices, 2281
Modelling of geminate annihilation in quasi-one-dimensional solids, 3391
Quenching
Anthracene singlet quenching by indoles in media of different polarities: Mechanism and chemical photoreaction, 17
Shape of acid–base fluorescence emission titration curves in the presence of buffer and quenching effects, 957
Diffusion coefficients of positronium in amorphous polymers, 985
Thermodynamic study of the rare earth vapour complexes: $ScAl_2Cl_9$ and YAl_2Cl_9, 1887
Quinone
Magnetic properties of metal–quinone high-spin complexes prepared by solid-state mechano-activation and by chemical synthesis in solution. Comparative study with very high-field and low-temperature EPR and ENDOR, 1959
Quinonoidal base
Photochemistry of 3,4′-dimethoxy-7-hydroxyflavylium chloride. Photochromism and excited-state proton transfer, 1693
Radiation-induced reduction
Disproportionation of Cr^{V} generated by the radiation-induced reduction of Cr^{VI} in aqueous solution containing formate: A pulse radiolysis study, 4173
Radiative transition
Self-assembled heterodinuclear europium(III)–lanthanide(III) chelates of 2,6-bis[*N*,*N*-bis(carboxymethyl)aminomethyl]-4-benzoylphenol and their radiative $^5D_0 \rightarrow {}^7F_J$ transitions of Eu^{III}, 3321
Radical ion
Observation of dielectric enrichment upon the formation of benzophenone radical anion in a binary solvent mixture, 391
Formation of radical adducts of C_{60} with alkyl and halo-alkyl radicals. Transient absorption and emission characteristics of the adducts, 941
Electrochemical, EPR and AM1 studies of acetylenic and ethylenic carotenoids, 1757
Oxidation sites in dealuminated mordenite. A combined EPR, NMR and product distribution study, 2027
Photochemical processes of benzyltrimethylsilane at 77 K. Remarkable solvent effects and reaction mechanism, 3035
Radiochemistry
^{36}Cl labelling and electrochemical study of chloride adsorption on a gold electrode from perchloric acid media, 3727
Radiolysis
Arrhenius parameter determination for the reaction of the oxide radical, hydrated electron and hydroxyl radical with iodate in aqueous solution, 2251
Radiosensitiser
Calculation of one-electron reduction potentials for nitroheterocyclic hypoxia-selective agents, 763
RAIRS
Reflection–absorption IR spectrum of chlorine adatoms on the silver(100) surface, 879
Structure of thin, ordered cyclohexane films on metal surfaces, 2611
Spectroscopic and kinetic studies of formic acid adsorption on Cu(110), 4683
A RAIRS study of higher alkoxide species on oxygen-modified Cu(100), 4695
Electron-stimulated chemistry of CF_3I adsorbed on Ag(111). C—F bond cleavage and C—C coupling, 4739
Ageing of alkanethiol self-assembled monolayers, 4759
CO-induced removal of the Pt{100}-hex reconstruction studied by RAIRS, 4781
Low-temperature reflection/absorption IR study of thin films of nitric acid hydrates and ammonium nitrate adsorbed on gold foil, 4787
Propyne chemistry on Ni(111) and Cu(110); analogies with ethyne adsorption, 4823
Raman optical activity
Vibrational Raman optical activity of α-helical and unordered poly-L-lysine, 1503
Raman spectroscopy
Vibrational and rotational relaxation of the ν(C—Br) mode of 2-bromopropane, 175
Characterization of *gauche* end-groups in α,ω-dibromoalkanes: vibrational properties of the 1,6-dibromohexane/urea inclusion compound, 267
Structure of merocyanine dyes with a hydrocarbon chain studied by vibrational spectroscopy. Part 1.—Dependence of the solid-state structure upon the chain length, 413
Transient optical absorption and time-resolved resonance Raman experiments on covalently

linked porphyrin–quinone systems, 949
Vibrational frequencies, vapour pressure and an assessment of the thermodynamic properties of dimethyl telluride, 973
FT-Raman spectroscopic study of the active sites on silica-supported $ZnCl_2$ catalyst, 1027
UV–VIS–NIR and Raman spectroelectrochemistry of regioregular poly(3-octylthiophene): Comparison with its non-regioregular analogue, 1387
Raman spectroscopy of supported chromium oxide catalysts. Determination of chromium–oxygen bond distances and bond orders, 1969
Combined Raman and IR study of MO_x–V_2O_5/Al_2O_3 (MO_x = MoO_3, WO_3, NiO, CoO) catalysts under dehydrated conditions, 3259

Rare earth metal
Thermodynamic study of the rare earth vapour complexes: $ScAl_2Cl_9$ and YAl_2Cl_9, 1887

Rate constant
State-specific rate constants for the relaxation of $O_2(X\,^3\Sigma_g^-, v = 8–11)$ in collisions with O_2, N_2, NO_2, CO_2, N_2O, CH_4 and He, 193
Kinetics of reactions between neutral free radicals. Rate constants for the reaction of CH radicals with N atoms between 216 and 584 K, 723
Diffusion coefficients of positronium in amorphous polymers, 985
Pressure and temperature dependence of the rate constants for the association reactions of CH radicals with CO and N_2 between 202 and 584 K, 1087
Energy transfer between lanthanide ions in dinuclear complexes, 1105
Reaction between gaseous sulfur dioxide and solid calcium oxide. Mechanism and kinetics, 1227
Kinetics of the reaction between gaseous sulfur trioxide and solid calcium oxide, 1239
Kinetics of the OH + C_2H_2 reaction in the presence of O_2, 1459
Photochemistry in modified supercritical carbon dioxide. Effect of modifier concentration on diffusion probed by triplet–triplet energy transfer, 1467
Radiation chemistry of aqueous solutions of hydrazine at elevated temperatures. Part 1.—Oxygen-free solutions, 1519

Reaction–diffusion front
Investigation of the NO + H_2 reaction on Pt{100} with low-energy emission and reflection microscopy: PEEM studies, 4815

Reaction–diffusion mechanism
Modulated and alternating waves in a reaction-diffusion model with wave instability, 2919
On a dynamic reaction–diffusion mechanism: The spatial patterning of teeth primordia in the alligator, 2927

Reaction dynamics
Reaction dynamics for the $N(^2D)$ + H_2 reaction, 1311
Detailed study of the dynamics of the $O^+(^4S)$ + HCN reaction. A case study of ion–molecule reactions in the spacecraft environment, 2659

Reaction energy profile
Computational study of the CH_4 + OH → CH_3 + H_2O reaction using *ab initio* and density functional theory methods, 3467

Reaction mechanism
Isotope-exchange reaction between hyrogen molecules and surface hydroxy groups on bare and modified ZrO_2, 4491
Reaction pathways of propane and propene conversion in the presence of NO and O_2 on Cu/MFI, 5129

Reactor model
Reactor model for ignition and burning of a gasifying solid, 2951

Redox cycling
Electrochemical and X-ray diffraction study of the redox cycling of nanocrystals of 7,7,8,8-tetracyanoquinodimethane. Observation of a solid–solid phase transformation controlled by nucleation and growth, 3925

Redox switching
Theory for solvent and salt transfer accompanying redox switching of electroactive polymers under permselective and non-permselective conditions. Part 1.—Complete redox switching, 4087

Reduction
Effect of incorporation of copper or nickel on hydrogen storage in ceria. Mechanism of reduction, 2001
Reduction of NO over TiO_2-supported Cu catalysts, 2625
An FTIR study of surface ceria hydroxy groups during a redox process with H_2, 4669

Reforming
Kinetics, intermediates and mechanism for the CO_2-reforming of methane on supported nickel catalysts, 1627
Modelling of sintering kinetics of naphtha-reforming Pt/Al_2O_3-Cl catalysts, 2637

Refractive index
Electronic structures and optical properties of LiB_3O_5, $Li_2B_4O_7$ and $KBe_2BO_3F_2$, 5073

Relative acidity
An experimental and theoretical study of the interaction of CH_3OH and CH_3SH with ZnO, 3247

Relative permittivity
Continuum and simple molecular approach to describe solvent polarity for real polar organic solvents, 637
Association of pure polar liquids: Dielectric properties of docosanoic acid, 3367

Relativistic pseudopotential calculation
Relativistic pseudopotential calculations of the ground-state spectroscopic properties of HBr, 167

Relaxation
IR study of the symmetric $\nu_s(PO_3^{2-})$ mode of 5′-CMP in H_2O solution. Relaxation of the phosphate group, 1111
Self-assembled heterodinuclear europium(III)–lanthanide(III) chelates of 2,6-bis[*N*,*N*-bis(carboxymethyl)aminomethyl]-4-benzoylphenol and their radiative $^5D_0 \rightarrow {}^7F_J$ transitions of Eu^{III}, 3321

Relaxation time
Hydration of amines, diamines, polyamines and amides studied by NMR, 1853

REMPI technique
Pump–probe femtosecond-laser VUV REMPI technique applied to the study of highly excited states of allyl iodide, 1681

Rennet enzyme
Kinetic evidence for steric destabilization of casein by rennet enzyme activity, 2575

Resin
Use of contrast matching small-angle neutron scattering to monitor the presence of closed porosity in controlled porosity styrene–divinylbenzene resins, 2607

Resistivity
Roughening of thin silver films in aqueous electrolytes, 2381

Resolvation
'Primary' hydration numbers of the hydrohalic acids and equilibrium constants of their resolvation using the emf method, 4505

Resorcinol
Positrons in resorcinol, 1573

Response model
Resolving combustible gas mixtures using gas sensitive resistors with arrays of electrodes, 4497

Response reaction
Response reactions in chemical thermodynamics, 3525

Reverse micelle
Dynamics of spin-labelled α-chymotrypsin in reverse micelles of differently charged surfactants, 3151
Lipase-catalysed interfacial reactions in reverse micellar systems. Role of water and microenvironment in determining enzyme activity or dormancy, 4701

Rheology
New approaches to measure interfacial rheology of confined fluids, 619
Stokesian sphere simulations of suspension rheology, 657
Rheological and densitometric studies of poly(propylene oxide)–water mixtures over a range of temperatures, 1859

Rhodamine 101
Evanescent wave-induced fluorescence study of Rhodamine 101 at dielectric interfaces, 4723

Rhodamine 6G
Energy transfer and photodecomposition of anthracene laser dyes, 2685

Rhodium catalyst
Hydrogenolysis of propane and *n*-butane over rhodium catalysts, 5117

Rhodium dispersion
Growth and properties of small Rh particles within an NaX matrix. Thermal analysis, electron microscopy, IR and photoelectron spectroscopy, 693

Rhodium–titanium dioxide catalyst
High-resolution electron microscopy investigation of metal–support interactions in Rh/TiO_2, 2799

Rhombohedral
EPR characterization of O^- and trapped electrons in 20% SrF_2/SmOF, 1793

Riboflavin
Orientation and electrocatalysis of riboflavin adsorbed on carbon substrate surfaces, 1913

Rietveld refinement
Temperature-dependent structural properties of the chlorocyclohexane/thiourea inclusion compound investigated by synchrotron X-ray powder diffraction, 273
Constrained Rietveld refinement of [β-$^1H_1$]decadeuteriodopamine deuteriobromide using powder neutron diffraction data, 4555

Rigid-molecule intermolecular potential
Molecular dynamics studies of titanylphthalocyanine crystals, 2463

Ring electrode
Rotating waves on disk and ring electrodes, 2933

Ring isomer
Open-chain and ring isomers of CN_2OS. *Ab initio* study of structures and stabilities, 333

Rotating disc electrode
Rotating waves on disk and ring electrodes, 2933
Pulse-plating of copper–nickel alloys from a sulfamate solution, 4015
Galvanostatic pulse and pulse reverse plating of zinc–nickel alloys from sulfate electrolytes on a rotating disc electrode, 4021
Interaction of cetyltrimethylammonium chloride micelles under static and hydrodynamic conditions, 4541

Rotating wave
Rotating waves on disk and ring electrodes, 2933

Rotational dynamics
Rotational dynamics of lipid–detergent mixtures probed by a cyanine dye: A mechanism for vesicle formation, 4279

Rotational relaxation
Vibrational and rotational relaxation of the ν(C—Br) mode of 2-bromopropane, 175

Rotational spectroscopy
Rotational spectrum and *ab initio* calculations of *N*-methylformamide, 343
Rotational spectrum of the isotopically substituted van der Waals complex Ar–CO_2 investigated with a molecular beam Fourier transform microwave spectrometer, 901
Fourier transform rotational spectrum and molecular structure of vinylcyclopropane, 907
Rotational spectrum and molecular properties of the dinitrogen–chlorine monofluoride complex, 2671
The rotational constant A_0 and planarity of the hydrogen-bonded complex $H_2CO\cdots HCl$, 2677
Spectroscopic and theoretical studies of the $OCO\cdots HF$ complex in pressurized gases, 3473
Microwave spectra of monohalogenated allenes. Chloroallene and iodoallene, 4889

Rotation anisotropy
Rotation anisotropy by second harmonic generation of II–VI epilayers on a GaAs ⟨100⟩ substrate: Bare CMT and CdS on CMT, 4061

Rotation–vibration spectroscopy
Spectroscopic and theoretical studies of the

OCO···HF complex in pressurized gases, 3473

Rubidium bromoacetate
Thermochemical reactivity of a solvate crystal studied by thermal analysis and *in situ* X-ray absorption spectroscopy, 5035

Ruthenium
Intramolecular triplet energy transfer in alkyne-bridged Ru—Os multinuclear complexes: switching between dipole–dipole and electron-exchange mechanisms, 2223
Photosensitized charge separation using ruthenium(II) complex-containing polymers in MeOH, 3599
Configuration-dependent electron hopping between equivalent ligands in isomeric ruthenium(II) complexes, 4227
Kinetic study of the reaction of Ru(a $^5F_2$) with N_2O and O_2 from 296 to 623 K, 4377

Ruthenium tetroxide
Kinetic study of the ruthenium catalysed oxidation of styrene and substituted styrenes, 3643

Rutile
Exact analytical solution for the powder pattern of orthorhombic-*g* systems. Predicted EPR powder spectrum and application to powder $TiO:Cr^{3+}$ in the rutile phase, 2303
^{1}H NMR spectroscopy of titania. Chemical shift assignments for hydroxy groups in crystalline and amorphous forms of TiO_2, 2791

Rydberg state
Angular-resolved desorption of potassium ions from basal graphite surfaces. Ionization of Rydberg species from adsorbed and molecular beam supplied atoms, 4581

Salt effect
Salt effect on *p*-nitrophenol at the water surface: A surface second harmonic generation study, 4993

Salt exclusion parameter
Donnan equilibria of simple electrolytes in polyelectrolyte solutions, 3117

Salt transfer
Theory for solvent and salt transfer accompanying redox switching of electroactive polymers under permselective and non-permselective conditions. Part 1.—Complete redox switching, 4087

SAPO
Dependence of ethene dimerization activity and selectivity on Ni^{2} in ion-exchange *vs.* framework sites in SAPO-5 and SAPO-11 materials, 1429
Characterization of SAPO-11 synthesized conventionally and in the presence of fluoride ions, 2017

Sauerbrey equation
Influence of swelling phenomena on mobile species transfer during redox switching of $[Os(bipy)_2(PVP)_{10}Cl]^+$ films in mixed solvent electrolytes, 4121

Scanning electrochemical microscopy
Scanning electrochemical microscopy (SECM) study of pH changes at Pt electrode surfaces in Na_2SO_4 solution (pH 4) under potential cycling conditions, 3791
Probing the oxidative etching kinetics of metals with the feedback mode of the scanning electrochemical microscope, 3799

Scanning electron microscopy
Dynamics of bimetallic Ni–Cu catalysts, 2291
Template preparation of nanoelectrode ensembles. Achieving the 'pure-radial' electrochemical-response limiting case, 4029

Scanning force microscopy
Dynamic scaling analysis of scanning force microscopy images of electrochemically formed polyaniline films in the oxidized form. Scale-dependent roughening kinetics, 4093

Scanning tunnelling microscopy
Orientation and electrocatalysis of riboflavin adsorbed on carbon substrate surfaces, 1913
Computer simulation of the surface structures of WO_3, 2049
Symmetry or asymmetry of k_{ET} and i_{STM} *vs.* potential curves, 3905

Scavenger
Pulse and γ-radiolysis of concentrated perchloric acid solutions, 2245

Schiff base
Photocatalytic transfer hydrogenation of Schiff bases with propan-2-ol by suspended semiconductor particles loaded with platinum deposits, 4291

Schottky barrier
Electrochemical reduction *vs.* vapour deposition for n-GaAs/Cu Schottky-barrier formation: A comparative study, 4069

Second harmonic generation
Investigation of transport across an immiscible liquid/liquid interface. Electrochemical and second harmonic generation studies, 1369
Langmuir–Blodgett film and second harmonic generation of a new type of amphiphilic non-linear optical bis-chromophore complex dye, 2585
Resonant-surface second-harmonic generation studies of phenol derivatives at air/water and hexane/water interfaces, 3079
Electrochemical and second harmonic generation study of bromide adsorption at the Au(111) electrode surface, 3737
Polaron effects on electronic properties of metal/medium interfaces. Part 2.—Electrified interfaces: *in situ* second harmonic generation, 4005
Rotation anisotropy by second harmonic generation of II–VI epilayers on a GaAs ⟨100⟩ substrate: Bare CMT and CdS on CMT, 4061

Sedimentation coefficient
Solubilisation of α-chymotrypsin by water-in-oil microemulsions. An analytical ultracentrifugation study, 73

SEEPR
Electrochemical, EPR and AM1 studies of acetylenic and ethylenic carotenoids, 1757

Selectivity
Effect of adsorption geometry on the selectivity of carbonyl group hydrogenation on Pd/SiO_2, 1595

Self-assembled monolayer
Synthesis of *N*-(*n*-octyl)-*N'*-(10-mercaptodecyl)-4,4'-bipyridinium dibromide and electrochemical behaviour of its monolayers on a gold electrode, 1001
Photo-oxidation and photo-reduction in alkylthiol monolayers self-assembled on gold, 3629
Electrochemical *in situ* FT-IRRAS studies of a self-assembled monolayer of 2-(11-mercaptoundecyl)hydroquinone, 3813
Electron-transfer kinetics of ferrocene alkanethiolate monolayers in ether and polyether solvents, 3941
Ageing of alkanethiol self-assembled monolayers, 4759

Self-association
NMR study of the influence of urea on the self-association of propan-1-ol in water and comparison with Kirkwood–Buff integral results, 35
Stacking interactions between caffeine and methyl gallate, 231
^{1}H NMR investigation of self-association of aromatic drug molecules in aqueous solution. Structural and thermodynamical analysis, 383
Attenuated total reflection Fourier-transform IR spectroscopic study of dimethyl sulfoxide self-association in acetonitrile solutions, 3333
Effect of cyclisation on the self-association behaviour of block copolymers in aqueous solution. Comparison of oxyethylene/oxybutylene block copolymers *cyclo*-$B_{27}E_{144}$ and $E_{72}B_{27}E_{72}$, 5021

Self-consistent field theory
Self-consistent field theory for wetting of binary polymer–solvent mixtures on rigid and soft interfaces, 579

Self-diffusion coefficient
Interaction of cetyltrimethylammonium chloride micelles under static and hydrodynamic conditions, 4541

Self-ignition
Self-ignition of solids with diminishing reaction rates. Exact comparison between the results predicted using time-dependent and surface-oxygen absorption-dependent reaction rate, 2977

Self-radiolysis
^{57}Fe emission Mössbauer study of electron capture after-effects in ^{57}Co-doped diaquadiformato complexes of the first transition series, 117

Self-reaction
Kinetic studies of the allylperoxyl radical self-reaction and reaction with HO_2, 201

Semiconductor
Semiconductor photocatalysis. Part 20.—Role of surface in the photoreduction of carbon dioxide catalysed by colloidal ZnS nanocrystallites in organic solvent, 2401
Thermal, structural and optical properties of {CdS}–$Na_{ee}X$ composites, 2651
Mechanistic aspects of the electrodeposition of stoichiometric CdTe on semiconductor substrates, 4077
Resolving combustible gas mixtures using gas sensitive resistors with arrays of electrodes, 4497
Surface modification of CdS quantum dots with fluorinated thiophenol, 4575

Semiconductor/electrolyte interface
Interpretation and use of Mott–Schottky plots at the semiconductor/electrolyte interface, 4083

Semi-empirical calculation
Semiempirical and spectroscopic study of the thermolysis of tetranitromethane, 363
Determination of cohesion parameters for terpenoids such as 1,8-cineole using semi-empirical methods and calculations based on group contributions, 753

Semiquinone
Thermodynamics of semiquinone disproportionation in aqueous buffer, 4965

Separation selectivity
Separation of close-boiling hydrocarbons with silicalite zeolite membranes, 2499

SEXAFS
Surface structure determinations using X-ray absorption spectroscopy, 1653

Shear viscosity
Shear viscosities of binary mixtures of pyrrolidin-2-one with C_6–C_{10} *n*-alkan-1-ols, 219

Shock-synthesized heterodiamond
Heat resistance of a shock-synthesized B–C–N heterodiamond, 5067

Shock tube
Oxidation rates of soot particulates by oxygen in the temperature range 1500–3500 K determined using a shock tube, 4159

Shock wave
High-temperature oxidation of ethylene oxide in shock waves, 715

Shrinking gel
Simple thermodynamics of macroscopic phase separation in shrinking gels, 1537

Sickle cell
Effect of A3[6]$\beta^{Glu\rightarrow Val}$ mutation on reactivity of the CysF9[93]β sulfhydryl group of human haemoglobin S, 1739

Silacyclobutane
Time-resolved study of the transients produced in the CO_2 and ArF laser flash photolysis of gaseous silacyclobutane and 1,3-disilacyclobutane, 179
Corrigendum to Time-resolved study of the transients produced in the CO_2 and ArF laser flash photolysis of gaseous silacyclobutane and 1,3-disilacyclobutane, 2503

Silane
Kinetic studies of the reaction of Cl atoms with SiH_4, 3299

Silanol group
Surface silanol groups of mesoporous silica FSM-16, 1985

Silazane
Synthesis of a polysilazane layer on silica gel by chemical surface coating, 4285

Silica
^{29}Si magic-angle spinning NMR study of Phillips catalysts: multi-exponential spin–lattice relaxation resulting from adsorption of paramagnetic chromium species onto a silica surface, 453
Preparation of supported vanadium oxide catalysts. Adsorption and thermolysis of vanadyl acetylacetonate on a silica support,

843
Crystal impedance: A new technique for monitoring the sol–gel process, 1079
CO_2 insertion into ion-bombarded porous silica, 2453
Small-pore aluminium phosphate molecular sieves with chabazite structure. Incorporation of magnesium in structures -34 and -44, 2481
^1H NMR spectroscopy of titania. Chemical shift assignments for hydroxy groups in crystalline and amorphous forms of TiO_2, 2791
Silica gel
Characterization and quantification of the NH_3 modification of a BCl_3-treated silica gel surface, 679
$FeSbO_4$ phase formed at the surface of antimony(v) oxide grafted on silica gel, 1569
Synthesis of a polysilazane layer on silica gel by chemical surface coating, 4285
Role of anions in the complex formation of crown ethers with ammonium ions chemically bonded on silica gel, 4977
Silicalite
Spectroscopic studies of vanadium-substituted zeolitic silicates of MFI topology, 1067
Separation of close-boiling hydrocarbons with silicalite zeolite membranes, 2499
Catalytic testing of TiO_2/platinum/silicalite-1 composites, 4609
Silica support
FT-Raman spectroscopic study of the active sites on silica-supported $ZnCl_2$ catalyst, 1027
Effect of alkali-metal promoter on silica-supported copper catalysts in benzyl alcohol oxidation, 2631
FTIR study of the adsorption of chromium carbonyl complexes on silica, 5093
Characterization of $H_4PMo_{11}VO_{40}$ heteropolyacid on SiO_2 and SiC supports, 5103
Siliceous faujasite
Embedding nano-clusters in siliceous faujasite, 2093
Silicoaluminophosphate
Dependence of ethene dimerization activity and selectivity on Ni^{II} in ion-exchange *vs.* framework sites in SAPO-5 and SAPO-11 materials, 1429
Silicon carbide support
Characterization of $H_4PMo_{11}VO_{40}$ heteropolyacid on SiO_2 and SiC supports, 5103
Silicon electrode
Microwave photoelectrochemical studies of silicon interfaces covered with platinum dots, 4053
Silicon nitroxide
Isomerism and spin–vibronic energy levels of silicon nitroxide, 4361
Silicon tetrachloride
Mechanism of the silicide-catalysed hydrodehalogenation of silicon tetrachloride to trichlorosilane, 4605
Silver
A potential-pulse interference method for studies of the nucleation of a single silver centre on carbon microelectrodes, 2389
Bromide electrosorption on the low-index faces of silver, 3747
Silver(110) surface
Reflection–absorption IR spectrum of chlorine adatoms on the silver(100) surface, 879
Hydrogen bonding and surface interactions in protic solvents. Coadsorption of ammonia and hydrogen fluoride with water on silver(110), 2445
Silver adsorption
Irreversibly adsorbed silver on Pt(111) and transformation of the electrosorption behaviour induced by thermal annealing, 3777
Silver electrode
Interfacial solvent structure in butan-1-ol, butan-2-ol and 2-methylpropan-1-ol at Au and Ag electrodes from surface enhanced Raman scattering and capacitance measurements, 3683
Adsorption of pyrazine on Au(111) and Ag(111) electrodes. An *ex situ* XPS study, 3785
Silver film
Roughening of thin silver films in aqueous electrolytes, 2381
Single-crystal electrode
Electrooxidation of hypophosphite on single-crystal nickel electrodes: An *in situ* IR study, 4663
Single-crystal neutron diffraction
A single-crystal neutron diffraction study of the temperature dependence of hydrogen-atom disorder in benzoic acid dimers, 5051
Sintering
Modelling of sintering kinetics of naphtha-reforming Pt/Al_2O_3-Cl catalysts, 2637
Site selectivity
Site selectivity of argon–methane co-adsorbed in mordenite as studied by NMR, 4601
Size non-additivity
A simple model for size non-additive mixtures, 4943
Slurry FTIR spectroscopy
Thermal decomposition of ettringite $Ca_6[Al(OH)_6]_2(SO_4)_3 \cdot 26H_2O$, 2125
Small-angle neutron diffraction
Use of contrast matching small-angle neutron scattering to monitor the presence of closed porosity in controlled porosity styrene–divinylbenzene resins, 2607
Small-angle neutron scattering
Structure in microemulsions of di-chained surfactants, 65
Small-angle neutron scattering studies of sodium dodecyl sulfate interactions with gelatin. Part 2.—Effect of temperature and pH, 595
Effect of the addition of *n*-alkylamines on the growth of sodium dodecyl sulfate micelles, 2413
Corrigendum to Effect of the addition of *n*-alkylamines on the growth of sodium dodecyl sulfate micelles, 5185
Small-angle X-ray scattering
Influence of treatment with sulfuric acid on the angularity of a zirconia system, 451
Evaluation of accessible and inaccessible microporosities of microporous carbons, 2297
Corrigendum to Influence of treatment with sulfuric acid on the angularity of a zirconia system, 2503
Small-angle scattering study of aqueous gels of sodium lithocholate, 3157
Smoluchowski theory
Kinetic evidence for steric destabilization of casein by rennet enzyme activity, 2575
SNIFTIRS
Electrooxidation of hypophosphite on single-crystal nickel electrodes: An *in situ* IR study, 4663
SnO_2 electrode
Photoelectric response from a stilbazolium dye in a Langmuir–Blodgett film-modified SnO_2 electrode, 3131
Sodium chloride
Ternary mutual diffusion coefficients and densities of the system $\{z_1NaCl + (1 - z_1)Na_2SO_4\}(aq)$ at 298.15 K and a total molarity of 0.5000 mol dm^{-3}, 4187
Sodium dodecyl sulfate
Basicity of amides in water and in aqueous micellar solutions of SDS. Their influence on micellar structure, 1205
Effect of the addition of *n*-alkylamines on the growth of sodium dodecyl sulfate micelles, 2413
Corrigendum to Effect of the addition of *n*-alkylamines on the growth of sodium dodecyl sulfate micelles, 5185
Sodium sulfate
Ternary mutual diffusion coefficients and densities of the system $\{z_1NaCl + (1 - z_1)Na_2SO_4\}(aq)$ at 298.15 K and a total molarity of 0.5000 mol dm^{-3}, 4187
Sol–gel process
Influence of tungsten oxide on structural and surface properties of sol–gel prepared TiO_2 employed for 4-nitrophenol photodegradation, 819
Crystal impedance: A new technique for monitoring the sol–gel process, 1079
Synthesis of (La, Sr)CoO_3 perovskite films *via* a sol–gel route and their physicochemical and electrochemical surface characterization for anode application in alkaline water electrolysis, 2593
Solid acid sites
Changes in the acidic properties of pillared taeniolites on heat treatment of alkene decomposition, 4631
Solid electrolyte
Oxidative coupling of CH_4 using alkali-metal ion conductors as a solid electrolyte, 2393
Electrochemical removal of NO and CH_4 in the presence of excess O_2, H_2O and CO_2 using Sm_2O_3-doped CeO_2 as a solid electrolyte, 4297
Solid solution
Evidence for different copper species in precursors of copper–cerium oxide catalysts for hydrogenation reactions. An X-ray diffraction, EPR and X-ray photoelectron spectroscopy study, 131
XPS and EPR study of high and low surface area CoO–MgO solid solutions: Surface composition and Co^{2+} ion dispersion, 4567
Solid-state NMR spectroscopy
Synergistic effect of zeolite in an intumescence process: Study of the carbonaceous structures using solid-state NMR, 149
NMR studies of correlations between molecular motions and liquid-crystalline phase transitions in two hydrogen-bonded carboxylic acid–pyridyl complexes. Part 2.—The alkyl regions, 811
Structural and dynamic properties of the 1,10-dibromodecane/urea inclusion compound, investigated by variable-temperature powder X-ray diffraction, solid-state ^2H NMR lineshape analysis and solid-state ^2H NMR spin–lattice relaxation time measurements, 2179
Synergistic effect of zeolite in an intumescence process. Study of the interactions between the polymer and the additives, 3435
Solid-state solution
Characteristics of transition metal oxide doping of YSZ: Structure and electrical properties, 2173
Solubilisation site
Effects of fluorocarbon and hydrocarbon anionic micelles on the kinetics of water replacement in the palladium(II) aquocomplex of 1,1,7,7-tetraethyldiethylenetriamine by monoalkylthioureas, 2263
Solubility
Thermodynamic study of the ternary system NaCl–H_2O–Et_3N at 25 °C. Part 3.—Solubilities, 1487
Thermodynamic investigation of the effect of the mutual miscibility of some higher alkanols and water on the partitioning and solubility of some guanine derivatives, 1721
Solution chemistry
Dependence of the cooperativity of hydrophobic interactions on the nature of functional groups. A microcalorimetric study of binary aqueous solutions of α,ω-difunctional compounds at 298.15 K, 3093
Solution/solid interface
Evanescent wave-induced fluorescence study of Rhodamine 101 at dielectric interfaces, 4723
Solution thermodynamics
Thermochemical and volumetric properties of aqueous urea systems. Heat capacities and volumes of transfer from water to urea–water mixtures for some 1:1 electrolytes at 298.15 K, 207
Solution equilibria of gallium(III) and indium(III) complexes with halide and thiocyanate ions in *N*,*N*-dimethylformamide, 2715
Solvate compound
Thermochemical reactivity of a solvate crystal studied by thermal analysis and *in situ* X-ray absorption spectroscopy, 5035
Solvation
Preferential solvation studied by the fluorescence lifetime of acridine in water–alcohol mixtures, 227
Ab initio molecular orbital calculations of solvent clusters of *trans*-*N*-methylacetamide: Structure, ring cluster formation and out-of-plane deformation, 921
UV–VIS spectroscopic study of preferential

solvation in mixed binary solvents at various temperatures, 1499
Preferential solvation in binary mixtures. Comparison between the quasi-lattice quasi-chemical model and the stepwise solvent exchange model, 2569
Solvation-controlled clustering of a phenol–pyridine acid–base pair, 3339
Effect of solvent on the reactions of coordination complexes. Part 21.—Base hydrolysis of some *cis*-(halogeno)(amine)bis(ethylenediamine)cobalt(III) complexes in methanol–water media: The role of substrate hydrophobicity and solvent structure, 3353
Spectroscopic study of the solvation of dimethyl sulfoxide in aqueous acetonitrile and acetone solvent systems, 4395

Solvent cluster
Ab initio molecular orbital calculations of solvent clusters of *trans*-*N*-methylacetamide: Structure, ring cluster formation and out-of-plane deformation, 921

Solvent effect
Study of the effect of solvent on the morphology of crystals using molecular simulation: Application to α-resorcinol and *N*-*n*-octyl-D-gluconamide, 1023
Steric solvent effect on formation thermodynamics and structure of halogeno complexes of lanthanide(III) ions in *N*,*N*-dimethylacetamide, 1869
Solvent effects on the fluorescence quenching rate constant of an intramolecular exciplex by poly(chlorobenzenes), 3327
Solvent effects in simple fast electron transfer reactions, 3899

Solvent property
Ionic partial molar heat capacities in non-aqueous solvents, 757

Solvent transfer
Theory for solvent and salt transfer accompanying redox switching of electroactive polymers under permselective and non-permselective conditions. Part 1.—Complete redox switching, 4087

Sonoluminescence
Sonoluminescence of chelated terbium(III) in aqueous solution, 2529

Soot
Oxidation rates of soot particulates by oxygen in the temperature range 1500–3500 K determined using a shock tube, 4159

Spatiotemporal evolution
Wave-induced chaos in a continuously fed unstirred reactor, 2911

Spectroelectrochemistry
Interpretation of ^{59}Co NMR shielding using the hard and soft acid–base concept. Insight into the relative magnitude of the nephelauxetic and the spectrochemical effect, 1121
UV–VIS–NIR and Raman spectroelectrochemistry of regioregular poly(3-octylthiophene): Comparison with its non-regioregular analogue, 1387
Structure, EPR and UV–VIS and IR spectroelectrochemistry of reversibly reducible compounds $[(C_5Me_5)IrCl(L)](PF_6)$, L = 1,3-dimethyllumazine or 1,3-dimethylalloxazine, 4233

Spectrofluorimetry
Basicity of amides in water and in aqueous micellar solutions of SDS. Their influence on micellar structure, 1205

Spectrophotometry
Temperature dependence of dissociation constants for formic acid and 2,6-dinitrophenol in aqueous solutions up to 175 °C, 4951

Spectroscopic constant
Rotational spectrum and molecular properties of the dinitrogen–chlorine monofluoride complex, 2671
The rotational constant A_0 and planarity of the hydrogen-bonded complex $H_2CO\cdots HCl$, 2677

Specular neutron reflection
Composition of mixed surfactant–polymer layers adsorbed at the air/water interface as determined by specular neutron reflection, 589
Structure of the mixed cationic–non-ionic surfactant monolayer of hexadecyltrimethylammonium bromide and monododecyl hexaethylene glycol at the air/water interface, 1549

Spin–echo modulation spectroscopy
Generation of ion-exchange capacity by silicon incorporation into the aluminophosphate VPI-5/$AlPO_4$-8 molecular sieve system, 3661

Spinel
Cation valence charge states of $MnFe_2O_4$: An *ab initio* Hartree–Fock study, 2043
Electrocatalytic properties of spinel-type $Mn_xFe_{3-x}O_4$ synthesized below 100 °C for oxygen evolution in KOH solutions, 2397
Corrigendum to Cation valence charge states of $MnFe_2O_4$: An *ab initio* Hartree–Fock study, 4661

Spin–glass
Structure and magnetism of hydronium jarosite, a model Kagomé antiferromagnet, 2161

Spin labelling
Dynamics of spin-labelled α-chymotrypsin in reverse micelles of differently charged surfactants, 3151

Spin–lattice relaxation
Proton magnetic resonance of C_nH_{2n+2} (n = 1–4) adsorbed in mordenite. Dynamic behaviour and host–guest interaction, 1039
Hydration of amines, diamines, polyamines and amides studied by NMR, 1853
Structural and dynamic properties of the 1,10-dibromodecane/urea inclusion compound, investigated by variable-temperature powder X-ray diffraction, solid-state ^{2}H NMR lineshape analysis and solid-state ^{2}H NMR spin–lattice relaxation time measurements, 2179
Site selectivity of argon–methane co-adsorbed in mordenite as studied by NMR, 4601
^{7}Li nuclear magnetic spin–lattice relaxation investigation of lithium trifluoromethanesulfonate and its complex with poly(ethylene oxide), 5043

Spin–orbit component
Stern–Gerlach study of nitric oxide, 329

Spin-relaxation inversion
Spin conversion in mixed ammonium–potassium halide systems, 4367

Spin–vibronic energy level
Isomerism and spin–vibronic energy levels of silicon nitroxide, 4361

Spiral wave
Vulnerability and spiral-wave evolution in the Belousov–Zhabotinsky reaction on a membrane surface, 325
Transition between circular fronts and spiral waves in marginally excitable media, 2897

Spiropyran
Anodic oxidation mechanism of a spiropyran, 3991

Squaraine
Geometry and molecular parameters of 3,4-bis(dimethylamino)-3-cyclobutene-1,2-dione and its isomer bis(dimethylamino)squaraine. Combined study by IR spectroscopy, XRD and *ab initio* MO calculations, 3611
Photochemistry of squaraine dyes. Part 10.—Excited-state properties and photosensitization behaviour of an IR sensitive cationic squaraine dye, 4913

Square-wave voltammetry
Electron transfer kinetics for weakly bonded, labile metal–ligand complexes, 3969

$SrTiO_3$
Chemical transport in mixed conductors: Application to the model materials $SrTiO_3$ and ZrO_2, 2143

Stability constant
Quantitative study of the interactions of ATP with amines and amino acids, 1511
Quantitative investigation of the interactions between inositol-tris(phosphates) and polyamines, 3101
Binding of carboxylic ligands by protonated amines, 4219

Stannate
Oxidation catalysts: A comparative simulation study of the lattice, defect and surface structure of the stannates $ASnO_3$ (A = Ca, Sr and Ba) and SnO_2, 2057

Steady-state emission
Energy transfer and photodecomposition of anthracene laser dyes, 2685

Steam
Ionic aggregates in steam. Part 1.—Equilibrium configurations, 2703

Stepped surface
Induced adsorption of sulfate/bisulfate anions by submonolayer amounts of copper on deliberately stepped Pt surfaces, 3757

Stepwise solvent exchange model
Preferential solvation in binary mixtures. Comparison between the quasi-lattice quasi-chemical model and the stepwise solvent exchange model, 2569

Stern–Gerlach spectroscopy
Stern–Gerlach study of nitric oxide, 329
Magnetism in oxygen clusters. Study of pure and mixed clusters of oxygen by Stern–Gerlach spectroscopy, 1319

Sticking probability
Molecular beam studies of the interaction of oxygen with silver surfaces, 2319

Stilbazolium
Photoelectric response from a stilbazolium dye in a Langmuir–Blodgett film-modified SnO_2 electrode, 3131

Stokesian dynamics
Stokesian sphere simulations of suspension rheology, 657

Strong metal–support interaction
Influence of strong metal–support interaction on exchange with deuterium and other reactions of hydrocarbons. Part 2.—Studies with Pt/Nb_2O_5 and Rh/Nb_2O_5, 281

Strontium hydroxyapatite
Effects of fine structure changes of strontium hydroxyapatites on ion-exchange properties with divalent cations, 4305

Structure
Examination of the structure and melting behaviour of thin film *n*-alkanes using ultra-soft polarised near-edge X-ray absorption spectroscopy, 783

Structure change
Electrochemical *in situ* FT-IRRAS studies of a self-assembled monolayer of 2-(11-mercaptoundecyl)hydroquinone, 3813

Structure determination
Surface structure determinations using X-ray absorption spectroscopy, 1653
Constrained Rietveld refinement of [β-$^1H_1$]decadeuteriodopamine deuteriobromide using powder neutron diffraction data, 4555

Structure sensitivity
Structure-sensitivity study of partial propene oxidation over $AV_2P_2O_{10}$ vanadium phosphate compounds, 1423

Styrene
Kinetic study of the ruthenium catalysed oxidation of styrene and substituted styrenes, 3643

Subnitride
Subnitrides with the new cluster $Ba_{14}CaN_6$, 2117

Substitution
Characterization of SAPO-11 synthesized conventionally and in the presence of fluoride ions, 2017

Sulfamate
Pulse-plating of copper–nickel alloys from a sulfamate solution, 4015

Sulfate electrolyte
Galvanostatic pulse and pulse reverse plating of zinc–nickel alloys from sulfate electrolytes on a rotating disc electrode, 4021

Sulfhydryl
Effect of A3[6]$\beta^{Glu\rightarrow Val}$ mutation on reactivity of the CysF9[93]β sulfhydryl group of human haemoglobin S, 1739

Sulfur dioxide
Reaction between gaseous sulfur dioxide and solid calcium oxide. Mechanism and kinetics, 1227

Sulfuric acid
Influence of treatment with sulfuric acid on the angularity of a zirconia system, 451
Corrigendum to Influence of treatment with sulfuric acid on the complexity of a zirconia system, 2503

Sulfur–sulfur bond
Experimental and theoretical studies of the charge-density distribution in 3,3,6,6-

tetramethyl-*S*-tetrathiane, 1709
Sulfur trioxide
Kinetics of the reaction between gaseous sulfur trioxide and solid calcium oxide, 1239
Sum-frequency generation
Structural phase transitions of small molecules at air/water interfaces, 539
Structural phase transition of a dodecan-1-ol monolayer at the solid/liquid interface studied by sum-frequency spectroscopy, 573
Investigation of the vibrational properties of CN^- on a Pt electrode by *in situ* VIS–IR sum frequency generation and functional density calculations, 3823
Sum rule
A sum rule for symmetries and isomer counts of trivalent polyhedra, 4145
Supercluster
Thermal, structural and optical properties of {CdS}–$Na_{8.6}X$ composites, 2651
Superconductor
Magnetic structure of $La_{1.2}Tb_{0.8}CuO_4$, 2151
Structural properties of A_2SnO_4 (A = Ba,Sr). A neutron diffraction study, 2155
Supercooled liquid
Conductivity of maltose–water–KCl mixtures in the supercooled liquid and glassy states, 1921
Supercritical fluid
Photochemistry in modified supercritical carbon dioxide. Effect of modifier concentration on diffusion probed by triplet–triplet energy transfer, 1467
Electrochemical investigations in supercritical carbon dioxide, 3895
Superhyperfine interaction
ENDOR investigation of S_2^-, SSe^- and Se_2^- defects in NaCl, 1579
Superlattice
Manganese(II) in superlattices consisting of alternate cadmium telluride and zinc sulfide layers, 4247
Designing of quasi-one-dimensional compositional superlattices of donor–acceptor polymers, 5017
Supersaturation
Unstable supersaturated solutions of gases in liquids and nucleation theory, 2843
Supersonic jet
A new discharge nozzle for spectroscopic studies in supersonic jets, 3023
Supported catalyst
Influence of strong metal–support interaction on exchange with deuterium and other reactions of hydrocarbons. Part 2.—Studies with Pt/Nb_2O_5 and Rh/Nb_2O_5, 281
Compensation behaviour in the hydrogenation of benzene, toluene and *o*-xylene over Ni/SiO_2. Determination of true activation energies, 1413
Metal–support interaction in Pd/CeO_2 catalysts. Part 2.—Ceria textural effects, 1603
Effect of potassium addition to the TiO_2 support on the structure of V_2O_5/TiO_2 and its catalytic properties in the oxidative dehydrogenation of propane, 1609
Raman spectroscopy of supported chromium oxide catalysts. Determination of chromium–oxygen bond distances and bond orders, 1969
Surface
Grazing incidence surface scattering of X-rays, 505
Characterization and quantification of the NH_3 modification of a BCl_3-treated silica gel surface, 679
Surface electrochemical transformations on spinel iron oxide electrodes in aqueous solutions, 3371
Surface analysis
Photo-oxidation and photo-reduction in alkylthiol monolayers self-assembled on gold, 3629
Surface basicity
Use of pyrrole as an IR spectroscopic molecular probe in a surface basicity study of metal oxides, 123
Surface chemistry
Surface organometallic chemistry of tin. Controlled thermal transformation *in vacuo* of $Sn(n\text{-}C_nH_9)_3$ fragments grafted on the surface of alumina, 3419
Angular-resolved desorption of potassium ions from basal graphite surfaces. Ionization of Rydberg species from adsorbed and molecular beam supplied atoms, 4581
Adsorption, desorption, monolayer structure and dynamics of C_2H_4 on Cu(001), 4749
Surface chemistry of V–Sb–oxide in relation to the mechanism of acrylonitrile synthesis from propane. Part 1.—Chemisorption and transformation of possible intermediates, 5141
Surface chemistry of V–Sb–oxide in relation to the mechanism of acrylonitrile synthesis from propane. Part 2.—Reactivity towards ammonia and relationship with catalytic behaviour, 5151
Surface complex
Effects of ageing on the oxygen surface complexes of an oxidized activated carbon, 2779
Surface energy
Computer simulation of the surface structures of WO_3, 2049
Surface enhanced Raman scattering
Interfacial solvent structure in butan-1-ol, butan-2-ol and 2-methylpropan-1-ol at Au and Ag electrodes from surface enhanced Raman scattering and capacitance measurements, 3683
Probing electrode/electrolyte interfacial structure in the potential region of hydrogen evolution by Raman spectroscopy, 3829
On the role of charge-transfer resonances in the chemical mechanism of surface-enhanced Raman scattering, 4775
Surface functional group
FTIR studies on the spectral changes of the surface functional groups of ultradispersed diamond powder synthesized by explosive detonation after treatment in hydrogen, nitrogen, methane and air at different temperatures, 3401
Surface hydration
Surface characterization of modified aluminas. Part 4.—Surface hydration and Lewis acidity of CeO_2–Al_2O_3 systems, 1991
Surface interaction
Hydrogen bonding and surface interactions in protic solvents. Coadsorption of ammonia and hydrogen fluoride with water on silver(110), 2445
Surface modification
Synthesis of a polysilazane layer on silica gel by chemical surface coating, 4285
Surface modification of CdS quantum dots with fluorinated thiophenol, 4575
CO-induced removal of the Pt{100}-hex reconstruction studied by RAIRS, 4781
Surface potential
Adsorption of DMSO at the free surface of water: Surface excesses and surface potential shifts in the low concentration range, 3873
Surface reconstruction
Adsorption of benzenesulfonate anions at an Au(111) electrode: Application to study of the reconstruction phenomenon of the Au(100) surface, 3763
Surface roughening
Roughening of thin silver films in aqueous electrolytes, 2381
Surface science
Metal films and particles on oxide surfaces: Structural, electronic and chemisorptive properties, 1435
Chemical interaction between plasma-excited nitrogen and the surface of HY zeolite, 1643
Surface second-harmonic generation
Phenomenological three-layer model for surface second-harmonic generation at the interface between two centrosymmetric media, 4547
Salt effect on *p*-nitrophenol at the water surface: A surface second harmonic generation study, 4993
Surface stress measurement
Measuring surface stress induced by electrode processes using a micromechanical sensor, 3807
Surface structure
Computer simulation of the surface structures of WO_3, 2049
Oxidation catalysts: A comparative simulation study of the lattice, defect and surface structure of the stannates $ASnO_3$ (A = Ca, Sr and Ba) and SnO_2, 2057
On the role of charge-transfer resonances in the chemical mechanism of surface-enhanced Raman scattering, 4775
Surface tension
Adsorption of DMSO at the free surface of water: Surface excesses and surface potential shifts in the low concentration range, 3873
Bulk and surface properties for the methanol–1,1-dimethylpropyl methyl ether and methanol–1,1-dimethylethyl methyl ether systems, 4435
Surface transport
Experimental verification of a proposed unified formulation of adsorbate transport in mesoporous media over the full vapour pressure range, 3217
Surface vibration
Recent advances in electron energy loss spectroscopy of surface vibrations, 4771
Surface viscoelasticity
Surface viscoelasticity of a foam-forming solution, 611
Surfactant
Structure in microemulsions of di-chained surfactants, 65
Sum-frequency vibrational spectroscopy of soluble surfactants at the air/water interface, 515
Composition of mixed surfactant–polymer layers adsorbed at the air/water interface as determined by specular neutron reflection, 589
Small-angle neutron scattering studies of sodium dodecyl sulfate interactions with gelatin. Part 2.—Effect of temperature and pH, 595
Surface viscoelasticity of a foam-forming solution, 611
Structure of the mixed cationic–non-ionic surfactant monolayer of hexadecyltrimethylammonium bromide and monododecyl hexaethylene glycol at the air/water interface, 1549
Susceptibility tensor gradient
Phenomenological three-layer model for surface second-harmonic generation at the interface between two centrosymmetric media, 4547
Suspension
Stokesian sphere simulations of suspension rheology, 657
Swelling
Thermal and osmotic deswelling of poly(NIPAM) microgel particles, 3385
Influence of swelling phenomena on mobile species transfer during redox switching of $[Os(bipy)_2(PVP)_{10}Cl]^+$ films in mixed solvent electrolytes, 4121
Symmetry
A sum rule for symmetries and isomer counts of trivalent polyhedra, 4145
Synchrotron radiation
Temperature-dependent structural properties of the chlorocyclohexane/thiourea inclusion compound investigated by synchrotron X-ray powder diffraction, 273
Intermicellar interaction of ganglioside aggregates and structural stability on pH variation, 4533
Taeniolite
Changes in the acidic properties of pillared taeniolites on heat treatment of alkene decomposition, 4631
Tantalum sulfide
Core and valence spectra of TaS_2 and WS_2. Experimental and theoretical studies, 4561
Tao–Eldrup formula
Positrons in resorcinol, 1573
Taurine
Oxyhalogen–sulfur chemistry: Non-linear oxidation of 2-aminoethanethiolsulfuric acid (AETSA) by bromate in acidic medium, 4407
Taylor dispersion
Translational diffusion of chemically stable and reactive radicals in solution, 3057
TCNQ
Electrochemical and X-ray diffraction study of the redox cycling of nanocrystals of 7,7,8,8-tetracyanoquinodimethane. Observation of a solid–solid phase transformation controlled

by nucleation and growth, 3925
Teeth primordia
On a dynamic reaction–diffusion mechanism: The spatial patterning of teeth primordia in the alligator, 2927
Temperature effect
Temperature effects on dual emission from ion pairs produced by excited-state proton transfer in the 1-naphthol–triethylamine system, 1481
Temperature-programmed desorption
Effects of ageing on the oxygen surface complexes of an oxidized activated carbon, 2779
Textural, structural and acid properties of a catalytically active mesoporous aluminosilicate MCM-41, 4623
Template
Synthesis of zeolite beta. Part 1.—Using tetraethylammonium hydroxide/bromide with addition of chelates as templating agents, 159
Synthesis and characterization of large-pore molecular sieves CoSAPO-36 and CoSAPO-46, 1257
Prediction of template location *via* a combined Monte Carlo–simulated annealing approach, 2063
Template preparation of nanoelectrode ensembles. Achieving the 'pure-radial' electrochemical-response limiting case, 4029
Terbium
Sonoluminescence of chelated terbium(III) in aqueous solution, 2529
Ternary system
Thermodynamics of the interaction of HCl with propan-2-ol in water at 278.15–338.15 K, 41
Thermodynamic study of the ternary system NaCl–H_2O–Et_3N at 25 °C. Part 3.—Solubilities, 1487
Thermodynamics of ternary mixtures exhibiting tunnel phase phase behaviour. Part 1.—Cyclohexane–perdeuterocyclohexane–perfluorohexane, 2255
Solution of the multiphase equilibrium problem for pure component, binary and ternary systems using the area method, 4419
Terpenoid
Determination of cohesion parameters for terpenoids such as 1,8-cineole using semi-empirical methods and calculations based on group contributions, 753
***tert*-Butyl alcohol**
Thermodynamics of the interaction of HCl with *tert*-butyl alcohol in water at 278.15–318.15 K, 3361
***tert*-Butyl radical**
Kinetic study of the reactions of *tert*-butyl radicals in the liquid phase in the presence and absence of oxygen, 3497
Tetraethylammonium ion
Ac impedance analysis of tetraethylammonium ion transfer at liquid/liquid microinterfaces, 3851
Tetranitromethane
Semiempirical and spectroscopic study of the thermolysis of tetranitromethane, 363
Tetranucleotide
Structural and thermodynamical analysis of molecular complexation by ^1H NMR spectroscopy. Intercalation of ethidium bromide with the isomeric deoxytetranucleoside triphosphates 5′-d(GpCpGpC) and 5′-d(CpGpCpG) in aqueous solution, 3545
Thermal analysis
Thermochemical reactivity of a solvate crystal studied by thermal analysis and *in situ* X-ray absorption spectroscopy, 5035
Thermal decomposition
Thermal decomposition of ettringite $Ca_6[Al(OH)_6]_2(SO_4)_3 \cdot 26H_2O$, 2125
Adsorption and thermal decomposition of $Mo(CO)_6$ on TiO_2(110), 4733
Thermal desorption
Angular-resolved desorption of potassium ions from basal graphite surfaces. Ionization of Rydberg species from adsorbed and molecular beam supplied atoms, 4581
Thermal expansion
Thermal decomposition of ettringite $Ca_6[Al(OH)_6]_2(SO_4)_3 \cdot 26H_2O$, 2125
Thermally activated delayed fluorescence
Triplet state decay of some thioketones in solution, 3487
Thermal transformation
Surface organometallic chemistry of tin. Controlled thermal transformation *in vacuo* of $Sn(n\text{-}C_4H_9)_3$ fragments grafted on the surface of alumina, 3419
Thermochemistry
Thermochemical and volumetric properties of aqueous urea systems. Heat capacities and volumes of transfer from water to urea–water mixtures for some 1 : 1 electrolytes at 298.15 K, 207
Thermochemical reactivity of a solvate crystal studied by thermal analysis and *in situ* X-ray absorption spectroscopy, 5035
Thermochromism
Interaction of side-chains in poly(3-alkylthiophene) lattices, 671
UV–VIS spectroscopic study of preferential solvation in mixed binary solvents at various temperatures, 1499
Reversible colour changes in zeolite A treated with ammonium polysulfide, 1639
Thermodynamics
Thermodynamics of the interaction of HCl with propan-2-ol in water at 278.15–338.15 K, 41
Thermodynamic study of the ternary system NaCl–H_2O–Et_3N at 25 °C. Part 2.—Compressibilities, 47
Thermodynamic studies of triangular molecules: Liquid mixtures of xenon and the boron halides, BF_3 and BCl_3, 215
Mesoporous membranes: thermo-osmotic and isothermal flows with and without capillary condensation, 235
Cyanide thermodynamics. Part 4.—Enthalpies and entropies of cyanide complexation of Cu^I, Ag^I, Zn^{II} and Cd^{II}, 641
Determination of cohesion parameters for terpenoids such as 1,8-cineole using semi-empirical methods and calculations based on group contributions, 753
Ionic partial molar heat capacities in non-aqueous solvents, 757
Vibrational frequencies, vapour pressure and an assessment of the thermodynamic properties of dimethyl telluride, 973
Molecular recognition and effects of steric and geometric isomerism. Thermodynamic study of non-bonding interations in aqueous solutions of cycloalkanols, 1149
Excess volumes and isentropic compressibilities of pyrrolidin-2-one–alkanol (C_1–C_5) binary mixtures, 1167
Thermodynamics of alkanol–alkane systems. New modifications of the ERAS model, 1175
Thermodynamics of ions of chromic and thiocyanic acids: Solvation in the ethanol–water system, 1345
Thermodynamic study of the ternary system NaCl–H_2O–Et_3N at 25 °C. Part 3.—Solubilities, 1487
Departures from ideality in pure ionic solutions using the mean spherical approximation, 1533
Simple thermodynamics of macroscopic phase separation in shrinking gels, 1537
Thermodynamic investigation of the effect of the mutual miscibility of some higher alkanols and water on the partitioning and solubility of some guanine derivatives, 1721
Steric solvent effect on formation thermodynamics and structure of halogeno complexes of lanthanide(III) ions in *N*,*N*-dimethylacetamide, 1869
Thermodynamic study of complex formation by hydrogen bonding in halogenoalkane–oxygenated solvent mixtures. Halothane with propyl ether, isopropyl ether, 1,4-dioxane and 2,5-dioxahexane, 1877
Thermodynamic study of the rare earth vapour complexes: $ScAl_2Cl_9$ and YAl_2Cl_9, 1887
Crystal and *pVT* data and thermodynamics of the phase transitions of 2-methyl-2-nitropropane, 1899
Thermodynamics of the interations of some chloro-substituted alcohols with hen egg-white lysozyme, 1905
Thermodynamics of ternary mixtures exhibiting tunnel phase behaviour. Part 1.—Cyclohexane–perdeuterocyclohexane–perfluorohexane, 2255
Ultrasonic speeds and volumetric properties of binary mixtures of water with 2-[2-(2-alkoxyethoxy)ethoxy]ethanols at 298.15 K, 2369
Prediction of the enthalpy of transfer of alkali-metal halides in binary mixtures, 2563
Preferential solvation in binary mixtures. Comparison between the quasi-lattice quasi-chemical model and the stepwise solvent exchange model, 2569
Kinetics and thermochemisty of the $R + HBr \rightleftharpoons RH + Br$ ($R = CH_2Cl$, $CHCl_2$, CH_3CHCl or CH_3CCl_2) equilibrium, 3069
Formamide–(C_1–C_4) alkan-1-ols solvent systems, 3347
Thermodynamics of the interaction of HCl with *tert*-butyl alcohol in water at 278.15–318.15 K, 3361
Response reactions in chemical thermodynamics, 3525
Molecular structure and physicochemical properties of acetone–chloroform mixtures, 3559
Thermodynamic properties of *n*-alcohol–*n*-alkane mixtures. A comparative study of some group contribution theories, 3565
Simple model for liquid/liquid interfaces, 3839
Binding of carboxylic ligands by protonated amines, 4219
Measurements and analysis of excess volumes of some alkan-2-one–1-chloroalkane mixtures using Nitta–Chao and Prigogine–Flory–Patterson models, 4453
Vitrification and structural relaxation of a water-swollen protein, wheat gluten and the thermodynamics of its water–protein ↔ ice equilibrium, 4521
Temperature dependence of dissociation constants for formic acid and 2,6-dinitrophenol in aqueous solutions up to 175 °C, 4951
Interactions between lanthanide cations and nitrate anions in water. Part 1.—Effect of the ionic strength on the Gibbs energy, enthalpy and entropy of complexation of the neodymium cation, 4957
Thermodynamics of semiquinone disproportionation in aqueous buffer, 4965
Role of anions in the complex formation of crown ethers with ammonium ions chemically bonded on silica gel, 4977
Aqueous solutions containing amino acids and peptides. Part 30.—The enthalpies of interaction of some alkali-metal halides with some amino acids at 25 °C, 4983
Thermogravimetry
Reaction between gaseous sulfur dioxide and solid calcium oxide. Mechanism and kinetics, 1227
Effect of incorporation of copper or nickel on hydrogen storage in ceria. Mechanism of reduction, 2001
Heat resistance of a shock-synthesized B–C–N heterodiamond, 5067
Thermolysis
Semiempirical and spectroscopic study of the thermolysis of tetranitromethane, 363
Thin-layer cell
Aperiodic equivalent circuit for charge permeable thin-layer cells of symmetric, asymmetric types, 3947
Thiocyanate
Open-chain and ring isomers of CN_2OS. *Ab initio* study of structures and stabilities, 333
Solution equilibria of gallium(III) and indium(III) complexes with halide and thiocyanate ions in *N*,*N*-dimethylformamide, 2715
Thiocyanic acid
Thermodynamics of ions of chromic and thiocyanic acids: Solvation in the ethanol–water system, 1345
Thioketone
Triplet state decay of some thioketones in solution, 3487
Thiophene

Interaction of side-chains in poly(3-alkylthiophene) lattices, 671
UV–VIS–NIR and Raman spectroelectrochemistry of regioregular poly(3-octylthiophene): Comparison with its non-regioregular analogue, 1387

Thiosulfate
Model for the oscillatory reaction between hydrogen peroxide and thiosulfate catalysed by copper(II) ions, 2851

Thiourea
Temperature-dependent structural properties of the chlorocyclohexane/thiourea inclusion compound investigated by synchrotron X-ray powder diffraction, 273
Electrochemical study of the interaction of thiourea with copper electrodes in alkaline aqueous solution, 2725
Comparative study of the kinetics of two-dimensional condensation of thiourea at mercury/water and mercury/ethanol interfaces, 3935

Three-body system
Quantum phase-space formulation for inelastic scattering of atom–diatomic molecules using the density operator, 1669

Three-dimensional excitable media
Cellular automaton model of three-dimensional excitable media, 2883

Threshold photoelectron spectroscopy
Threshold photoelectron spectroscopy of BCl_3 and fragmentation of the valence electronic states of BCl_3^+, studied by coincidence spectroscopies, 185
Corrigendum to Threshold photoelectron spectroscopy of BCl_3 and fragmentation of the valence electronic states of BCl_3^+, studied by coincidence spectroscopies, 1819

Tin
Characterization pf Pt–Sn/SiO_2 catalysts and the role of Sn in NO–hydrocarbon reactions, 461
Surface organometallic chemistry of tin. Controlled thermal transformation *in vacuo* of $Sn(n\text{-}C_4H_9)_3$ fragments grafted on the surface of alumina, 3419

Tin adlayer
Structure sensitivity of irreversibly adsorbed tin on gold single-crystal electrodes in acid media, 3769

Tin oxide
SnO_2–V_2O_5-based catalysts. Nature of surface species and their activity in *o*-xylene oxidation, 4321

Titania
Effect of potassium addition to the TiO_2 support on the structure of V_2O_5/TiO_2 and its catalytic properties in the oxidative dehydrogenation of propane, 1609
Exact analytical solution for the powder pattern of orthorhombic-*g* systems. Predicted EPR powder spectrum and application to powder $TiO:Cr^{3+}$ in the rutile phase, 2303
Reduction of NO over TiO_2-supported Cu catalysts, 2625
^1H NMR spectroscopy of titania. Chemical shift assignments for hydroxy groups in crystalline and amorphous forms of TiO_2, 2791
Photoelectrochemical study of titanium dioxide films prepared by anodisation of titanium metal in sulfuric acid, 4049
Catalytic testing of TiO_2/platinum/silicalite-1 composites, 4609
Sensitization of TiO_2 with phthalocyanines. Part 1.—Photo-oxidations using hydroxoaluminium tricarboxymonoamidephthalocyanine adsorbed on TiO_2, 5081

Titanium
Diffusion of hydrogen in titanium, $Ti_{88}Al_{12}$ and Ti_3Al, 483
Interaction of titanium with atomic and molecular oxygen, 2775
Isotope effect in the diffusion of hydrogen and deuterium in titanium, $Ti_{88}Al_{12}$ and Ti_3Al, 3407

Titanium–aluminium alloy
Diffusion of hydrogen in titanium, $Ti_{88}Al_{12}$ and Ti_3Al, 483
Isotope effect in the diffusion of hydrogen and deuterium in titanium, $Ti_{88}Al_{12}$ and Ti_3Al, 3407

Titanium aluminophosphate
Titanium incorporated ATS and AFI type aluminophosphate molecular sieves, 4617

Titanylphthalocyanine crystal
Molecular dynamics studies of titanylphthalocyanine crystals, 2463

TNT
Polymorphism, twinning and morphology of crystals of 2,4,6-trinitrotoluene grown from solution, 2107

Topology
Topological indices and graph polynomials of some macrocyclic belt-shaped molecules, 625

Total internal reflection microscopy
Direct measurement of the depletion interaction in a charged colloidal dispersion, 4997

Transfer
A new approach to the measurement of transfer rates across immiscible liquid/liquid interfaces, 5177

Transient optical absorption spectroscopy
Transient optical absorption and time-resolved resonance Raman experiments on covalently linked porphyrin–quinone systems, 949
Reduction of a water-soluble iron(III) porphyrin and an iron(II) nitrosyl porphyrin by benzophenone ketyl radical, 2579

Transient species
Kinetics and spectral characteristics of transient species formed on one-electron oxidation of acridine-1,8-dione in aqueous solution. Pulse radiolysis study, 2353

Transition metal
Mechanism of bleaching by peroxides. Part 4.—Kinetics of bleaching of malvin chloride by hydrogen peroxide at low pH and its catalysis by transition-metal salts, 2535

Transition-metal oxide doping
Characteristics of transition-metal oxide doping of YSZ: Structure and electrical properties, 2173

Transition-metal sulfide
New catalysts for oxygen reduction based on transition-metal sulfides, 4311

Transition state
α-Bond cleavage upon electronic excitation of acetyl chloride. Study of Cl single surfaces by full geometry optimization, 373

Translational diffusion
Translational diffusion of a carbene and radicals derived from carbenes, 2361
Translational diffusion of chemically stable and reactive radicals in solution, 3057

Translational mobility
Conductivity of maltose–water–KCl mixtures in the supercooled liquid and glassy states, 1921

Transmission electron microscopy
Imaging nanosized gold colloids by atomic force microscopy: A direct comparison with transmission electron microscopy, 3137

Transmittance
Roughening of thin silver films in aqueous electrolytes, 2381

Transport
Mesoporous membranes: thermo-osmotic and isothermal flows with and without capillary condensation, 235
Characteristics of water transport in relation to microscopic structure in Nafion membranes, 663
Investigation of transport across an immiscible liquid/liquid interface. Electrochemical and second harmonic generation studies, 1369
Chemical transport in mixed conductors: Application to the model materials $SrTiO_3$ and ZrO_2, 2143
Transport phenomena and ion binding in poly(styrenesulfonate) solutions containing mixtures of two counter ions differing in charge and size, 3109

Trehalose
Crystalline and amorphous phases in the binary system water–β,β-trehalose, 1337

Triatomic
Calculation of proton affinities and absolute gas basicities of X_3 Group VI triatomics: A density functional study, 2681

Tributylamine
Temperature effect on proton-transfer equilibrium and IR spectra of chlorophenol–tributylamine systems, 2555

Trichlorosilane
Mechanism of the silicide-catalysed hydrodehalogenation of silicon tetrachloride to trichlorosilane, 4605

Triethylamine
Thermodynamic study of the ternary system NaCl–H_2O–Et_3N at 25 °C. Part 3.—Solubilities, 1487

Triplet energy transfer
Intramolecular triplet energy transfer in alkyne-bridged Ru–Os multinuclear complexes: switching between dipole–dipole and electron-exchange mechanisms, 2223

Tris(bipyridine)ruthenium(II)
Tris(bipyridine)ruthenium(II) photosensitized reduction of a macrocyclic cobalt(III) complex using phenol as a donor in aqueous acidic solutions, 969

Trivalent polyhedron
A sum rule for symmetries and isomer counts of trivalent polyhedra, 4145

Trouton's rule
Deviation from Trouton's rule and a method for converting a non-constitutive molecular parameter into a constitutive one, 1717

Tungsten
Crystal structure and non-linear optical properties of a novel half-open cubane-like cluster $[Et_4N]_3[WOS_3(CuI)_3(\mu_2\text{-}I)]\cdot H_2O$, 2343

Tungsten oxide
Influence of tungsten oxide on structural and surface properties of sol–gel prepared TiO_2 employed for 4-nitrophenol photodegradation, 819
Computer simulation of the surface structures of WO_3, 2049

Tungsten selenide
Extended X-ray absorption fine structure studies of the amorphous tungsten sulfides and selenides, WS_5, WSe_5 and WS_3, 2131

Tungsten sulfide
Extended X-ray absorption fine structure studies of the amorphous tungsten sulfides and selenides, WS_5, WSe_5 and WS_3, 2131
Core and valence spectra of TaS_2 and WS_2. Experimental and theoretical studies, 4561

Twinning
Polymorphism, twinning and morphology of crystals of 2,4,6-trinitrotoluene grown from solution, 2107

Ultracentrifugation
Solubilisation of α-chymotrypsin by water-in-oil microemulsions. An analytical ultracentrifugation study, 73

Ultradispersed diamond powder
FTIR studies on the spectral changes of the surface functional groups of ultradispersed diamond powder synthesized by explosive detonation after treatment in hydrogen, nitrogen, methane and air at different temperatures, 3401

Ultrafast time-domain measurements
Dynamical spectroscopy of many-body interactions. Coherent vibrations and predissociation of $I_2(B)$ in solid Kr, 1821

Ultramicroelectrode
A new approach to the measurement of transfer rates across immiscible liquid/liquid interfaces, 5177

Ultrasonics
Thermodynamic study of the ternary system NaCl–H_2O–Et_3N at 25 °C. Part 2.—Compressibilities, 47
Ultrasonic speeds and volumetric properties of binary mixtures of water with 2-[2-(2-alkoxyethoxy)ethoxy]ethanols at 298.15 K, 2369

Underpotential deposition
Competitive effects of S-containing catalyst poisons on the UPD of H in relation to H_2 evolution kinetics and OPD of H at Pt, 3709

Uniform dissolved gas blob
Unstable supersaturated solutions of gases in liquids and nucleation theory, 2843

Unimolecular decay
Photophysical triplet state processes of 4-*H*-1-benzopyrane-4-thione in a perfluoroalkane. Part 1.—Temperature dependence of unimolecular triplet decay, 733

Unimolecular reaction
Sensitivity of molecular dynamics unimolecular rate calculations to defects in the potential-energy surface, 1297
Uranium dioxide
Oxidation of UO_2 in molten alkali-metal carbonate mixtures: Formation of uranates and diuranates, 5059
Urea
Characterization of *gauche* end-groups in α,ω-dibromoalkanes: vibrational properties of the 1,6-dibromohexane/urea inclusion compound, 267
Structural and dynamic properties of the 1,10-dibromodecane/urea inclusion compound, investigated by variable-temperature powder X-ray diffraction, solid-state ^2H NMR lineshape analysis and solid-state ^2H NMR spin–lattice relaxation time measurements, 2179
Role of cosolvent in hydrophobic interactions. Calorimetric studies of alkanols in concentrated aqueous solutions of urea at 298 K, 3087
Deuterium isotope effects on ^{31}P NMR parameters: Hydrogen bonding in a solid urea–phosphoric acid adduct, 5047
UV photoelectron spectroscopy
Frontier electronic structure in gas-phase epoxy and hydroxy cyclohexenes by means of photoelectron and electron transmission spectroscopies, 1447
UV reflectance spectroscopy
UV reflectance and FTIR spectroscopic studies of CO adsorption and reaction on lanthanum oxide, 4675
UV–VIS–NIR spectroscopy
UV–VIS–NIR and Raman spectroelectrochemistry of regioregular poly(3-octylthiophene): Comparison with its non-regioregular analogue, 1387
UV–VIS spectroscopy
Spectroscopic studies of vanadium-substituted zeolitic silicates of MFI topology, 1067
Electrochemical recognition of chloride ions by a poly[tris-(2,2′-bipyridine)ruthenium(II)] modified electrode, 1527
Synthesis of hybrid metal–semiconductor ultrafine particles. Photochemical deposition of silver on a ZnO colloid surface, 1555
High nuclearity Pt carbonyls in alkali-metal X zeolites, 2035
Magnetic circular dichroism and optical absorption spectra of Eu^{3+} in $Y_3Al_5O_{12}$ (YAG), 2487
Electrodeposition of metallic gold clusters at the water/1,2-dichloroethane interface, 3865
Valence bond model
Unusual frequency increases of the C=C stretching mode of polyenes and of the Kekulé mode of benzene in S_1 states: Application of a simple valence bond model, 3481
Vanadia
Preparation of supported vanadium oxide catalysts. Adsorption and thermolysis of vanadyl acetylacetonate on a silica support, 843
Combined Raman and IR study of MO_x–V_2O_5/Al_2O_3 (MO_x = MoO_3, WO_3, NiO, CoO) catalysts under dehydrated conditions, 3259
Selective catalytic reduction of nitric oxide with ammonia on vanadia/alumina catalysts. Influence of vanadia loading and secondary metal oxide additives, 3267
Synthesis and characterization of supported vanadium oxides by adsorption of the acetylacetonate complex, 3635
SnO_2–V_2O_5-based catalysts. Nature of surface species and their activity in *o*-xylene oxidation, 4321
Characterisation of VO_x/ZrO_2 catalysts by electron paramagnetic resonance and X-ray photoelectron spectroscopy, 4337
Intercalation of Methylene Blue into vanadium pentaoxide gels, 4479
Vanadium
Cyclic voltammetric studies of vanadium in V molecular sieves, 473
Spectroscopic studies of vanadium-substituted zeolitic silicates of MFI topology, 1067
Vanadium phosphate
n-Butane oxidation using catalysts prepared by treatment of $VOPO_4 \cdot 2H_2O$ with octanol, 137
Structure-sensitivity study of partial propene oxidation over $AV_2P_2O_{10}$ vanadium phosphate compounds, 1423
Influence of zirconium phosphate on the properties of $(VO)_2P_2O_7$ catalysts for the selective oxidation of *n*-butane to maleic anhydride, 3273
Investigation of vanadium phosphorus oxide catalysts (VPO) during toluene ammoxidation: New mechanistic insights by *in situ* EPR, 4257
van der Waals complex
Rotational spectrum of the isotopically substituted van der Waals complex Ar–CO_2 investigated with a molecular beam Fourier transform microwave spectrometer, 901
Vapour complex
Thermodynamic study of the rare earth vapour complexes: $ScAl_2Cl_9$ and YAl_2Cl_9, 1887
Vapour–liquid equilibrium
Bulk and surface properties for the methanol–1,1-dimethylpropyl methyl ether and methanol–1,1-dimethylethyl methyl ether systems, 4435
Vaterite
Effect of divalent cations on the formation and structure of calcium carbonate polymorphs, 1017
Verdet constant
Magneto-optical constants of fluoride optical crystals and other AB_2 and A_2B type compounds, 2753
Very low pressure reactor technique
Kinetic studies of the reaction of Cl atoms with SiH_4, 3299
Kinetic studies of the reaction of Cl atoms with CH_2SSCH_3, 4905
Vesicle bilayer
Photochemical electron transfer in micellar systems and across surfactant vesicle bilayers promoted by esters of 2,1,3-benzothiadiazole-4,7-dicarboxylic acid, 5005
Vesicle formation
Rotational dynamics of lipid–detergent mixtures probed by a cyanine dye: A mechanism for vesicle formation, 4279
Vibration
Investigation of the vibrational properties of CN^- on a Pt electrode by *in situ* VIS–IR sum frequency generation and functional density calculations, 3823
Vibrational frequency
A method to calculate vibrational frequency shifts in heteroclusters: Application to N_2^+–He_n, 11
Vibrational mode
Characterization of *gauche* end-groups in α,ω-dibromoalkanes: vibrational properties of the 1,6-dibromohexane/urea inclusion compound, 267
Vibrational relaxation
Vibrational and rotational relaxation of the ν(C—Br) mode of 2-bromopropane, 175
Vibrational spectroscopy
Sum-frequency vibrational spectroscopy of soluble surfactants at the air/water interface, 515
Unusual frequency increases of the C=C stretching mode of polyenes and of the Kekulé mode of benzene in S_1 states: Application of a simple valence bond model, 3481
Vibrational state
Vibrational behaviour of the carbon–muonium bond in the muonated ethyl radical, 2331
Vinylcyclopropane
Fourier transform rotational spectrum and molecular structure of vinylcyclopropane, 907
Viologen
Photosensitized charge separation using ruthenium(II) complex-containing polymers in MeOH, 3599
Virial coefficient
A simple model for size non-additive mixtures, 4943
Viscosity
Effect of the addition of *n*-alkylamines on the growth of sodium dodecyl sulfate micelles, 2413
Formamide–(C_1–C_5) alkan-1-ols solvent systems, 3347
Corrigendum to Effect of the addition of *n*-alkylamines on the growth of sodium dodecyl sulfate micelles, 5185
Visible-light induced photocatalytic property
Intercalation of iron oxide in layered $H_2Ti_4O_9$ and $H_4Nb_6O_{17}$: visible-light induced photocatalytic properties, 5089
Vitrified protein
Vitrification and structural relaxation of a water-swollen protein, wheat gluten and the thermodynamics of its water–protein ↔ ice equilibrium, 4521
Void space adsorption model
Activity analysis of a water oxidation catalyst adsorbed on an inorganic particle matrix, 3431
Voltammetry
In situ and real time X-ray diffraction study of an electrocrystallisation process: Ag electrodeposition on Au(111), 1277
Electrochemical recognition of chloride ions by a poly[tris-(2,2′-bipyridine)ruthenium(II)] modified electrode, 1527
V–Sb–O catalyst
Surface chemistry of V–Sb–oxide in relation to the mechanism of acrylonitrile synthesis from propane. Part 1.—Chemisorption and transformation of possible intermediates, 5141
Surface chemistry of V–Sb–oxide in relation to the mechanism of acrylonitrile synthesis from propane. Part 2.—Reactivity towards ammonia and relationship with catalytic behaviour, 5151
VUV radiation
Pump–probe femtosecond-laser VUV REMPI technique applied to the study of highly excited states of allyl iodide, 1681
Water
Characteristics of water transport in relation to microscopic structure in Nafion membranes, 663
Basicity of amides in water and in aqueous micellar solutions of SDS. Their influence on micellar structure, 1205
Rheological and densitometric studies of poly(propylene oxide)–water mixtures over a range of temperatures, 1859
Atomistic simulation of adsorption of water on three-, four- and five-coordinated surface sites of magnesium oxide, 2081
Hydrogen bonding and surface interactions in protic solvents. Coadsorption of ammonia and hydrogen fluoride with water on silver(110), 2445
^{17}O and ^1H chemical shifts of water in solutions of some ammonium salts: Evaluation of the anionic effect on the ^{17}O and ^1H chemical shifts of water in aqueous solutions of mineral acids, 3533
Water absorption
A QCM analysis of water absorption in lithium polymer electrolytes, 4115
Water activity
New theory of water activity in heterogeneous systems, 979
Water adsorption
State of aluminium in hydrothermally dealuminated MFI zeolite, 1647
Water cluster
Rearrangements of the water trimer, 2505
Water diffusion
ATR-FTIR spectroscopic studies of the structure and permeability of sulfonated poly(ether sulfone) membranes. Part 2.—Water diffusion processes, 2737
Water–ice equilibrium
Vitrification and structural relaxation of a water-swollen protein, wheat gluten and the thermodynamics of its water–protein ↔ ice equilibrium, 4521
Water–oil aerosol
Intercluster exhange rates in AOT water-in-oil microemulsions: Percolation, material transport mechanism and activation energy, 3145
Water oxidation catalysis
Activity analysis of a water oxidation catalyst

immobilized in a polymer membrane, 2457
Activity analysis of a water oxidation catalyst adsorbed on an inorganic particle matrix, 3431
Water–polymer interaction
ATR-FTIR spectroscopic studies of the structure and permeability of sulfonated poly(ether sulfone) membranes. Part 1.—Interfacial water–polymer interactions, 2731
Water replacement
Effects of fluorocarbon and hydrocarbon anionic micelles on the kinetics of water replacement in the palladium(II) aquocomplex of 1,1,7,7-tetraethyldiethylenetriamine by monoalkylthioureas, 2263
Water-trimer enantiomer
Continuous chirality analysis of interconversion pathways of the water-trimer enantiomers, 2523
Water vapour
Ideality of water vapour and its adsorption on the glass surfaces of a conventional glass vacuum apparatus at 295 K between 0 and 10 Torr, 4301
Wave-induced chaos
Wave-induced chaos in a continuously fed unstirred reactor, 2911
Wetting
Particle wettability and line tension, 85
Self-consistent field theory for wetting of binary polymer–solvent mixtures on rigid and soft interfaces, 579
Wettability of spherical particles at liquid surfaces, 4271
^{129}Xe NMR spectroscopy
^{129}Xe NMR chemical shifts and linewidths of xenon in zeolites ZnY. Part 1.—The effect of the preparation technique on the distribution of the zinc cations, 493
Xenon
Thermodynamic studies of triangular molecules: Liquid mixtures of xenon and the boron halides, BF_3 and BCl_3, 215
XES
Simple correlation between Mn-Kα X-ray emission and Mn 2p X-ray photoelectron spectra for high oxidation number or low-spin manganese compounds, 2759
X-Irradiation
Structure of the surface films of AOT solutions and of Newton black films drawn from the same solutions, 553
EPR study of X-irradiated hydroxyalkyl phosphate esters. Phosphate radical formation in polycrystalline glucose phosphate, ribose phosphate and glycerol phosphate salts at 77 and 295 K, 995
Corrigendum to Structure of the surface films of AOT solutions and of Newton black films drawn from the same solutions, 2317
X-Ray absorption spectroscopy
Electrochemical intercalation of lithium into vanadium pentaoxide: An *in situ* X-ray absorption study, 103
Thermochemical reactivity of a solvate crystal studied by thermal analysis and *in situ* X-ray absorption spectroscopy, 5035
X-Ray diffraction
Effect of calcination on the structure of Ni/MgO catalyst: An X-ray diffraction study, 469
Influence of tungsten oxide on structural and surface properties of sol–gel prepared TiO_2 employed for 4-nitrophenol photodegradation, 819
Effect of divalent cations on the formation and structure of calcium carbonate polymorphs, 1017
Structural state of boron in MFI-titanium boralites and their catalytic properties, 1031
Surface chemical heterogeneity of pillared hydrotalcites, 1243
In situ and real time X-ray diffraction study of an electrocrystallisation process: Ag electrodeposition on Au(111), 1277
Tetrakis(decyl)ammonium tetraphenylborate: A novel electrolyte for non-polar media, 1747
EPR characterization of O^- and trapped electrons in 20% SrF_2/SmOF, 1793
Crystal and *pVT* data and thermodynamics of the phase transitions of 2-methyl-2-nitropropane, 1899
X-Ray diffraction study on the aggregate structure of 5,10,15,20-tetra(4-sulfophenyl) porphinatopalladium(II)(4-) in aqueous solution, 1935
Methanol adsorption and dehydrogenation over stoichiometric and non-stoichiometric hydroxyapatite catalysts, 1981
Characterization of SAPO-11 synthesized conventionally and in the presence of fluoride ions, 2017
Magnetic structure of $La_{1.2}Tb_{0.8}CuO_4$, 2151
Evaluation of accessible and inaccessible microporosities of microporous carbons, 2297
Alumination of the purely siliceous mesoporous molecular sieve MCM-41 and its hydrothermal conversion into zeolite Na-A, 2311
In situ and real time X-ray diffraction study of interdiffusion at the Ag/Au(111) interface after electrolytic deposition, 4657
Heat resistance of a shock-synthesized B–C–N heterodiamond, 5067
X-Ray photoelectron spectroscopy
Evidence for different copper species in precursors of copper–cerium oxide catalysts for hydrogenation reactions. An X-ray diffraction, EPR and X-ray photoelectron spectroscopy study, 131
Investigations of zeolites by photoelectron and ion-scattering spectroscopy. Part 3.—Cation depletion at the external surface of HNa-faujasites, 701
Influence of tungsten oxide on structural and surface properties of sol–gel prepared TiO_2 employed for 4-nitrophenol photodegradation, 819
Chemical interaction between plasma-excited nitrogen and the surface of HY zeolite, 1643
Characterization of SAPO-11 synthesized conventionally and in the presence of fluoride ions, 2017
Simple correlation between Mn-Kα X-ray emission and Mn 2p X-ray photoelectron spectra for high oxidation number or low-spin manganese compounds, 2759
Characterisation of VO_x/ZrO_2 catalysts by electron paramagnetic resonance and X-ray photoelectron spectroscopy, 4337
Core and valence spectra of TaS_2 and WS_2. Experimental and theoretical studies, 4561
XPS and EPR study of high and low surface area CoO–MgO solid solutions: Surface composition and Co^{2+} ion dispersion, 4567
Characterization of $H_4PMo_{11}VO_{40}$ heteropolyacid on SiO_2 and SiC supports, 5103
X-Ray scattering
Grazing incidence surface scattering of X-rays, 505
Yttria-stabilized zirconia
Characteristics of transition metal oxide doping of YSZ: Structure and electrical properties, 2173
Partial oxidation of C_2–C_4 alkanes into oxygenates using an Au | yttria-stabilized zirconia | Ag electrochemical reaction cell, 3579
Yukawa interaction
Simple model for liquid/liquid interfaces, 3839
Zeolite
Separation of hexane isomers on zeolites mordenite and beta, 143
Synthesis of zeolite beta. Part 1.—Using tetraethylammonium hydroxide/bromide with addition of chelates as templating agents, 159
Frequency-response NH_3 sorption study of acidic sites in H-ZSM-5 catalysts, 307
Adsorption of Methylene Blue from aqueous solutions by amorphous aluminosilicate gels and zeolite X, 317
Study of carbon dioxide diffusion in zeolites with one- and three-dimensional channel networks by MD simulations and FR methods, 487
^{129}Xe NMR chemical shifts and linewidths of xenon in zeolites ZnY. Part 1.—The effect of the preparation technique on the distribution of the zinc cations, 493
Heterogeneity of Si–OH–Al groups in HNaY zeolites, 499
Growth and properties of small Rh particles within an NaX matrix. Thermal analysis, electron microscopy, IR and photoelectron spectroscopy, 693
Investigations of zeolites by photoelectron and ion-scattering spectroscopy. Part 3.—Cation depletion at the external surface of HNa-faujasites, 701
EPR and electron spin echo modulation spectroscopy of Cu^{II} ion species in Cu^{II}-exchanged K-L gallosilicate, 855
Acidic and catalytic properties of aluminated mordenite zeolite: Effect of extraframework aluminium, 861
Regioselective hydrogenation of alkenes over Pt-loaded zeolite BEA, 871
Spectroscopic studies of vanadium-substituted zeolitic silicates of MFI topology, 1067
Use of pyridine as a probe for the determination, by IR spectroscopy, of the Brønsted acid strength of M^IHNaY zeolites, 1263
Roles of alkali-metal added to Cu-NaZSM-5 catalysts in the oxidation of benzyl alcohol, 1267
Thin $Mo(CO)_6$–Y-zeolite layers: Preparation and *in situ* transmission FTIR spectroscopy, 1633
Reversible colour changes in zeolite A treated with ammonium polysulfide, 1639
Chemical interaction between plasma-excited nitrogen and the surface of HY zeolite, 1643
State of aluminium in hydrothermally dealuminated MFI zeolite, 1647
^{129}Xe NMR chemical shifts and linewidths of xenon in zeolites ZnY. Part 2.—Examination of various origins of chemical shift distributions, 1815
Oxidation sites in dealuminated mordenite. A combined EPR, NMR and product distribution study, 2027
High nuclearity Pt carbonyls in alkali-metal X zeolites, 2035
Prediction of template location *via* a combined Monte Carlo–simulated annealing approach, 2065
Embedding nano-clusters in siliceous faujasite, 2093
Computational studies of the reaction of methanol at aluminosilicate Brønsted acid sites, 2099
Applied crystallography solutions to problems in industrial solid-state chemistry. Case examples with ceramics, cements and zeolites, 2187
Alumination of the purely siliceous mesoporous molecular sieve MCM-41 and its hydrothermal conversion into zeolite Na-A, 2311
Electron paramagnetic resonance of heterogeneous chromium catalysts, 2431
Study of methane adsorption in MFI and MEL zeolites by combination of the electronegativity equalization method and molecular dynamics, 2475
Characterization of Lewis-acid sites in zeolites by EPR using the NO molecule as a probe, 2495
Investigation of acid properties of dealuminated H-mordenite zeolites by low-temperature diffuse reflectance FTIR, 2641
Thermal, structural and optical properties of {CdS}–$Na_{86}X$ composites, 2651
Catalytic studies with dealuminated Y zeolite. Part 3.–*n*-Hexane cracking, 2817
Chemistry of the calcination of 15-crown-5 and 18-crown-6 ethers occluded in faujasite polytype zeolites, 3281
Synergistic effect of zeolite in an intumescence process. Study of the interactions between the polymer and the additives, 3435
Adsorption of aromatic compounds in large MFI zeolite crystals, 3445
Adsorption of ethanoic acid on zeolites NaY and HY, 3647
Muonium adduct of benzaldehyde: A novel probe of cation–molecule interactions in zeolite catalysts and of solvation and electronic substituent effects, 4265
IR study of CO adsorption on Cu-ZSM-5 and CuO/SiO_2 catalysts: σ and π components of

the Cu^+—CO bond, 4595
Catalytic testing of TiO_2/platinum/silicalite-1 composites, 4609
Synthesis of Pt clusters in zeolite BEA. Effect of reduction rate on cluster size and location, 4637
O—H stretching frequencies in NaHX and NaHY zeolites: IR spectroscopic studies and quantum chemical calculations, 4643
Dispersion and location of molybdenum sulfides supported on zeolite for hydrodesulfurization, 4647
IR spectroscopy of neutral and ionic hydrogen-bonded complexes formed upon interaction of CH_3OH, C_2H_5OH, $(CH_3)_2O$, $(C_2H_3)_2O$ and C_4H_8O with H-Y, H-ZSM-5 and H-mordenite: Comparision with analogous adducts formed on the H-Nafion superacidic membrane, 4863
Reaction pathways of propane and propene conversion in the presence of NO and O_2 on Cu/MFI, 5129
FTIR investigation of the co-adsorption of acetonitrile and carbon monoxide on Cu-ZSM-5, 5165

Zeolite–base adduct
IR spectroscopy of neutral and ionic hydrogen-bonded complexes formed upon interaction of CH_3OH, C_2H_5OH, $(CH_3)_2O$, $(C_2H_3)_2O$ and C_4H_8O with H-Y, H-ZSM-5 and H-mordenite: Comparision with analogous adducts formed on the H-Nafion superacidic membrane, 4863
Separation of close-boiling hydrocarbons with silicalite zeolite membranes, 2499

Zeolite membrane
Synthesis and characterization of zeolite (MFI) membrane on anodic alumina, 1061
Separation of close-boiling hydrocarbons with silicalite zeolite membranes, 2499

Zeolite synthesis
^{129}Xe NMR chemical shifts and linewidths of xenon in zeolites ZnY. Part 1.—The effect of the preparation technique on the distribution of the zinc cations, 493

Zinc complex anion
Langmuir–Blodgett film and second harmonic generation of a new type of amphiphilic non-linear optical bis-chromophore complex dye, 2585

Zinc–nickel alloy
Galvanostatic pulse and pulse reverse plating of zinc–nickel alloys from sulfate electrolytes on a rotating disc electrode, 4021

Zinc oxide
An experimental and theoretical study of the interaction of CH_3OH and CH_3SH with ZnO, 3247

Zirconia
Influence of treatment with sulfuric acid on the angularity of a zirconia system, 451
Chemical transport in mixed conductors: Application to the model materials $SrTiO_3$ and ZrO_2, 2143
Corrigendum to Influence of treatment with sulfuric acid on the angularity of a zirconia system, 2503
Structure and catalysis of cobalt oxide overlayers prepared on zirconia by low-temperature-plasma oxidation, 3425
Characterisation of VO_x/ZrO_2 catalysts by electron paramagnetic resonance and X-ray photoelectron spectroscopy, 4337
Isotope-exchange reaction between hydrogen molecules and surface hydroxy groups on bare and modified ZrO_2, 4491

Zirconium phosphate
Influence of zirconium phosphate on the properties of $(VO)_2P_2O_7$ catalysts for the selective oxidation of *n*-butane to maleic anhydride, 3273

ZnS nanocrystallite
Semiconductor photocatalysis. Part 20.—Role of surface in the photoreduction of carbon dioxide catalysed by colloidal ZnS nanocrystallites in organic solvent, 2401
